CITY OF WILDOMAR
PLANNING COMMISSION

Commission Members
Chairman Robert Devine · Vice-Chairman Harv Dykstra
Gary Andre · Scott Nowak · Miguel Casillas

REGULAR MEETING
WEDNESDAY, OCTOBER 21, 2009 AT 7:00 P.M.
Council Chambers, Wildomar City Hall, 23873 Clinton Keith Road, Wildomar, CA 92595

| PUBLIC COMMENTS: Prior to the business portion of the agenda, the Planning Commission will receive public comments regarding any agenda items or matters within the jurisdiction of the governing body. This is the only opportunity for public input except for scheduled public hearing items. The Chairperson will separately call for testimony at the time of each public hearing. If you wish to speak, please complete a "Public Speaker/Comment Card" available at the door. The completed form is to be submitted to the Chairperson prior to an individual being heard. Lengthy testimony should be presented to the Planning Commission in writing (8 copies) and only pertinent points presented orally. The time limit established for public comments is three minutes per speaker or less if a large number of requests are received on a particular item. |

AGENDA

1.0 CALL TO ORDER

1.1 Roll Call

1.2 Pledge of Allegiance

2.0 PUBLIC COMMENT: Members of the audience may comment on matters that are not included on the agenda. Each person will be allowed three (3) minutes or less if a large number of requests are received on a particular item. No action may be taken on a matter raised under “public comment” until the matter has been specifically included on an agenda as an action item.

3.0 APPROVAL OF MINUTES:

None.

4.0 CONTINUED PUBLIC HEARING ITEMS: The Planning Commission will review the proposed request, receive public input and consider action for the following items:

None.
5.0 PUBLIC HEARING ITEMS: The Planning Commission will review the proposed request, receive public input and consider action for the following items:

5.1 TENTATIVE PARCEL MAP 35963 AND PLOT PLAN (09-0280): The project proposes a Tentative Parcel Map and Plot Plan to develop a 72,103 square foot enclosed Boat and RV storage facility on a 3.61 acre site located Southerly of Corydon Street between Bryant Street and Melinda Lane, APN: 370-340-001.

Environmental Determinations: In accordance with the California Environmental Quality Act (CEQA) a Mitigated Negative declaration has been recommended for adoption.

6.0 GENERAL BUSINESS ITEMS:

None.

7.0 ADMINISTRATIVE HEARINGS REPORT:

None.

8.0 PLANNING DIRECTOR’S REPORT: This item is reserved for the Planning Director to comment or report on items not on the agenda. No action will be taken.

9.0 PLANNING COMMISSION COMMENTS: This portion of the agenda is reserved for Planning Commission business, for the Planning Commission to make comments on items not on the agenda, and/or for the Planning Commission to request information from staff.

10.0 ADJOURNMENT

The next scheduled Regular Meeting of the City of Wildomar Planning Commission is November 4, 2009 at 7:00 P.M.

RIGHT TO APPEAL: Any decision of the Planning Commission may be appealed to the City Council within ten (10) calendar days after the date of Planning Commission’s action.

REPORTS: All agenda items and reports are available for review at Wildomar City Hall, 23873 Clinton Keith Road, Suite 201, Wildomar, California 92595. Any writings or documents provided to a majority of the Planning Commission regarding any item on this agenda (other than writings legally exempt from public disclosure) will be made available for public inspection at City Hall during regular business hours. If you wish to be added to the regular mailing list to receive a copy of the agenda, a request must be made through the Planning Department in writing or by e-mail.

PUBLIC COMMENTS: Prior to the business portion of the agenda, the Planning Commission will receive public comments regarding any agenda items or matters within the jurisdiction of the governing body. This is the only opportunity for public input except for scheduled public hearing items. The Chairperson will separately call for testimony at the time of each public hearing. If you wish to speak, please complete a “Public Speaker/Comment Card” available at the door. The completed form is to be submitted to the Chairperson prior to an individual being heard. Lengthy testimony should be presented to the Planning Commission in writing (8 copies) and only pertinent points presented orally. The time limit established for public comments is three minutes per speaker.
ADDITIONS/DELETIONS: Items of business may be added to the agenda upon a motion adopted by a minimum 2/3 vote finding that there is a need to take immediate action and that the need for action came to the attention of the City subsequent to the agenda being posted. Items may be deleted from the agenda upon request of staff or upon action of the Planning Commission.

ADA COMPLIANCE: If requested, the agenda and backup materials will be made available in appropriate alternative formats to persons with a disability, as required by Section 202 of the Americans With Disabilities Act of 1990 (42 U.S.C. Sec. 12132), and the federal rules and regulations adopted in implementation thereof. Any person who requires a disability-related modification or accommodation, including auxiliary aids or services, in order to participate in the public meeting may request such modification, accommodation, aid or service by contacting the Planning Department either in person or by telephone at (951) 667-7751, no later than 10:00 A.M. on the day preceding the scheduled meeting.

POSTING STATEMENT: On October 16, 2009, a true and correct copy of this agenda was posted at the three designated posting places: Wildomar City Hall, 23873 Clinton Keith Road; U. S. Post Office, 21392 Palomar Street; and the Mission Trail Library, 34303 Mission Trail Blvd.
TO: Chairman Devine, Members of the Planning Commission

FROM: Sean del Solar, Planner

SUBJECT: Eagle Eye Storage

Tentative Parcel Map 35963 and Plot Plan 09-0280 (PP22811) – The project proposes a Tentative Parcel Map and Plot Plan for the development of a 72,103 square foot enclosed mini-storage facility for Boats and Recreational Vehicles on a 3.61 acre site located Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane in the City of Wildomar, County of Riverside, California.

APN: 370-340-001

RECOMMENDATION:

It is recommended that the Planning Commission:

1. Adopt a resolution entitled:

2. Adopt a resolution entitled:

3. Adopt a resolution entitled:

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF WILDOMAR APPROVING PLOT PLAN 09-0280 TO ALLOW FOR THE DEVELOPMENT OF FOUR BUILDINGS TOTALING 72,103 SQUARE FEET ON A 3.61-ACRE SITE LOCATED SOUTHERLY OF CORYDON STREET, EASTERLY OF BRYANT STREET AND WESTERLY OF MELINDA LANE INTO FIVE PARCELS AND PROVIDE FOR ADDITIONAL ROAD DEDICATION ALONG CORYDON STREET, BRYANT STREET AND MELINDA LANE, KNOWN AS ASSESSOR’S PARCEL NO. 370-340-001

BACKGROUND:

The applicant is proposing the construction of an enclosed personal storage facility intended for Boat and RV Storage with a Condominium ownership structure. The facility would consist of four industrial buildings and an office/caretaker’s residence totaling 72,103 square feet. The project includes a Parcel Map and Road Improvements to Corydon Street, Bryant Street and Melinda Lane.

The proposed Boat and RV Storage facility would occupy a 3.61 acre (gross area or 3.11 net acres) vacant property located in the northwest area of town. More specifically, the site is located south of Corydon Street, east of Bryant Street and west of Melinda Lane.

The subject site appears to be partially graded and has non-native annual grass and weed species scattered throughout the site. The site gently slopes from a high point in the southwest of 1,280 to 1,271 feet above mean sea level in the northeast. Grading activities at the site would result in the import of 3,834 cubic yards of soil from sites yet to be determined. Drainage of the site would not significantly change after development and the site would still discharge runoff at the northeast corner of the property.

The General Plan Land Use and Zones designations, as well as the existing land uses for the project site and surrounding properties are provided in the following table.

<table>
<thead>
<tr>
<th>Location</th>
<th>Current Use</th>
<th>General Plan Land Use Designation</th>
<th>Zoning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject Property</td>
<td>Vacant</td>
<td>Light Industrial (LI)</td>
<td>General Commercial (C-1/C-P)</td>
</tr>
<tr>
<td>North*</td>
<td>Residential</td>
<td>General Commercial (City of Lake Elsinore)</td>
<td>Specific Plan (City of Lake Elsinore)</td>
</tr>
</tbody>
</table>
As seen above, the subject site is zoned C-1/C-P, General Commercial with a General Plan Land Use Designation of Light Industrial. Per section 17.72.010(B)(16), Trailer and Boat Storage is allowed, provided a Plot Plan application has been approved. The proposed project is also consistent with the General Plan Land Use Designation of Light Industrial, which describes intended uses as: Industrial and related uses including warehousing/distribution, assembly and light manufacturing, repair facilities, and supporting retail uses.

**DISCUSSION:**

The proposed project consists of two applications, a Parcel Map and Plot Plan which are discussed in the subsequent sections:

**Parcel Map 35963**

To enable the development of the site, the applicant has requested the approval of a tentative parcel map. Currently, the subject site is 3.61 gross (3.17 net) acres. Parcel Map 35963 would subdivide the existing parcel into five new parcels.

<table>
<thead>
<tr>
<th>PROPOSED PARCEL</th>
<th>LOT SIZE</th>
<th>USE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lot 1</td>
<td>1.56 acres</td>
<td>Caretakers Unit and Common Areas</td>
</tr>
</tbody>
</table>

*Corydon Street is assumed to run east-west.*
<table>
<thead>
<tr>
<th>PROPOSED PARCEL</th>
<th>LOT SIZE</th>
<th>USE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lot 2</td>
<td>0.63 acres</td>
<td>Site of Building “A”</td>
</tr>
<tr>
<td>Lot 3</td>
<td>0.19 acres</td>
<td>Site of Building “B(a)”</td>
</tr>
<tr>
<td>Lot 4</td>
<td>0.21 acres</td>
<td>Site of Building “B(b)”</td>
</tr>
<tr>
<td>Lot 5</td>
<td>0.58 acres</td>
<td>Site of Building “C”</td>
</tr>
</tbody>
</table>

The General Commercial (C-1/C-P) Zone does not contain minimum lot requirements since commercial lot patterns are entirely dependent on the proposed use and the configuration of the buildings.

Parcel Map 35963 also includes areas to be dedicated for right-of-way. Along Corydon Street, the project would dedicate a 64 foot, half width Right-of-Way. Corydon Street will also be improved with an additional 34 feet of pavement, curb, gutter, meandering sidewalks and a landscaped parkway. The project would dedicate half of the required 60 foot Right-of-Way (30 feet), to Bryant Street and provide paving curb, gutter and sidewalks plus 12 feet of additional paving west of midline. Similarly, the project would dedicate half of the required 60 foot Right-of-Way (30 feet), to Melinda Lane and provide paving curb, gutter and sidewalks plus 10 feet of additional paving east of midline.

**Plot Plan 09-0280**

The proposed project consists of the construction of four industrial buildings which would provide 70,183 square feet of storage for recreational vehicles, boats, or other personal items on a 3.61-acre site Building A would be 27,550 square feet. Building B would consist of two sections, the first B(a), would be 8,727 square feet, and the other B(b) would be 8,706 square feet. Building C would be 25,200 square feet. Additionally, a 1,920 square foot office/caretakers unit would be constructed to the west of Building C at the entrance to the facility. A total of 99 condo units would be available for rental. The proposed project also includes a 1,920-square foot, two-story office and caretaker’s residence (25 feet in height), an RV wash and sewage dump area.

The project site will be primarily accessed from Bryant Street, with secondary access provided via Melinda Lane. Corydon Street would be improved with 30 feet of additional paving and curb gutter and sidewalk improvements. Additionally, the project would pay an in-lieu fee for a future median to be installed on Corydon Street. A 30 foot dedication and full street improvements from midline of the street, plus 12 feet of paving (west of midline) would be provided to Bryant Street. Similarly, a 30 foot dedication and full
street improvements from midline of the street, plus 10 feet of paving would be provided to Melinda Lane.

Building A would be 27,550 square feet. Building B would consist of two sections, the first B(a), would be 8,727 square feet, and the other B(b) would be 8,706 square feet. Building C would be 25,200 square feet and the Caretaker’s Residence and Office would be approximately 1,920 square feet. The building information is also identified below.

<table>
<thead>
<tr>

<tr>
<td><strong>Total Building Area:</strong></td>
<td>72,103 square feet</td>
</tr>
</tbody>
</table>

Per Section 17.72.030(C) of the Wildomar Municipal Code, the maximum building height in the General Commercial (C-1/C-P) zone is 50 feet. No buildings associated with the project will exceed the maximum building height of the zone. All buildings will be no higher than 19 feet with the exception of the Caretaker’s Residence/Office, which will be approximately 25 feet in height. Skylark Field is located at the south end of Lake Elsinore; approximately 500 feet northeast of the project site. The proposed project site does not align with the approach or take off patterns of the existing runway. Furthermore, the location of the project is approximately 1,000 feet southwest of the runway, perpendicular to the flight path. Copies of the Initial Study were sent to the Airport Administrative offices at Cereal Street and to the Riverside County Airport Land Use Commission. The City was contacted by the Engineer of Record for Skylark Field who indicated that the project did not pose a hazard to the operation or future operation of the airfield.

The proposed project would have 19 foot high building walls fronting Corydon Street and similarly the residences to the south of the project site. The project’s exterior walls would be finished with Stucco facades and utilize cornice and other architectural features, including staggered heights to enhance the appearance of the facility and break up any sense of massing or monotony created by the long walls. Additionally, wrought iron trellises with climbing ivy will be incorporated in the design and rhythmically positioned along both Corydon Street and the south side of the project site to again break up any sense of massing or monotony. Along Corydon Street, two tiers of landscaping separated with a small retaining wall (approximately 3 feet) would create a significant mass of landscaping (about 21 feet in width behind the edge of pavement) along Corydon Street. The project also proposes a landscaped area between the residential areas to the south which would provide a 15 foot buffer between the two different land uses.
The proposed project would be gated with a combination of fencing types. Along both Bryant Street and Melinda Lane, 6 foot Split Face CMU block walls will enclose the site. Additionally, tubular steel mechanically retractable gates will secure the access points. Finally, along the south side of the property, a tubular steel and pilaster fence will provide security, allow for the observation of landscaping and enhance air circulation between the proposed project and the adjacent homes.

The conceptual landscaping plan shows London Plane Tree (Platanus acerifolia 'Columbia') and Australian Willow (Geijera Parvifolia) along Palomar Street. Along both Bryant Street and Melinda Lane, Red Crape Myrtle (Lagerstroemia Faueri 'Tuscarora') and Fern Pine (Podocarpus Gracilior) would be planted. Along the south side of the property, Fern Pine (Podocarpus Gracilior) would be planted. Throughout the landscaped areas, layers of shrubs would be planted and consist of the following species: Dwarf Lily of the Nile, (Agapanthus Africanus 'Peter Pan'), Fortnight Iris (Dietes Vegeta), Escallonia (Escallonia Fradesi), Prostrate Myoporum (Myoporum Parvifolium), Photinia (Photinia Fraseri), Variegated Tobira (Pittosporum Tobira 'Variegata'), and Indian Hawthorn (Raphiolepis Indica 'Clara'). In the northeast corner of the property near Corydon Street and Melinda Lane, the bioswale would be planted with Prostrate Myoporum (Myoporum Parvifolium), otherwise around the site a 3” layer of Fir chip mulch would be used as groundcover.

The project proposes to construct three parking spaces adjacent to the office/caretaker building near the entrance to the facility. These parking spaces would include one handicapped and two parking spaces for use by the general public. Within the facility, extra wide drive isles at 35 feet would allow vehicles to parallel park for the load/unload materials from storage units while not obstructing the vehicular circulation within the facility. The caretaker’s residence requires the development of two parking spaces (400 square feet) and would be provided by the first storage unit located adjacent to the office/caretaker’s building.

The project site is located 30 miles from the Mt. Palomar Observatory and according to the General Plan, falls within the Mt. Palomar Observatory special lighting district (Zone B). As such, all exterior lighting must be in compliance with Chapter 8.80 of the Wildomar Municipal Code which restricts the use of certain light fixtures to limit light pollution from projects around the Mount Palomar Observatory.

Based upon the design of the facility, staff believes that the proposed project would not be detrimental to the health, safety or general welfare of the community and will comply with the General Plan and thus recommends approval of Tentative Parcel Map 35963 and Plot Plan 09-0280.
FINDINGS:

Parcel Map

1. Tentative Parcel Map 35963 is consistent and compatible with the objectives, policies, general land uses, and programs specified in the City’s General Plan in that:

The General Plan land use designation for the site is LI (Light Industrial) typically results in project densities from 0.25 to 0.6 FAR. The proposed Map will result in the development of 4 industrial buildings and a caretakers unit with an overall FAR of 0.44. This density level does not exceed the range permitted under the General Plan land use designation for this site. One of the primary applicable policies stated in the Land Use Element of the General Plan is to accommodate the continuation of existing and development of new industrial, manufacturing, research and development, and professional offices in areas appropriately designated by General Plan and area plan land use maps. (Policy LU 24.1). The proposed parcel map will achieve this objective by accommodating new industrial uses to meet the needs of the both regional and local residents. Considering all of these aspects, Parcel Map 35963 furthers the objectives and policies of the General Plan and is compatible with the general land uses specific in the General Plan.

2. The design and improvement of the subdivision proposed under Tentative Parcel Map 35963 is consistent with the City’s General Plan in that:

The proposed subdivision has been designed to meet City standards which provide satisfactory pedestrian and vehicular circulation, including emergency vehicle access and on site improvements, such as streets, utilities, and drainage facilities have been designed and are conditioned to be constructed in conformance with City standards.

3. The site is physically suitable for the type of development proposed under Tentative Parcel Map 35963, in that:

The site is gently sloping easterly, but grading of the site will create a relatively level site of approximately 3.17 acres. The site is not located within a flood plain and contains no major geologic hazards have been reported on the site or other limited conditions that would render it unsuitable for industrial development.

4. The site is physically suitable for the density of development proposed under Tentative Parcel Map 35963, in that:

The site has gentle slopes but proposed grading will create a relatively level site of approximately 3.61 acres with finished building pad elevations at several
elevations from 1,279 to 1,274 feet above mean sea level. The subdivision has been designed to accommodate the development four industrial buildings and a caretakers unit, considering the shape and topography of the site. The project as proposed has a FAR of 0.44. According to the density ranges provided in the Land Use Element of the City’s General Plan for the LI land use designation and in the City’s Zoning Ordinance for the C-1/C-P zone, a FAR of 0.44 is appropriate for a site of this size and configuration.

5. The design of the subdivision and improvements proposed under Tentative Parcel Map 35963 is not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat in that:

The site is currently vacant and does not contain any significant vegetation or habitat for wildlife. There is no evidence that any endangered, threatened or listed species of plant or animal, or its habitat, is located on the site. There is no evidence that vernal pool complex, similar bodies of water, or conditions suitable for forming such bodies of water exist on the site. This project has been conditioned to comply with the environmental policies and regulations of the City of Wildomar and those of all local and regional governmental agencies having jurisdiction over the site.

6. The design of the subdivision and improvements proposed under Tentative Parcel Map 35963 is not likely to cause serious public health problems in that:

The design of the subdivision is in conformance with the City’s General Plan, Zoning Ordinance, and Subdivision Ordinance, the construction of all improvements on the site has been conditioned to comply with all applicable City of Wildomar ordinances, codes, and standards including, but not limited to, the California Uniform Building Code, the City’s Ordinances relating to stormwater runoff management and controls. In addition, the design and construction of all improvements for the subdivision has been conditioned to be in conformance with adopted public works standards. The City’s ordinances, codes, and standards have been created based on currently accepted standards and practices for the preservation of the public health, safety and welfare. Finally, the proposed street system throughout the subdivision will improve emergency vehicular access in the immediate neighborhood.

7. The design of the subdivision and improvements proposed under Tentative Parcel Map 35963, will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision in that:

No easements of record or easements established by judgment of a court of competent jurisdiction for public access across the site have been disclosed in a search of the title records for the site and the City does not otherwise have any constructive or actual knowledge of any such easements.
8. The design of the subdivision proposed Tentative Parcel Map 35963, adequately provides for future passive or natural heating and cooling opportunities in the subdivision in that:

Taking into consideration local climate and the existing contour and configuration of the site and its surroundings, the size and configuration of parcels within the proposed subdivision have been arranged to permit orientation of structures to take advantage of natural shade, or to take advantage of prevailing breezes.

Plot Plan

A. The proposed use is consistent with the Zoning Code, General Plan, the Subdivision Ordinance and the City of Wildomar Municipal Code.

The proposed use is consistent with the General Plan and the City of Wildomar Municipal Code. The Plot Plan 09-0280 would approve the development of four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. The proposed Project is subject to the development standards of the proposed General Commercial (C-1/C-P) and has been designed to comply with such development standards. The project proposes 3 parking spaces which meets the Zoning Code requirements. The project also complies with development standards including, but not limited to: setbacks, building height, lot coverage, and landscaping as described in the staff report.

B. The overall development of the land shall be designed for the protection of the public health, safety, and general welfare.

The proposed construction by Plot Plan 09-0280 consists of the development of four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. The design of the site, access, circulation, street improvements, and drainage improvements are configured to address the development of a industrial/commercial use. The proposed project is designed with consideration for the protection of the public health, safety, and general welfare of the City of Wildomar and surrounding area.

C. The overall development of the land shall be designed to conform to the logical development of the land and to be compatible with the present and future logical development of the surrounding property.

The proposed construction by Plot Plan 09-0280 consists of the development of four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is
8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. The proposed project site has a General Plan Land Use Designation of Light Industrial. The properties to the east have a General Plan Land Use Designation of Light Industrial. Additionally, properties in the north located in the City of Lake Elsinore have a General Plan Designation of Commercial with industrials to the north east of the subject site in the City of Lake Elsinore. The properties to the west and south have a General Plan Land Use Designation of Medium Density Residential. The development of the Boat and RV Storage facility in the proposed location is consistent with the present General Plan Land Use Designation (Light Industrial) of the area, and the General Commercial (C-1/C-P) Zoning. The project is also consistent with the future land use designation goals of the Wildomar General Plan for the area, which include further light industrial development along Corydon Street eastward to Mission Trail.

D. Plot Plan considers the location and need for dedication and improvement of necessary streets and sidewalks, including the avoidance of traffic congestion. Two points of access will be provided for the project site on Melinda Lane and Bryant Street, with primary access being provided from Bryant Street and secondary egress to Melinda Lane. Street improvements for Corydon Street, Bryant Street and Melinda Lane will also be required as part of the project. The project will be conditioned to improve Corydon Street, Bryant Street and Melinda Lane per the City of Wildomar Road Improvement Standards & Specifications. The proposed street system design for Corydon Street, Bryant Street and Melinda Lane, including the proposed curb and gutters, is consistent with all City standards. A trail system is not a part of this project.

E. The Plot Plan takes into consideration topographical and drainage conditions, including the need for dedication and improvements of necessary structures.

The construction of the Project has been conditioned to comply with all applicable City ordinances, codes, and standards including, but not limited to: the City’s Ordinances relating to Stormwater runoff management and other drainage controls. The project drainage design will capture storm runoff and pass it through a bioswale filtration feature before retaining it in a 12,000 cubic foot sub-surface detention basin incorporated into the project design. Excess runoff will be released back into the existing drainage pattern along Corydon Street and without causing substantial erosion or siltation, on- or offsite. The City’s ordinances, codes, and standards related to drainage have been created based on currently accepted standards and practices for the preservation of the public health, safety and welfare.

F. All plot plans which permit the construction of more than one structure on a single legally divided parcel shall, in addition to all other requirements, be subject to a condition which prohibits the sale of any existing or subsequently constructed structures on the parcel until the parcel is divided and a final map
recorded in accordance with Ordinance No. 460 in such a manner that each building is located on a separate legally divided parcel.

The proposed construction by Plot Plan 09-0280 consists of the development of four industrial buildings and a caretakers unit totaling 72,103 square feet. Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. Parcel Map 35963 would subdivide the existing parcels into four new (five total) parcels to accommodate for the development of the Boat and RV Storage facility on separate parcels. Conditions of approval will prohibit the sale of that or any subsequent future structures which may be constructed on the subject property prior to the approval of a subdivision of the subject property to ensure that each building is located on a separate, legally divided parcel.

ENVIRONMENTAL ASSESSMENT:

The Planning Department prepared and circulated an Initial Study for the Mitigated Negative Declaration for Planning Application 09-0280. Notice was published in The North County Times Californian Newspaper, and was mailed to all property owners within a 300 foot radius of the project site. A copy of the environmental review document was also circulated to potentially interested agencies and was available for public review at City Hall. The document was available for review from October 1, 2009 to October 20, 2009. No “Potentially Significant” impacts were identified in the Initial Study. However, there were impacts determined to be “Less than Significant” with mitigating factors and mitigation measures identified in the Initial Study. During the public review period, the City received oral comments concerning the proposed Mitigated Negative Declaration from The Engineer of Record for Skylark Field who inquired about the height of the project. The City also received oral comments from a resident who discussed a drainage course through the property from Bryant Street. Both parties provided comments that will be included in the conditions of approval for the project. As such, mitigation measures and monitoring have been incorporated into the proposed conditions of approval. The Initial Study and Mitigated Negative Declaration are contained in Attachment Exhibit G.

ATTACHMENT A
RESOLUTION NO. 09-____

WHEREAS, an application for a tentative parcel map and plot plan to allow for a Boat and RV Storage facility totaling 72,103 square feet on a 3.61 acre site located Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane has been filed by:

Applicant/Owner: Property Rehab Services, LLC
Authorized Agent: Markham Development Management Group, Inc.
Project Location: Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane
APN Number: 370-340-001

WHEREAS, the proposed Boat and RV Storage facility totaling 72,103 square feet is considered a “project” as defined by the California Environmental Quality Act, Public Resources Code § 21000 et seq. (“CEQA”);

WHEREAS, after completion of an Initial Study, the Planning Director determined that it identified potentially significant effects on the environment, but that revisions to the project or the incorporation of mitigation measures would avoid or lessen the effects below the threshold of significance. Therefore staff has proposed a Mitigated Negative Declaration for this project; and,

WHEREAS, on September 28, 2009, using a method permitted under CEQA Guidelines Section 15072(b), the City provided notice of its intent to adopt the proposed Mitigated Negative Declaration to the public, responsible agencies, trustee agencies, and the Riverside County Clerk;

WHEREAS, the City made the proposed Mitigated Negative Declaration available for public review beginning on October 1, 2009 and closing on October 20, 2009, a period of not less than 20 days. During the public review period, the City received oral comments concerning the proposed Mitigated Negative Declaration; and

WHEREAS, the Wildomar Planning Commission conducted a duly noticed public hearing on October 21, 2009 at which it received public testimony concerning the project and the proposed Mitigated Negative Declaration and considered the proposed Mitigated Negative Declaration.

NOW THEREFORE, the Planning Commission of the City of Wildomar does hereby resolve, determine and order as follows:

SECTION 1. ENVIRONMENTAL FINDINGS.
The Planning Commission, in light of the whole record before it including but not limited to the City’s local CEQA Guidelines and Thresholds of Significance, the proposed Mitigated Negative Declaration and documents incorporated therein by reference, any written comments received and responses provided, the proposed Mitigated Negative Declaration and other substantial evidence (within the meaning of Public Resources Code § 21080(e) and § 21082.2) within the record and/or provided at the public hearing, hereby finds and determines as follows:

A. Review Period: That the City has provided the public review period for the Mitigated Negative Declaration for the duration required under CEQA Guidelines Sections 15073 and 15105.

B. Compliance with Law: That the Mitigated Negative Declaration and Mitigation Monitoring Program were prepared, processed, and noticed in accordance with the California Environmental Quality Act (Public Resources Code Section 21000 et seq.), the CEQA Guidelines (14 California Code of Regulations Section 15000 et seq.) and the local CEQA Guidelines and Thresholds of Significance adopted by the City of Wildomar.

C. Independent Judgment: That the Mitigated Negative Declaration reflects the independent judgment and analysis of the City.

D. Mitigation Monitoring Program: That the Mitigation Monitoring Program is designed to ensure compliance during project implementation in that changes to the project and/or mitigation measures have been incorporated into the project and are fully enforceable through permit conditions, agreements or other measures as required by Public Resources Code Section 21081.6.

E. No Significant Effect: That revisions made to the project plans agreed to by the applicant and mitigation measures imposed as conditions of approval on the project, avoid or mitigate any potential significant effects on the environment identified in the Initial Study to a point below the threshold of significance. Furthermore, after taking into consideration the revisions to the project and the mitigation measures imposed, the Planning Commission finds that there is no substantial evidence, in light of the whole record, from which it could be fairly argued that the project may have a significant effect on the environment. Therefore, the Planning Commission concludes that the project will not have a significant effect on the environment.

SECTION 2. MULTIPLE SPECIES HABITAT CONSERVATION PLAN (MSHCP).

The project is found to be consistent with the MSHCP. The project is located outside of any MSHCP criteria area and mitigation is provided through payment of the MSHCP Mitigation Fee.

SECTION 3. PLANNING COMMISSION ACTIONS.

The Planning Commission hereby:

1. Adopts the Mitigated Negative Declaration and Mitigation Monitoring Program for the Eagle Eye Storage Project located Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane as shown in Exhibit A which is attached hereto and incorporated herein by reference.

2. The Mitigated Negative Declaration, Mitigation Monitoring Program, and all documents incorporated therein or forming the record of decision therefore, shall be filed with the Wildomar Planning Department at the Wildomar City Hall, 23873 Clinton Keith Rd., Suite 201, Wildomar, California 92595, and shall be made available for public review upon request.

ATTACHMENT B
RESOLUTION NO. 09-___

WHEREAS, an application for a tentative parcel map and plot plan to allow for a Boat and RV Storage facility totaling 72,103 square feet on a 3.61 acre site located Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane has been filed by:

Applicant/Owner: Property Rehab Services, LLC
Authorized Agent: Markham Development Management Group, Inc.
Project Location: Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane
APN Number: 370-340-001

WHEREAS, the Municipal Code allows the subdivision of a 3.61 acre site into five parcels and additional road dedication, subject to the approval of a Tentative Parcel Map; and

WHEREAS, on September 28, 2009, the City gave public notice by mailing to adjacent property owners and by placing an advertisement in a newspaper local circulation as required under Government Code Section 66451.3 of the holding of a public hearing at which the project would be considered; and

WHEREAS, in accordance with Government Code Section 66452.3, the City has provided the applicant with a copy of the Department of Development Services report and recommendation to the Planning Commission at least three (3) days prior to the below-referenced noticed public hearing; and

WHEREAS, October 21, 2009 the Planning Commission held the noticed public hearing at which interested persons had an opportunity to testify in support of, or opposition to, the Tentative Parcel Map and at which the Planning Commission considered the Tentative Parcel Map; and

WHEREAS, at this public hearing on October 21, 2009 the Planning Commission considered, heard public comments on and adopted a Mitigated Negative Declaration and Mitigation Monitoring Program for the project by Resolution (09-___).

NOW THEREFORE, the Planning Commission of the City of Wildomar does hereby find, determine and resolve as follows:

SECTION 1. ENVIRONMENTAL FINDINGS
The Planning Commission, in light of the whole record before it, including but not limited to, the City’s Local CEQA Guidelines and Thresholds of Significance, the recommendation of the Planning Director as provided in the Staff Report dated October 21, 2009 and documents incorporated therein by reference, and any other evidence (within the meaning of Public Resources Code § 21080(e) and § 21082.2) within the record or provided at the public hearing of this matter, hereby finds and determines as follows:

1. **CEQA**: The approval of this Parcel Map is in compliance with requirements of the California Environmental Quality Act (“CEQA”), in that on October 21, 2009 at a duly noticed public hearing, the Planning Commission recommended approval to the City Council adoption of a Mitigated Negative Declaration reflecting its independent judgment and analysis and documenting that there was no substantial evidence, in light of the whole record, from which it could be fairly argued that the project may have a significant effect on the environment. The documents comprising the City’s environmental review for the project are on file and available for public review at Wildomar City Hall, 23873 Clinton Keith Rd., Suite 201, Wildomar, CA 92595.

2. **Multiple Species Habitat Conservation Plan (MSHCP)**. The project is found to be consistent with the MSHCP. The project is located outside of any MSHCP criteria area and mitigation is provided through payment of the MSHCP Mitigation Fee.

**SECTION 2. MAP ACT FINDINGS.**

In accordance with Wildomar Municipal Code and Government Code § 66463, § 66473.1, § 66473.5 and § 66474, the Planning Commission, in light of the whole record before it, including but not limited to the Planning Department’s staff report and all documents incorporated by reference therein, the City’s General Plan, Subdivision Ordinance, Zoning Ordinance, standards for public streets and facilities, and the City’s standards for commercial projects and any other evidence within the record or provided at the public hearing of this matter, hereby finds and determines as follows:

A. Tentative Parcel Map 35963 is consistent and compatible with the objectives, policies, general land uses, and programs specified the City’s General Plan.

The General Plan land use designation for the site is LI (Light Industrial) typically results in project densities from 0.25 to 0.6 FAR. The proposed Map will result in the development of 4 industrial buildings and a caretakers unit with an overall FAR of 0.44. This density level does not exceed the range permitted under the General Plan land use designation for this site. One of the primary applicable policies stated in the Land Use Element of the General Plan is to accommodate the continuation of existing and development of new industrial, manufacturing, research and development, and professional offices in areas appropriately designated by General Plan and area plan land use maps. (Policy LU 24.1). The proposed parcel map will achieve this objective by accommodating new industrial uses to meet the needs of both regional and local residents. Considering all of these aspects, Parcel Map 35963 furthers the objectives and policies of the General Plan and is compatible with the general land uses specific in the General Plan.

B. The design and improvement of the subdivision proposed under Tentative Parcel Map 35963 is consistent with the City’s General Plan.

The proposed subdivision has been designed to meet City standards which provide satisfactory pedestrian and vehicular circulation, including emergency vehicle access and on site improvements, such as streets, utilities, and drainage facilities have been designed and are conditioned to be constructed in conformance with City standards.
C. The site is physically suitable for the type of development proposed under Tentative Parcel Map 35963.

The site is gently sloping north easterly, but grading of the site will create a relatively level site of approximately 3.17 acres. The site is not located within a flood plain and contains no major geologic hazards have been reported on the site or other limited conditions that would render it unsuitable for industrial development.

D. The site is physically suitable for the density of development proposed under Tentative Parcel Map 35963.

The site is has gentle slopes but proposed grading will create a relatively level site of approximately 3.61 acres with finished building pad elevations at several elevations from 1,279 to 1,274 feet above mean sea level. The subdivision has been designed to accommodate the development four industrial buildings and a caretakers unit, considering the shape and topography of the site. The project as proposed has a FAR of 0.44. According to the density ranges provided in the Land Use Element of the City’s General Plan for the LI land use designation and in the City’s Zoning Ordinance for the C-1/C-P zone, a FAR of 0.44 is appropriate for a site of this size and configuration.

E. The design of the subdivision and improvements proposed under Tentative Parcel Map 35963 is not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.

The site is currently vacant and does not contain any significant vegetation or habitat for wildlife. There is no evidence that any endangered, threatened or listed species of plant or animal, or its habitat, is located on the site. There is no evidence that vernal pool complex, similar bodies of water, or conditions suitable for forming such bodies of water exist on the site. This project has been conditioned to comply with the environmental policies and regulations of the City of Wildomar and those of all local and regional governmental agencies having jurisdiction over the site.

F. The design of the subdivision and improvements proposed under Tentative Parcel Map 35963 is not likely to cause serious public health problems.

The design of the subdivision is in conformance with the City’s General Plan, Zoning Ordinance, and Subdivision Ordinance, the construction of all improvements on the site has been conditioned to comply with all applicable City of Wildomar ordinances, codes, and standards including, but not limited to, the California Uniform Building Code, the City’s Ordinances relating to stormwater runoff management and controls. In addition, the design and construction of all improvements for the subdivision has been conditioned to be in conformance with adopted public works standards. The City’s ordinances, codes, and standards have been created based on currently accepted standards and practices for the preservation of the public health, safety and welfare. Finally, the proposed street system throughout the subdivision will improve emergency vehicular access in the immediate neighborhood.

G. The design of the subdivision and improvements proposed under Tentative Parcel Map 35963, will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision.
No easements of record or easements established by judgment of a court of competent jurisdiction for public access across the site have been disclosed in a search of the title records for the site and the City does not otherwise have any constructive or actual knowledge of any such easements.

H. The design of the subdivision proposed Tentative Parcel Map 35963, adequately provides for future passive or natural heating and cooling opportunities in the subdivision.

Taking into consideration local climate and the existing contour and configuration of the site and its surroundings, the size and configuration of parcels within the proposed subdivision have been arranged to permit orientation of structures to take advantage of natural shade, or to take advantage of prevailing breezes.

SECTION 3. PLANNING COMMISSION ACTION.

The Planning Commission hereby takes the following actions:

1. Conditionally approve Tentative Parcel Map 35963 to subdivide the 3.61 acre site into five parcels and provide for additional road dedication along Corydon Street, Bryant Street and Melinda Lane subject to the attached conditions of approval contained in Exhibit A which are attached hereto and incorporated herein by reference.

Planning Commission Secretary
I, David Hogan, Planning Commission Secretary of the City of Wildomar, California, do hereby certify that the foregoing Resolution No. PC09-____ was duly adopted at a regular meeting held on October 21, 2009, by the Planning Commission of the City of Wildomar, California, by the following vote:

AYES:

NOES:

ABSTAIN:

ABSENT:

David Hogan
Planning Commission Secretary
City of Wildomar
Within 48 Hours of the Approval of This Project

1. The applicant/developer shall deliver to the Planning Department a cashier's check or money order made payable to the County Clerk in the amount of Two Thousand Fifty Seven Dollars ($2,057.00) which includes the One Thousand Nine Hundred Ninety Three Dollars ($1,993.00) fee, required by Fish and Game Code Section 711.4(d)(3) plus the Sixty-Four Dollar ($64.00) County administrative fee, to enable the City to file the Notice of Determination for the Mitigated or Negative Declaration required under Public Resources Code Section 21152 and California Code of Regulations Section 15075 If within said 48-hour period the applicant/developer has not delivered to the Planning Department the check as required above, the approval for the project granted shall be void due to failure of condition [Fish and Game Code Section 711.4(c)].

2. The applicant shall review and sign the Acceptance of Conditions of Approval document that will be provided by the Planning Department staff and return the document with an original signature to the Planning Department.

General Requirements

3. The applicant shall indemnify, protect, defend, and hold harmless, the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, from any and all claims, demands, law suits, writs of mandamus, and other actions and proceedings (whether legal, equitable, declaratory, administrative or adjudicatory in nature), and alternative dispute resolutions procedures (including, but not limited to arbitrations, mediations, and other such procedures), (collectively "Actions"), brought against the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, that challenge, attack, or seek to modify, set aside, void, or annul, the any action of, or any permit or approval issued by, the City and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof (including actions approved by the voters of the City), for or concerning the project, whether such Actions are brought under the California Environmental Quality Act, the Planning and Zoning Law, the Subdivisions Map Act, Code of Civil Procedure Section 1085 or 1094.5, or any other state, federal, or local statute, law, ordinance, rule, regulation, or any decision of a court of competent jurisdiction. It is expressly agreed that the City shall have the right to approve,
which approval will not be unreasonably withheld, the legal counsel providing the City's defense, and that applicant shall reimburse City for any costs and expenses directly and necessarily incurred by the City in the course of the defense. City shall promptly notify the applicant of any Action brought and City shall cooperate with applicant in the defense of the Action.

4. This tentative subdivision shall comply with the provisions of State of California Subdivision Map Act and Title 16 – Subdivisions (Ordinance 460), unless modified by the conditions listed herein. This tentative subdivision shall expire in three (3) years unless an application for an extension is filed at least 30 days prior to the expiration date. The City, for good cause, may grant up to five (5) one-year extensions of time, one year at a time.

5. The developer shall obtain City approval for any modifications or revisions to the approval of this project. Deviations not identified on the plans may not be approved by the City, potentially resulting in the need for the project to be redesigned. Amended entitlement approvals may be necessary as a result.

6. If subdivision phasing is proposed, a phasing plan shall be submitted to and approved by the Director of Planning.

7. The project and all subsequent projects within this site shall comply with all mitigation measures identified in Environmental Assessment 09-0280.

8. The development of the premises shall substantially conform to the approved site plan and elevations contained on file with the Planning Department.

9. Blue retro reflective pavement markers shall be mounted on private street, public streets and driveways to indicate location of fire hydrants. Prior to installation, placement of markers must be approved by Riverside County Fire Department.

10. Minimum required fire flow shall be 3000 GPM for a 3 hour duration at 20 PSI residual operating pressure, which must be available before any combustible material is placed on the job site. Fire flow is based on type V-B construction per the 2007 CBC and Building(s) having a fire sprinkler system.

11. A combination of on-site and off-site super fire hydrants, on a looped system (6"x4"x 2-2 1/2"), will be located not less than 25 feet or more than 165 feet from any portion of the building as measured along approved vehicular travel ways. The required fire flow shall be available from any adjacent hydrants(s) in the system.

12. Any gate providing access from a road to a driveway shall be located at least 35 feet from the roadway and shall open to allow a vehicle to stop without obstructing traffic on the road. Where a one-way road with a single traffic lane provides access to a gate entrance, a 38 foot turning radius shall be used.

13. Gate(s) shall be automatically operated, minimum 20 feet in width, with a setback of 35 feet from face of curb/flow line. Gate access shall be equipped with a rapid entry system. Plans shall be submitted to the Fire Department for approval prior to installation. Automatic/manual gate pins shall be rated with shear pin force, not to exceed 30 foot pounds. Automatic gates shall be equipped with emergency backup power. Gates activated by the rapid entry system shall remain open until closed by the rapid entry system.
14. No grading shall be performed without the prior issuance of a grading permit by the City.

15. Written permission shall be obtained from the affected property owners allowing the proposed grading and/or facilities to be installed outside of the project boundaries.

16. The applicant’s contractor is required to submit for a haul route permit for the hauling of material to and from the project site. Said permit will include limitations of haul hours, number of loads per day and the posting of traffic control personnel at all approved entrances/exits onto public roads. This permit shall be in place prior to the issuance of the grading permit and the mobilization of equipment on the project site.

17. Provide drainage facilities and terracing in conformance with the Uniform Building Code’s chapter on “EXCAVATION & GRADING”.

18. The Applicant shall dedicate, design and construct all improvements in accordance the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, as further conditioned herein and to the satisfaction of the City Engineer.

19. The Applicant shall be responsible for all costs associated with off-site right-of-way acquisition, including any costs associated with the eminent domain process, if necessary.

20. Improvements such as grading, filling, over excavation and re-compaction, and base or paving which require a grading permit are subject to the included Building Department conditions of approval.

21. All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in the City of Wildomar. Prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building Department.

22. All necessary measures to control dust shall be implemented by the developer during grading to the satisfaction of the City Engineer. A PM10 plan may be required at the time a grading permit is issued.

23. Graded slopes shall be limited to a maximum steepness ratio of 2:1 (horizontal to vertical) unless otherwise approved by the City Engineer.

24. All paved off-street parking areas shall conform to Ordinance 457 base and paving design and inspection requirements.

25. All grading and drainage shall be designed in accordance with the included conditions of approval regarding this application.

26. Prior to the issuance of any building permit, the property owner shall obtain a grading permit and/or approval to construct from the Building Department.

27. The Applicant shall plant & irrigate all manufactured slopes steeper than a 4:1 (horizontal to vertical) ratio and 3 feet or greater in vertical height with grass or ground cover; slopes 15 feet or greater in vertical height shall be planted with additional shrubs or trees or as approved by the City Engineer.
28. Should this project lie within any assessment/benefit district, the project proponent shall, prior to acceptance of improvements, make application for and pay for their reapportionment of the assessments or pay the unit fees in the benefit district unless said fees are otherwise deferred.

Prior to Issuance of Grading Permit(s)

29. Prior to the issuance of a grading permit, it shall be the sole responsibility of the Applicant to obtain any and all easements and/or permissions necessary to perform the grading required for the project. A notarized letter of permission from all affected property owners or easement holders, or encroachment permit, is required for all off-site grading.

30. Prior to any grading, fill, or other earth-moving activities within the onsite ephemeral channel, the developer shall obtain all required regulatory permits or waivers from the U. S. Army Corps of Engineers, California Department of Fish and Game, and the Santa Ana Regional Water Quality Control Board.

31. Prior to issuance of any grading or construction permits - whichever comes first the applicant shall provide the City Engineer with evidence of compliance with the following: “Effective March 10, 2003 owner operators of grading or construction projects are required to comply with the N.P.D.E.S. (National Pollutant Discharge Elimination System) requirement to obtain a construction permit from the State Water Resource Control Board (SWRCB). The permit requirement applies to grading and construction sites of "ONE" acre or larger. The owner operator can comply by submitting a "Notice of Intent" (NOI), develop and implement a STORM WATER POLLUTION PREVENTION PLAN (SWPPP) and a monitoring program and reporting plan for the construction site. For additional information and to obtain a copy of the NPDES State Construction Permit contact the SWRCB at (916) 657-1146. Additionally, at the time the City of Wildomar adopts, as part of any ordinance, new regulations specific to the N.P.D.E.S., this project shall comply with them.

32. Erosion control - landscape plans, required for manufactured slopes greater than 3 feet in vertical height, are to be signed by a registered landscape architect and bonded per the requirements of Ordinance 457. Planting shall occur within 30 days of meeting final grades to minimize erosion and to ensure slope coverage prior to the rainy season.

33. This project grading plan involves import or export, prior to obtaining a grading permit. The Applicant shall have obtained approval for the import/export location from the City of Wildomar. Additionally, if either location was not previously approved by an Environmental Assessment, prior to issuing a grading permit, a Grading Environmental Assessment shall be submitted to the Planning Director for review and comment and to the City Engineer for approval.

34. Prior to the issuance of a grading permit, the applicant shall submit, and the City approve the Final Water Quality Management Plan which ensures that post-construction flows do not exceed pre-construction levels and that the specified BMPs will minimize any water quality impacts. These BMPs shall be consistent with the Final WQMP and installed to the satisfaction of the City Engineer.

35. Geotechnical soils reports, required in order to obtain a grading permit, shall be submitted to the City Engineer for review and approval prior to issuance of grading permit. All grading
shall be in conformance with the recommendations of the geotechnical/soils reports as approved by City of Wildomar.

36. Grading in excess of 199 cubic yards will require performance security to be posted with the City.

37. Prior to the approval of improvement plans, the developer shall submit to the City Engineer a traffic control plan for Corydon Street, Bryant Street and Melinda Lane to ensure the continued flow of traffic during construction.

Prior to Issuance of Building Permit(s)

38. Prior to Improvement Plan approval, a separate street light plan is required for this project. Street lighting shall be designed and installed in accordance with City of Wildomar Ordinance 460 and Streetlight Specification Chart found in Specification Section 22 of Ordinance 461. For projects within SCE boundaries use City of Wildomar Ordinance 461, Standard No's 1000 or 1001.

39. Proposed retaining walls will require separate permits. They shall be obtained prior to the issuance of any other building permits unless otherwise approved by the City Engineer. The walls shall be designed by a Registered Civil Engineer unless they conform to the City of Wildomar Standard Retaining Wall designs shown on the Building Department form 284-197.

40. Prior to the issuance of the first building permit, the Applicant shall execute a maintenance agreement for stormwater quality control treatment device to the satisfaction of the City Engineer.

41. Prior to the first Improvement Plan submittal, the Applicant shall show all easements per the title report to the satisfaction of Public Works. Any conflicts with existing easements shall result in the site being redesigned.

42. Prior to the issuance of the first building permit, the Applicant shall dedicate the southerly half section of Corydon Street, measured 64’ from the approved centerline. Improvements will be based on a 128’ Arterial Highway in accordance with the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer. All property conveyed to the City of Wildomar in fee title shall be free and clear of any encumbrances, except as expressly permitted by the City. The Applicant shall provide title insurance in conjunction with all fee title dedications to the City of Wildomar.

43. Prior to the issuance of the first building permit, the Applicant shall dedicate the westerly half - section of Melinda Lane plus 12’ of the easterly half-section, measured 30’ from the approved centerline for a total of 42’ of dedication. Improvements will be based on a 60’ local in accordance with the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer. All property conveyed to the City of Wildomar in fee title shall be free and clear of any encumbrances, except as expressly permitted by the City. The Applicant shall provide title insurance in conjunction with all fee title dedications to the City of Wildomar.

44. Prior to the issuance of the first building permit, the Applicant shall dedicate the easterly half - section of Bryant Street plus 12’ of the westerly half-section, measured 30’ from the approved centerline for a total of 42’ of dedication. Improvements will be based on a 60’ local in accordance with the City of Wildomar Improvement Standards and to the satisfaction of the
City Engineer. All property conveyed to the City of Wildomar in fee title shall be free and clear of any encumbrances, except as expressly permitted by the City. The Applicant shall provide title insurance in conjunction with all fee title dedications to the City of Wildomar.

45. Prior to the issuance of a building permit, the Applicant shall design and improve Corydon Street, Melinda Lane and Bryant Street per the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines and to the satisfaction of the City Engineer. Improvements may require off-site transitions to adequately facilitate the movement of traffic. The Applicant shall acquire all required off-site transitions.

46. The Applicant shall dedicate, design and improve the intersection of Corydon Street / Bryant Street and Corydon Street / Melinda Lane in accordance with the City of Wildomar Improvement Plan Check Policies and Standards and to the satisfaction of The City Engineer.

47. The Applicant shall dedicate a public utility easement adjacent to all public or private streets for overhead and/or underground facilities and appurtenances to the satisfaction of the City Engineer.

48. The Applicant shall design and install electrical power, telephone, communication, and cable television lines to be placed underground, including existing overhead lines, 33.6 kilovolts or below along the project frontage and between the nearest poles offsite in each direction of the project site, in accordance the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, City Ordinances, and to the satisfaction of the City Engineer. The Applicant shall submit to the City Engineer, for verification purposes, written proof for initiating the design and/or application of the relocation issued by the utility company.

49. The Applicant shall design and install streetlights in accordance with the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, City Ordinances and to the satisfaction of the City Engineer.

50. Prior to the issuance of a building permit, the developer shall annex into all applicable County Service Areas and Landscaping Maintenance District for landscaping, lighting, drainage and maintenance to the satisfaction of the City Engineer or otherwise form a District where one is not currently in place.

51. The Applicant shall design and install street lighting in accordance with the appropriate City Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines and to the satisfaction of the City Engineer.

52. All corner cutbacks shall be applied per Standard 805, Ordinance 461, except for corners at Entry streets intersecting with General Plan roads, they shall be applied per Exhibit 'C' of the Citywide Design Guidelines.

53. All median islands shall be either landscaped or decorative concrete/hardscaped to the satisfaction of The City Engineer.

54. Prior to the issuance of a building permit, the Applicant shall demonstrate compliance with the California Title 24.
55. Prior to the issuance of the first building permit improvement plans shall be approved by the City Engineer and improvements constructed or secured by the Applicant.

56. The Applicant shall submit landscaping and irrigation plans within the public right-of-way to the Planning Department. These plans shall include water usage calculations, estimate of irrigation and the location of all existing trees that will remain. All plans and calculations shall be designed and calculated per the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, City Codes and to the satisfaction of the City Engineer.

57. The applicant or developer shall separately submit two copies of the water system plans to the Fire Department for review and approval. Calculated velocities shall not exceed 10 feet per second. Plans shall conform to the fire hydrant types, location and spacing, and the system shall meet the fire flow requirements. Plans shall be signed and approved by a registered civil engineer and the local water company with the following certification: "I certify that the design of the water system is in accordance with the requirements prescribed by the Riverside County Fire Department."

58. The Applicant shall obtain the appropriate clearance letters to the satisfaction of the City Engineer for any sign(s) located within an easement, including a Public Utility Easement.

59. The Applicant shall dedicate visibility easements for all driveways per the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer.

60. The Applicant shall dedicate a public utility easement adjacent to all public or private streets for overhead and/or underground facilities and appurtenances to the satisfaction of the City Engineer.

61. At all street intersections adjacent to the project, public or private, the Applicant shall install and/or replace street name signs in accordance with the City of Wildomar Standard Details.

62. Prior to the issuance of a building permit, the developer shall annex into all applicable County Service Areas and Landscaping Maintenance District for landscaping, lighting, drainage and maintenance to the satisfaction of the City Engineer or otherwise form a District where one is not currently in place.

63. All flood control plans to be reviewed shall be submitted though the City of Wildomar, unless otherwise directed by the City Engineer.

64. The Applicant shall prepare and submit a comprehensive drainage study and plan that includes, but is not limited to: definition with mapping of the existing watersheds; a detailed pre- and post-project hydrologic and hydraulic analysis of the project and project impacts; definition of the local controlling 100-year frequency water levels existing and with project; the proposed method of flow conveyance to mitigate the potential project impacts with adequate supporting calculations; any proposed improvements to mitigate the impacts of increased runoff from the project and any change in runoff; including quality, quantity, volume, and duration in accordance with City of Wildomar’s Hydrology Manual, Improvement Standards, and to the satisfaction of the City Engineer.

65. Prior to the issuance of a building permit, the developer shall pay the appropriate impact mitigation fee to the Riverside County Flood Control and Water Conservation District.
66. Building Plan check deposit base fee of $1,056.00, shall be paid in a check or money order to the Riverside County Fire Department after plans have been approved by our office.

67. Prior to the issuance of building permit, the Applicant shall pay all necessary impact and mitigation fees required. These fees include, but are not limited to, fees associated with Transportation Uniform Mitigation Fee (TUMF), Quimby (parkland in-lieu) Fee, and Development Impact Fees.

Prior to Release of Power, Building Occupancy, or Any Use Allowed by This Permit

For this section, the terms final inspection, release of power, and building occupancy are used interchangeably to signify compliance with all conditions of approval, applicable codes and requirements necessary for the safe and lawful occupation or use of a structure or site.

68. Prior to release of occupancy, the Applicant shall demonstrate that all development impact and mitigation fees have been paid.

69. Prior to release of occupancy, the Applicant shall pay all necessary impact and mitigation fees required. These fees include, but are not limited to, fees associated with the Transportation Uniform Mitigation Fee (TUMF), Quimby (parkland in-lieu) Fee, and Development Impact Fees.

70. The applicant shall prepare and submit to the Fire Department for approval, a site plan designating required fire lanes with appropriate lane painting and/or signs.

71. Install a complete fire sprinkler system per NFPA 13 2002 edition (13D and 13R system are not allowed) in all buildings requiring a fire flow of 1500 GPM or greater sprinkler system(s) with pipe size in excess of 4” inch diameter will require the project structural engineer to certify (wet signature) the stability of the building system for seismic and gravity loads to support the sprinkler system. All fire sprinkler risers shall be protected from any physical damage. The post indicator valve and fire department connection shall be located to the front, within 50 feet of a hydrant, and the minimum of 25 feet from the building(s). A statement that the building(s) will be automatically fire sprinkled must be included on the title page of the building plans. (Current sprinkler plan check deposit base fee is $164.00 per riser).

72. Applicant or developer shall be responsible to install a U.L. Central Station Monitored Fire Alarm System. Monitoring System shall monitor the fire Sprinkler system(s) water flow, P.I.V.’s and all control valves. Plans must be submitted to the Fire Department for approval prior to installation. Contact Fire Department for guideline handout (current monitoring plan check deposit base fee is $192.00).

73. Applicant or developer shall be responsible to install a manual and automatic Fire Alarm System. Plans must be submitted to the Fire Department for approval prior to installation. (Current plan check deposit base fee $627.00).

74. Install portable fire extinguishers with a minimum rating of 2A-10BC and signage. Fire Extinguishers located in public areas shall be in recessed cabinets mounted 48” (Inches) to enter above the floor level with Maximum 4” projection from the wall. Contact Fire Department for proper placement of equipment prior to installation.
75. The off-site rights-of-way required for said improvement road shall be accepted to vest title in the name of the public if not already accepted for Corydon Street, Melinda Lane and Bryant Street as conditioned and to the satisfaction of the City Engineer.

76. Prior to final inspection, electrical power, telephone, communication, and cable television lines shall be placed underground in accordance with Title 16 – Subdivisions (formerly Ordinance 460) and Ordinance 461, or as approved by the Transportation Department. This also applies to existing overhead lines which are 33.6 kilovolts or below along the project frontage and between the nearest poles offsite in each direction of the project site. A certificate should be obtained from the pertinent utility company and submitted to the Engineering Department as proof of completion.

77. Prior to final inspection, install streetlights along the streets associated with development in accordance with the approved street lighting plan and standards of Title 16 – Subdivisions (formerly Ordinance 460) and Ordinance 461.

78. Prior to final inspection, install streetlights along the streets associated with development in accordance with the approved street lighting plan and Ordinance 460 and 461.

79. Prior to the final inspection, all outdoor lighting shall be inspected by the Building and Safety Department to insure compliance with the approved lighting plan and the provisions of Chapter 8.80 of the Wildomar Municipal Code.

80. The flood control facilities shall be constructed with this project in accordance with applicable standards. The City Engineer shall determine if the facility will be maintained by Flood Control District or the City of Wildomar. The Applicant shall execute a maintenance agreement with the appropriate agency and the City Engineer shall determine if an easement or a parcel is taken in fee title. The plans cannot be signed prior to execution of the agreement.

Prior to Recordation of the Final Map

81. A copy of the final map shall be submitted to and approved by the Planning Director and the City Engineer prior to scheduling the Final Map for approval by the City Council.

82. Prior to recordation of the final map, the Planning Department shall determine if the deposit based fees for the project are in a negative balance, and receive the appropriate payment for any negative balance as well as any anticipated additional project-related expenses.

83. The Applicant or Developer shall furnish one copy of the water system plans to the Fire Department for review. Plans shall be signed by a registered civil engineer, containing a Fire Department approval signature block, and shall conform to hydrant type, location, spacing and minimum fire flow. Once plans are signed by the local water company, the originals shall be presented to the Fire Department for signature.

84. A copy of the Environmental Constraint Sheet (ECS) shall approved by the Planning Department with the following notes:

a. This property is located within 25 miles of Mount Palomar Observatory. All proposed outdoor lighting systems shall comply with the California Institute of Technology, Palomar Observatory recommendations, Ordinance No. 655.
85. Environmental Constraint Sheet (ECS) must be stamped by the Riverside County Surveyor with the following note: The required water system, including fire hydrants, shall be installed and accepted by the appropriate water agency prior to any combustible building material placed on an individual lot.

86. Prior to recordation of the final map, the improvement plans for the required public improvements must be prepared and shall be based upon a design profile extending a minimum of 300 feet beyond the project boundaries at a grade and alignment as approved by the City Engineer.

87. The Applicant shall show all easements on the final map to the satisfaction of the City Engineer.

88. Prior to recordation of the final map, or any phase thereof, the project proponent shall pay fees in accordance with Zone A of the Southwest Road and Bridge Benefit District.

89. Prior to the recordation of the final map or issuance of the first building permit, the Applicant shall design and improve Corydon Street per the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines and to the satisfaction of the City Engineer. Interim striping will be determined at Improvement Plan submittal. Improvements shall be constructed across the project frontage and along Bryant Street and Melinda Lane and shall include all required transitions on both ends of the project, including removing, replacing and adding signage and striping off site.

90. Electrical power, telephone, communication, street lighting, and cable television lines shall be designed and placed underground in accordance with ordinance 460 and 461, or as otherwise approved by the City Engineer. The applicant is responsible for coordinating the work with the serving utility company. This also applies to existing overhead lines which are 33.6 kilovolts or less along the project frontage and between the nearest poles offsite in each direction of the project site. A disposition note describing the above shall be reflected on design improvement plans whenever those plans are required. A written proof for initiating the design and/or application of the relocation issued by the utility company shall be submitted to the City Engineer for verification purposes.

91. Prior to the recordation of the Final Map, the CC&Rs shall be reviewed for compliance by the City and shall be finalized and recorded.

92. Prior to the recordation of the Final Map, a copy of the condominium plan shall be submitted to the City to confirm all pertinent information associated with these conditions are included.

93. Inspection and maintenance of the flood control facilities to be constructed with this tentative map must be performed by either the County Transportation Department or the Flood Control District. The engineer (owner) must request in writing that one of these agencies accept the proposed system. The request shall note the project number, location, briefly describe the system (sizes and lengths) and include an exhibit that shows the proposed alignment. The request to the District shall be addressed to the General Manager-Chief Engineer, Attn: Chief of the Planning Division. If the District is willing to maintain the proposed facility three items must be accomplished prior to recordation of the final map or starting construction of the drainage facility: 1) the developer shall submit to the District the preliminary title reports, plats and legal descriptions for all right of way to be conveyed to the District and secure that right of way to the satisfaction of the District; 2) an agreement with the District and any
maintenance partners must be executed which establishes the terms and conditions of inspection, operation and maintenance; and 3) plans for the facility must be signed by the District's General Manager-Chief Engineer. The plans cannot be signed prior to execution of the agreement. An application to draw up an agreement must be submitted to the attention of the District's Administrative Services Section. All right of way transfer issues must be coordinated with the District's Right of Way Section. The engineer/developer will need to submit proof of flood control facility bonds and a certificate of insurance to the District's Inspection section before a pre-construction meeting can be scheduled.

94. Prior to the recordation of the final map, the developer shall annex into County Service Area, or a similar mechanism, for graffiti abatement and street sweeping through the City Engineer.

95. Prior to recordation of the final map, water and sewer system plans and specifications shall approved by the Elsinore Valley Municipal Water District and the Department of Environmental Health (if required).

96. All flood control plans to be reviewed shall be submitted though the City of Wildomar, unless otherwise directed by the City Engineer.

97. Prior to the recordation of the final map, a copy of the Covenants, Conditions, and Restrictions (CC&Rs) shall be submitted and approved by the Planning Director. The CC&Rs shall include liability insurance and methods of maintaining landscaping, parking areas, private roads, exterior of all buildings (if applicable), and all landscaped and open areas including parkways, as well as a provisions indicating that the homeowners association may not be terminated or dissolved with the permission of the City.

98. The CC&Rs shall be in the form and content approved by the Planning Director, City Engineer, and the City Attorney and shall include such provisions as are required by this approval and as said officials deem necessary to protect the interests of the City and its residents.

99. The CC&Rs shall be prepared at the developer's sole cost and expense.

100. The CC&Rs shall provide for the effective establishment, operation, management, use, repair and maintenance of all common areas, drainage and facilities.

101. The CC&Rs shall provide that all property shall be maintained so as not to create a public nuisance.

102. An Article must be added to every set of CC&Rs to read as follows:

   “Article _____

   CONSENT OF CITY OF WILDOMAR

   1. The Conditions of Approval of Tentative Parcel Map Number 32257 requires the City to review and approve the CC&Rs for the Parcel.

   2. Declarant acknowledges that the City has reviewed these CC&Rs and that its review is limited to a determination of whether the proposed CC&Rs properly implement the requirements of the Conditions of Approval for the Parcel. The
City's consent to these CC&Rs does not contain or imply any approval of the appropriateness or legality of the other provisions of the CC&Rs, including, without limitation, the use restrictions, private easements and encroachments, private maintenance requirements, architecture and landscape controls, assessment procedures, assessment enforcement, resolution of disputes or procedural matters.

3. In the event of a conflict between the Conditions of Approval of the land use entitlements issued by the City for the Parcel or Federal, State, or local laws, ordinances, and regulations and these CC&Rs, the provisions of the Conditions of Approval and Federal, State or local laws, ordinances, and regulations shall prevail, notwithstanding the language of the CC&Rs.

4. These CC&Rs shall not be terminated, amended or otherwise modified without the express written consent of the Planning Director of the City of Wildomar.

103. An Article must be added to every set of CC&Rs, following the Declarant's signature, to read as follows:

   “Article ____

   CONSENT OF CITY OF WILDOMAR

   The Conditions of Approval for Tentative Parcel Map No. 35963 require the City of Wildomar to review and approve the CC&Rs for the Parcel. The City's review of these CC&Rs has been limited to a determination of whether the proposed CC&Rs properly implement the requirements of the Conditions of Approval for the Parcel. The City's consent to these CC&Rs does not contain or imply any approval of the appropriateness or legality of the other provisions of the CC&Rs, including, without limitation, the use restrictions, private easements and encroachments, private maintenance requirements, architecture and landscape controls, assessments, enforcement of assessments, resolutions of disputes or procedural matters. Subject to the limitations set forth herein, the City consents to the CC&Rs.

   ______________________   ______________________
   Director of Planning    City Attorney

104. One copy of the final recorded CC&Rs shall be provided to the Planning Department.

105. All of the foregoing conditions shall be complied with prior to recordation of the final map.
ATTACHMENT C
RESOLUTION NO. 09-____

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF WILDOMAR APPROVING PLOT PLAN 09-0280 TO ALLOW FOR THE DEVELOPMENT OF FOUR BUILDINGS TOTALING 72,103 SQUARE FEET ON A 3.61-ACRE SITE LOCATED SOUTHERLY OF CORYDON STREET, EASTERLY OF BRYANT STREET AND WESTERLY OF MELINDA LANE INTO FIVE PARCELS AND PROVIDE FOR ADDITIONAL ROAD DEDICATION ALONG CORYDON STREET, BRYANT STREET AND MELINDA LANE, KNOWN AS ASSESSOR’S PARCEL NO. 370-340-001

WHEREAS, an application for a tentative parcel map and plot plan to allow for a Boat and RV Storage facility totaling 72,103 square feet on a 3.61 acre site located Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane has been filed by:

Applicant/Owner: Property Rehab Services, LLC

Authorized Agent: Markham Development Management Group, Inc.

Project Location: Southerly of Corydon Street, Easterly of Bryant Street and Westerly of Melinda Lane

APN Number: 370-340-001

WHEREAS, the Planning Commission has the authority per Chapter 17.216.010 of the Wildomar Municipal Code to review and make recommendations to the City Council on Plot Plan 09-0280; and

WHEREAS, on September 28, 2009, the City gave public notice by mailing to adjacent property owners and by placing an advertisement in a newspaper local circulation of the holding of a public hearing at which the project would be considered; and

WHEREAS, on October 21, 2009 the Planning Commission held the noticed public hearing at which interested persons had an opportunity to testify in support of, or opposition to, the Plot Plan 09-0280 and at which the Planning Commission considered the Plot Plan 09-0280; and

WHEREAS, at this public hearing on October 21, 2009 the Planning Commission considered, heard public comments on, and adopted a Mitigated Negative Declaration and Mitigation Monitoring Program for the project by Resolution No. PC09-____

NOW THEREFORE, the Planning Commission of the City of Wildomar does Resolve, Determine, Find and Order as follows:

SECTION 1. ENVIRONMENTAL FINDINGS

The Planning Commission, in light of the whole record before it, including but not limited to, the City’s Local CEQA Guidelines and Thresholds of Significance, the recommendation of the Planning Director as provided in the Staff Report dated October 21, 2009 and documents incorporated therein by reference, and any other evidence (within the meaning of Public Resources Code § 21080(e) and § 21082.2) within the record or provided at the public hearing of this matter, hereby finds and
determines as follows:

1. **CEQA:** The approval of this Plot Plan is in compliance with requirements of the California Environmental Quality Act (“CEQA”), in that on October 21, 2009 at a duly noticed public hearing, the Planning Commission recommended approval to the City Council adoption of a Mitigated Negative Declaration reflecting its independent judgment and analysis and documenting that there was not substantial evidence, in light of the whole record, from which it could be fairly argued that the project may have a significant effect on the environment. The documents comprising the City’s environmental review for the project are on file and available for public review at Wildomar City Hall, 23873 Clinton Keith Rd., Suite 201, Wildomar, CA 92595.

2. **Multiple Species Habitat Conservation Plan (MSHCP).** The project is found to be consistent with the MSHCP. The project is located outside of any MSHCP criteria area and mitigation is provided through payment of the MSHCP Mitigation Fee.

SECTION 2. PLOT PLAN FINDINGS.

Pursuant to Wildomar Municipal Code Chapter 17.216.040 and in light of the record before it including the staff report dated October 21, 2009 and all evidence and testimony heard at the public hearing of this item, the Planning Commission hereby finds as follows:

A. The proposed use is consistent with the Zoning Code, General Plan, the Subdivision Ordinance and the City of Wildomar Municipal Code.

The proposed use is consistent with the General Plan and the City of Wildomar Municipal Code. The Plot Plan 09-0280 would approve the development of four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. The proposed Project is subject to the development standards of the proposed General Commercial (C-1/C-P) and has been designed to comply with such development standards. The project proposes 3 parking spaces which meets the Zoning Code requirements. The project also complies with development standards including, but not limited to: setbacks, building height, lot coverage, and landscaping as described in the staff report.

B. The overall development of the land shall be designed for the protection of the public health, safety, and general welfare.

The proposed construction by Plot Plan 09-0280 consists of the development of four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. The design of the site, access, circulation, street improvements, and drainage improvements are configured to address the development of a industrial/commercial use. The proposed project is designed with consideration for the protection of the public health, safety, and general welfare of the City of Wildomar and surrounding area.

C. The overall development of the land shall be designed to conform to the logical development of the land and to be compatible with the present and future logical development of the surrounding property.

The proposed construction by Plot Plan 09-0280 consists of the development of four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Eagle Eye Storage 09-0280 38
Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. The proposed project site has a General Plan Land Use Designation of Light Industrial. The properties to the east have a General Plan Land Use Designation of Light Industrial. Additionally, properties in the north located in the City of Lake Elsinore have a General Plan Designation of Commercial with industrials to the north east of the subject site in the City of Lake Elsinore. The properties to the west and south have a General Plan Land Use Designation of Medium Density Residential. The development of the Boat and RV Storage facility in the proposed location is consistent with the present General Plan Land Use Designation (Light Industrial) of the area, and the General Commercial (C-1/C-P) Zoning. The project is also consistent with the future land use designation goals of the Wildomar General Plan for the area, which include further light industrial development along Corydon Street eastward to Mission Trail.

D. Plot Plan considers the location and need for dedication and improvement of necessary streets and sidewalks, including the avoidance of traffic congestion.

Two points of access will be provided for the project site on Melinda Lane and Bryant Street, with primary access being provided from Bryant Street and secondary egress to Melinda Lane. Street improvements for Corydon Street, Bryant Street and Melinda Lane will also be required as part of the project. The project will be conditioned to improve Corydon Street, Bryant Street and Melinda Lane per the City of Wildomar Road Improvement Standards & Specifications. The proposed street system design for Corydon Street, Bryant Street and Melinda Lane, including the proposed curb and gutters, is consistent with all City standards. A trail system is not a part of this project.

E. The Plot Plan takes into consideration topographical and drainage conditions, including the need for dedication and improvements of necessary structures.

The construction of the Project has been conditioned to comply with all applicable City ordinances, codes, and standards including, but not limited to: the City’s Ordinances relating to Stormwater runoff management and other drainage controls. The project drainage design will capture storm runoff and pass it through a bioswale filtration feature before retaining it in a 12,000 cubic foot subsurface detention basin incorporated into the project design. Excess runoff will be released back into the existing drainage pattern along Corydon Street and without causing substantial erosion or siltation, on- or offsite. The City’s ordinances, codes, and standards related to drainage have been created based on currently accepted standards and practices for the preservation of the public health, safety and welfare.

F. All plot plans which permit the construction of more than one structure on a single legally divided parcel shall, in addition to all other requirements, be subject to a condition which prohibits the sale of any existing or subsequently constructed structures on the parcel until the parcel is divided and a final map recorded in accordance with Ordinance No. 460 in such a manner that each building is located on a separate legally divided parcel.

The proposed construction by Plot Plan 09-0280 consists of the development four industrial buildings and a caretakers unit totaling 72,103 square feet Building A is 27,550 square feet and Building B(a) is 8,727 square feet, Building B(b) is 8,706 and Building C is 25,200 square feet on a 3.11 net (3.61 gross) acre site. Parcel Map 35963 would subdivide the existing parcels into four new (five total) parcels to accommodate for the development of the Boat and RV Storage facility on separate parcels. Conditions of approval will prohibit the sale of that or any subsequent future structures which may be constructed on the subject property prior to the approval of a subdivision of the subject property to ensure that each building is located on a separate, legally divided parcel.
SECTION 3. PLANNING COMMISSION ACTION.

The Planning Commission hereby takes the following actions:

1. Conditionally approve Plot Plan 09-0280 to allow for the construction of 4 industrial commercial buildings comprising the Boat and RV Storage facility totaling 72,103 square feet on a 3.61 acre site located southerly of Corydon Street, easterly of Bryant Street and westerly of Melinda Lane subject to the conditions of approval contained in Exhibit A which are attached hereto and incorporated herein by reference.

Robert Devine
Chairman

APPROVED AS TO FORM:

Thomas Jex
Assistant City Attorney

ATTEST:

David Hogan
Planning Commission Secretary
I, David Hogan, Planning Commission Secretary of the City of Wildomar, California, do hereby certify that the foregoing Resolution No. PC09-____ was duly adopted at a regular meeting held on October 21, 2009, by the Planning Commission of the City of Wildomar, California, by the following vote:

Within 48 Hours of the Approval of This Project

1. The applicant/developer shall deliver to the Planning Department a cashier's check or money order made payable to the County Clerk in the amount of Two Thousand Fifty Seven Dollars ($2,057.00) which includes the One Thousand Nine Hundred Ninety Three Dollars ($1,993.00) fee, required by Fish and Game Code Section 711.4(d)(3) plus the Sixty-Four Dollar ($64.00) County administrative fee, to enable the City to file the Notice of Determination for the Mitigated or Negative Declaration required under Public Resources Code Section 21152 and California Code of Regulations Section 15075 If within said 48-hour period the applicant/developer has not delivered to the Planning Department the check as required above, the approval for the project granted shall be void due to failure of condition [Fish and Game Code Section 711.4(c)].

2. The applicant shall review and sign the Acceptance of Conditions of Approval document that will be provided by the Planning Department staff and return the document with an original signature to the Planning Department.

General Requirements

3. The applicant shall indemnify, protect, defend, and hold harmless, the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, from any and all claims, demands, law suits, writs of mandamus, and other actions and proceedings (whether legal, equitable, declaratory, administrative or adjudicatory in nature), and alternative dispute resolutions procedures (including, but not limited to arbitrations, mediations, and other such procedures), (collectively "Actions"), brought against the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, that challenge, attack, or seek to modify, set aside, void, or annul, the any action of, or any permit or approval issued by, the City and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof (including actions approved by the voters of the City), for or concerning the project, whether such Actions are brought under the California Environmental Quality Act, the Planning and Zoning Law, the Subdivisions Map Act, Code of Civil Procedure Section 1085 or 1094.5, or any other state, federal, or local statute, law, ordinance, rule, regulation, or any decision of a court of
competent jurisdiction. It is expressly agreed that the City shall have the right to approve, which approval will not be unreasonably withheld, the legal counsel providing the City's defense, and that applicant shall reimburse City for any costs and expenses directly and necessarily incurred by the City in the course of the defense. City shall promptly notify the applicant of any Action brought and City shall cooperate with applicant in the defense of the Action.

4. The approval of the zone change and plot plan shall comply with the provisions of Title 17 – Zoning (Ordinance 348), unless modified by the conditions listed herein. This approval shall expire in two (2) years unless an application for an extension is filed at least 30 days prior to the expiration date. The City, for good cause, may grant up to two (2) one-year extensions of time, one year at a time.

5. The project and all subsequent projects within this site shall comply with all mitigation measures identified in Environmental Assessment 09-0280.

6. The project shall substantially conform to the approved site plan and elevations for the Zone Change and Plot Plan Application 09-0280 and contained on file with the Planning Department.

7. The developer shall obtain City approval for any modifications or revisions to the approval of this project. Deviations not identified on the plans may not be approved by the City, potentially resulting in the need for the project to be redesigned. Amended entitlement approvals may be necessary as a result.

8. The Conditions of Approval specified in this resolution, to the extent specific items, materials, equipment, techniques, finishes or similar matters are specified, shall be deemed satisfied by staff's prior approval of the use or utilization of an item, material, equipment, finish or technique that City staff determines to be the substantial equivalent of that required by the Conditions of Approval. Staff may elect to reject the request to substitute, in which case the real party in interest may appeal, after payment of the regular cost of an appeal, the decision to the Planning Commission for its decision.

9. The Applicant shall submit to the Planning Department for the permanent files 8" X 10" glossy photographic color prints of the approved color and materials board and the colored architectural elevations. All labels on the color and materials board and Elevations shall be readable on the photographic prints.
10. Landscaping installed for the project shall be continuously maintained to the satisfaction of the Planning Director. If it is determined that the landscaping is not being maintained, the Planning Director shall have the authority to require the property owner to bring the landscaping into conformance with the approved landscape plan. The continued maintenance of all landscaped areas shall be the responsibility of the developer or any successors in interest.

11. If construction is phased, a construction staging area plan or phasing plan for construction equipment and trash shall be approved by the Planning Director and City Engineer.

12. The Applicant shall design and construct American with Disabilities Act (ADA) access from the public right of way to the main building entrance and van accessible parking in accordance with all appropriate City of Wildomar Standards and Codes, and ADA requirements and to the satisfaction of the City Engineer.

13. Any building signage is subject to the approval of a sign permit. The applicant shall submit a comprehensive signage package for the commercial retail center.

14. Tribal monitors from the Pechanga Tribe shall be allowed to monitor all grading, excavation and groundbreaking activities, including all archaeological surveys, testing, and studies, to be compensated by the developer.

15. If human remains are encountered, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the Riverside County Coroner has made the necessary findings as to origin. Further, pursuant to Public Resource Code Section 5097.98(b) remains shall be left in place and free from disturbance until a final decision as to the treatment and disposition has been made. If the Riverside County Coroner determines the remains to be Native American, the Native American Heritage Commission shall be contacted within a reasonable timeframe. Subsequently, the Native American Heritage Commission shall identify the "most likely descendant." The most likely descendant shall then make recommendations and engage in consultation concerning the treatment of the remains as provided in Public Resources Code Section 5097.98.

16. If cultural resources are discovered during the project construction (inadvertent discoveries), all work in the area of the find shall cease, and a qualified archaeologist and representatives of the Pechanga Tribe shall be retained by the project sponsor to investigate the find, and make recommendations as to treatment and mitigation.

17. If during ground disturbance activities unique cultural resources are discovered, that were not assessed by the archaeological report(s) and/or environmental assessment conducted prior to project approval, the following procedures shall be followed. Unique cultural resources are defined, for this condition, as being multiple artifacts in close association with each other, but may include fewer artifacts if the area of the find is determined to be of significance due to its sacred or cultural importance. (1) All ground disturbance activities within 100 feet of the discovered cultural resources shall be halted until a meeting is convened between the developer, the archaeologist, the Native American tribal representative and the Planning Director to discuss the significance of the find. (2) At the meeting, the significance of the discoveries shall be discussed and after consultation with the Native American tribal representative and the archaeologist, a decision shall be made, with the concurrence of the Planning Director, as to the appropriate mitigation (documentation, recovery, avoidance, etc.) for the cultural resources. (3) Grading of further ground disturbance shall not resume within...
the area of the discovery until an agreement has been reached by all parties as to the appropriate mitigation.

18. The landowner agrees to relinquish ownership of all cultural resources, including all archaeological artifacts that are found on the project area, to the Pechanga Tribe for proper treatment and disposition.

19. All driveway surfaces shall be paved with asphalt.

20. Blue retro reflective pavement markers shall be mounted on private street, public streets and driveways to indicate location of fire hydrants. Prior to installation, placement of markers must be approved by Riverside County Fire Department.

21. Minimum required fire flow shall be 3000 GPM for a 3 hour duration at 20 PSI residual operating pressure, which must be available before any combustible material is placed on the job site. Fire flow is based on type V-B construction per the 2007 CBC and Building(s) having a fire sprinkler system.

22. A combination of on-site and off-site super fire hydrants, on a looped system (6"x4"x 2-2 1/2"), will be located not less than 25 feet or more than 165 feet from any portion of the building as measured along approved vehicular travel ways. The required fire flow shall be available from any adjacent hydrant(s) in the system.

23. Any gate providing access from a road to a driveway shall be located at least 35 feet from the roadway and shall open to allow a vehicle to stop without obstructing traffic on the road. Where a one-way road with a single traffic lane provides access to a gate entrance, a 38 foot turning radius shall be used.

24. Gate(s) shall be automatically operated, minimum 20 feet in width, with a setback of 35 feet from face of curb/flow line. Gate access shall be equipped with a rapid entry system. Plans shall be submitted to the Fire Department for approval prior to installation. Automatic/manual gate pins shall be rated with shear pin force, not to exceed 30 foot pounds. Automatic gates shall be equipped with emergency backup power. Gates activated by the rapid entry system shall remain open until closed by the rapid entry system.

25. No grading shall be performed without the prior issuance of a grading permit by the City.

26. Written permission shall be obtained from the affected property owners allowing the proposed grading and/or facilities to be installed outside of the project boundaries.

27. The applicant’s contractor is required to submit for a haul route permit for the hauling of material to and from the project site. Said permit will include limitations of haul hours, number of loads per day and the posting of traffic control personnel at all approved entrances/exits onto public roads. This permit shall be in place prior to the issuance of the grading permit and the mobilization of equipment on the project site.

28. Provide drainage facilities and terracing in conformance with the Uniform Building Code’s chapter on "EXCAVATION & GRADING".

29. All building construction and design components shall comply with the provisions of the most recent City-adopted edition of the California Building, Plumbing and Mechanical Codes,
California Electrical Code, California Administrative Code, and all appropriate City of Wildomar Standards and Codes.

30. The Applicant shall design and construct American with Disabilities Act (ADA) access from the public right of way to the main building entrance and van accessible parking in accordance with all appropriate City of Wildomar Standards and Codes, and ADA requirements and to the satisfaction of the City Engineer and Building Official.

31. The Applicant shall dedicate, design and construct all improvements in accordance the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, as further conditioned herein and to the satisfaction of the City Engineer.

32. The Applicant shall be responsible for all costs associated with off-site right-of-way acquisition, including any costs associated with the eminent domain process, if necessary.

33. Improvements such as grading, filling, over excavation and re-compaction, and base or paving which require a grading permit are subject to the included Building Department conditions of approval.

34. All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in the City of Wildomar. Prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building Department.

35. All necessary measures to control dust shall be implemented by the developer during grading to the satisfaction of the City Engineer. A PM10 plan may be required at the time a grading permit is issued.

36. Graded slopes shall be limited to a maximum steepness ratio of 2:1 (horizontal to vertical) unless otherwise approved by the City Engineer.

37. All paved off-street parking areas shall conform to Ordinance 457 base and paving design and inspection requirements.

38. All grading and drainage shall be designed in accordance with the included conditions of approval regarding this application.

39. Prior to the issuance of any building permit, the property owner shall obtain a grading permit and/or approval to construct from the Building Department.

40. Should this project lie within any assessment/benefit district, the project proponent shall, prior to acceptance of improvements, make application for and pay for their reapportionment of the assessments or pay the unit fees in the benefit district unless said fees are otherwise deferred.

Prior to the issuance of Grading Permits

41. The following requirements shall be included in the Notes Section of the Grading Plan: "No grubbing/clearing of the site shall occur prior to scheduling the pre-grading meeting with Engineering. All project sites containing suitable habitat for burrowing owls, whether owls
were found or not, require a 30-day preconstruction survey that shall be conducted within 30 days prior to ground disturbance to avoid direct take of burrowing owls. If the results of the survey indicate that no burrowing owls are present on-site, then the project may move forward with grading, upon Planning Department approval. If burrowing owls are found to be present or nesting on-site during the preconstruction survey, then the following recommendations must be adhered to: Exclusion and relocation activities may not occur during the breeding season, which is defined as March 1 through August 31, with the following exception: From March 1 through March 15 and from August 1 through August 31 exclusion and relocation activities may take place if it is proven to the City and appropriate regulatory agencies (if any) that egg laying or chick rearing is not taking place. This determination must be made by a qualified biologist.

42. The following requirement shall be included in the Notes Section of the Grading Plan: "If at any time during excavation/construction of the site, paleontological/archaeological/cultural resources, or any artifacts or other objects which reasonably appears to be evidence of paleontological, cultural or archaeological resource are discovered, the property owner shall immediately advise the City of such and the City shall cause all further excavation or other disturbance of the affected area to immediately cease. The Planning Director at his/her sole discretion may require the property owner to deposit a sum of money it deems reasonably necessary to allow the City to consult and/or authorize an independent, fully qualified specialist to inspect the site at no cost to the City, in order to assess the significance of the find. Upon determining that the discovery is not an paleontological/archaeological/cultural resource, the Planning Director shall notify the property owner of such determination and shall authorize the resumption of work. Upon determining that the discovery is an paleontological/archaeological/cultural resource, the Planning Director shall notify the property owner that no further excavation or development may take place until a mitigation plan or other corrective measures have been approved by the Planning Director."

43. Prior to the issuance of a grading permit, it shall be the sole responsibility of the Applicant to obtain any and all easements and/or permissions necessary to perform the grading required for the project. A notarized letter of permission from all affected property owners or easement holders, or encroachment permit, is required for all off-site grading.

44. Prior to any grading, fill, or other earth-moving activities within the onsite ephemeral channel, the developer shall obtain all required regulatory permits or waivers from the U. S. Army Corps of Engineers, California Department of Fish and Game, and the Santa Ana Regional Water Quality Control Board.

45. Prior to issuance of any grading or construction permits - whichever comes first the applicant shall provide the City Engineer with evidence of compliance with the following: "Effective March 10, 2003 owner operators of grading or construction projects are required to comply with the N.P.D.E.S. (National Pollutant Discharge Elimination System) requirement to obtain a construction permit from the State Water Resource Control Board (SWRCB). The permit requirement applies to grading and construction sites of "ONE" acre or larger. The owner operator can comply by submitting a "Notice of Intent" (NOI), develop and implement a STORM WATER POLLUTION PREVENTION PLAN (SWPPP) and a monitoring program and reporting plan for the construction site. For additional information and to obtain a copy of the NPDES State Construction Permit contact the SWRCB at (916) 657-1146. Additionally, at the time the City of Wildomar adopts, as part of any ordinance, new regulations specific to the N.P.D.E.S., this project shall comply with them.
46. Erosion control - landscape plans, required for manufactured slopes greater than 3 feet in vertical height, are to be signed by a registered landscape architect and bonded per the requirements of Ordinance 457 (refer to dept. form 284-47). Planting shall occur within 30 days of meeting final grades to minimize erosion and to ensure slope coverage prior to the rainy season.

47. This project grading plan involves import or export, prior to obtaining a grading permit. The Applicant shall have obtained approval for the import/export location from the City of Wildomar. Additionally, if either location was not previously approved by an Environmental Assessment, prior to issuing a grading permit, a Grading Environmental Assessment shall be submitted to the Planning Director for review and comment and to the City Engineer for approval.

48. Prior to the issuance of a grading permit, the applicant shall submit, and the City approve the Final Water Quality Management Plan which ensures that post-construction flows do not exceed pre-construction levels and that the specified BMPs will minimize any water quality impacts. These BMPs shall be consistent with the Final WQMP and installed to the satisfaction of the City Engineer.

49. Geotechnical soils reports, required in order to obtain a grading permit, shall be submitted to the City Engineer for review and approval prior to issuance of grading permit. All grading shall be in conformance with the recommendations of the geotechnical/soils reports as approved by City of Wildomar.

50. Grading in excess of 199 cubic yards will require performance security to be posted with the City.

51. Prior to the approval of improvement plans, the developer shall submit to the City Engineer a traffic control plan along Clinton Keith Road and Stable Lanes Road to ensure the continued flow of traffic during construction.

Prior to Issuance of Building Permit(s)

52. Prior to the issuance of a building permit, the developer shall submit a photometric plan, including the parking lot to the Planning Department, which meets the requirements of the Title 17 of the Wildomar Municipal Code and Chapter 8.80 (Light Pollution). The parking lot light standards shall be placed in such a way as to not adversely impact the growth potential of the parking lot trees.

53. Prior to the approval of improvement plans, the developer shall submit to the City Engineer a traffic control plan for the project frontages to ensure the continued flow of traffic during construction.

54. Prior to Improvement Plan approval, a separate street light plan is required for this project. Street lighting shall be designed and installed in accordance with City of Wildomar Ordinance 460 and Streetlight Specification Chart found in Specification Section 22 of Ordinance 461. For projects within SCE boundaries use City of Wildomar Ordinance 461, Standard No's 1000 or 1001.
55. Prior to the issuance of the first building permit, the Applicant shall quit claim the ‘Easement in favor of South Elsinore Mutual Water Company, a Corporation recorded February 6, 1962 as instrument number 11582 O.R.’.

56. Improvement plans shall be approved by The City Engineer prior to issuance of the 1st building permit.

57. Proposed retaining walls will require separate permits. They shall be obtained prior to the issuance of any other building permits unless otherwise approved by the City Engineer. The walls shall be designed by a Registered Civil Engineer unless they conform to the City of Wildomar Standard Retaining Wall designs shown on the Building Department form 284-197.

58. Prior to the issuance of the first building permit, the Applicant shall execute a maintenance agreement for stormwater quality control treatment device to the satisfaction of the City Engineer.

59. Prior to the first Improvement Plan submittal, the Applicant shall show all easements per the title report to the satisfaction of Public Works. Any conflicts with existing easements shall result in the site being redesigned.

60. Prior to the issuance of the first building permit, the Applicant shall dedicate the southerly half section of Corydon Street, measured, 64’ from the approved centerline. Improvements will be based on a 128’ Arterial Highway in accordance with the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer. All property conveyed to the City of Wildomar in fee title shall be free and clear of any encumbrances, except as expressly permitted by the City. The Applicant shall provide title insurance in conjunction with all fee title dedications to the City of Wildomar.

61. Prior to the issuance of the first building permit, the Applicant shall dedicate the westerly half-section of Melinda Lane plus 12’ of the easterly half-section, measured 30’ from the approved centerline for a total of 42’ of dedication. Improvements will be based on a 60’ local in accordance with the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer. All property conveyed to the City of Wildomar in fee title shall be free and clear of any encumbrances, except as expressly permitted by the City. The Applicant shall provide title insurance in conjunction with all fee title dedications to the City of Wildomar.

62. Prior to the issuance of the first building permit, the Applicant shall dedicate the easterly half-section of Bryant Street plus 12’ of the westerly half-section, measured 30’ from the approved centerline for a total of 42’ of dedication. Improvements will be based on a 60’ local in accordance with the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer. All property conveyed to the City of Wildomar in fee title shall be free and clear of any encumbrances, except as expressly permitted by the City. The Applicant shall provide title insurance in conjunction with all fee title dedications to the City of Wildomar.

63. Prior to the issuance of a building permit, the Applicant shall design and improve Corydon Street, Melinda Lane and Bryant Street per the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines and to the satisfaction of the City Engineer. Improvements may require off-site transitions to adequately facilitate the movement of traffic. The Applicant shall acquire all required off-site transitions.
64. The Applicant shall dedicate, design and improve the intersection of Corydon Street / Bryant Street and Corydon Street / Melinda Lane in accordance with the City of Wildomar Improvement Plan Check Policies and Standards and to the satisfaction of The City Engineer.

65. The Applicant shall dedicate a public utility easement adjacent to all public or private streets for overhead and/or underground facilities and appurtenances to the satisfaction of the City Engineer.

66. The Applicant shall design and install electrical power, telephone, communication, and cable television lines to be placed underground, including existing overhead lines, 33.6 kilovolts or below along the project frontage and between the nearest poles offsite in each direction of the project site, in accordance the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, City Ordinances, and to the satisfaction of the City Engineer. The Applicant shall submit to the City Engineer, for verification purposes, written proof for initiating the design and/or application of the relocation issued by the utility company.

67. The Applicant shall design and install streetlights in accordance with the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, City Ordinances and to the satisfaction of the City Engineer.

68. Prior to the issuance of a building permit, the developer shall annex into all applicable County Service Areas and Landscaping Maintenance District for landscaping, lighting, drainage and maintenance to the satisfaction of the City Engineer or otherwise form a District where one is not currently in place.

69. The Applicant shall design and install street lighting in accordance with the appropriate City Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines and to the satisfaction of the City Engineer.

70. All corner cutbacks shall be applied per Standard 805, Ordinance 461, except for corners at Entry streets intersecting with General Plan roads, they shall be applied per Exhibit ‘C’ of the Citywide Design Guidelines.

71. All median islands shall be either landscaped or decorative concrete/hardscaped to the satisfaction of The City Engineer.

72. Prior to the issuance of a building permit, the Applicant shall demonstrate compliance with the California Title 24.

73. Prior to the issuance of the first building permit improvement plans shall be approved by the City Engineer and improvements constructed or secured by the Applicant.

74. The Applicant shall submit landscaping and irrigation plans within the public right-of-way to the Planning Department. These plans shall include water usage calculations, estimate of irrigation and the location of all existing trees that will remain. All plans and calculations shall be designed and calculated per the City of Wildomar Road Improvement Standards & Specification, Improvement Plan Check Policies and Guidelines, City Codes and to the satisfaction of the City Engineer.
75. The applicant or developer shall separately submit two copies of the water system plans to the Fire Department for review and approval. Calculated velocities shall not exceed 10 feet per second. Plans shall conform to the fire hydrant types, location and spacing, and the system shall meet the fire flow requirements. Plans shall be signed and approved by a registered civil engineer and the local water company with the following certification: "I certify that the design of the water system is in accordance with the requirements prescribed by the Riverside County Fire Department."

76. The Applicant shall obtain the appropriate clearance letters to the satisfaction of the City Engineer for any sign(s) located within an easement, including a Public Utility Easement.

77. The Applicant shall dedicate visibility easements for all driveways per the City of Wildomar Improvement Standards and to the satisfaction of the City Engineer.

78. The Applicant shall dedicate a public utility easement adjacent to all public or private streets for overhead and/or underground facilities and appurtenances to the satisfaction of the City Engineer.

79. At all street intersections adjacent to the project, public or private, the Applicant shall install and/or replace street name signs in accordance with the City of Wildomar Standard Details.

80. Prior to the issuance of a building permit, the developer shall annex into all applicable County Service Areas and Landscaping Maintenance District for landscaping, lighting, drainage and maintenance to the satisfaction of the City Engineer or otherwise form a District where one is not currently in place.

81. All flood control plans to be reviewed shall be submitted through the City of Wildomar, unless otherwise directed by the City Engineer.

82. The Applicant shall prepare and submit a comprehensive drainage study and plan that includes, but is not limited to: definition with mapping of the existing watersheds; a detailed pre- and post-project hydrologic and hydraulic analysis of the project and project impacts; definition of the local controlling 100-year frequency water levels existing and with project; the proposed method of flow conveyance to mitigate the potential project impacts with adequate supporting calculations; any proposed improvements to mitigate the impacts of increased runoff from the project and any change in runoff; including quality, quantity, volume, and duration in accordance with City of Wildomar’s Hydrology Manual, Improvement Standards, and to the satisfaction of the City Engineer.

83. Prior to the issuance of a building permit, the developer shall pay the appropriate impact mitigation fee to the Riverside County Flood Control and Water Conservation District.

84. Prior to the issuance of a building permit, the project proponent shall pay fees in accordance with Zone A of the Southwest Road and Bridge Benefit District. The developer shall pay the appropriate fee for Zone A of the Southwest Road and Bridge Benefit District.

85. Building Plan check deposit base fee of $1,056.00, shall be paid in a check or money order to the Riverside County Fire Department after plans have been approved by our office.
86. Prior to the issuance of a building permit, the Applicant shall pay all necessary impact and mitigation fees required. These fees include, but are not limited to, fees associated with Transportation Uniform Mitigation Fee (TUMF), Quimby (parkland in-lieu) Fee, and Development Impact Fees.

87. Prior to the issuance of a building permit, the improvement plans for the required public improvements must be prepared and shall be based upon a design profile extending a minimum of 300 feet beyond the project boundaries at a grade and alignment as approved by the City Engineer.

88. The RV septic dump shall be designed and improved to drain onto itself and shall be covered such that there is no rain water on the septic dump area. The septic dump will require a permit from Environmental Health.

89. The trash enclosure area shall be covered such that there is no rain water on the trash enclosure area.

90. The water from the RV wash shall be designed and improved to flow to the sewer system.

91. All entrance gates shall be located such that a RV can pull onto the site without blocking public right-of-way and shall be designed and improved to the satisfaction of the City Engineer.

Prior to Release of Power, Building Occupancy, or Any Use Allowed by This Permit

For this section, the terms final inspection, release of power, and building occupancy are used interchangeably to signify compliance with all conditions of approval, applicable codes and requirements necessary for the safe and lawful occupation or use of a structure or site.

92. Prior to release of occupancy, the Applicant shall demonstrate that all development impact and mitigation fees have been paid.

93. Prior to release of occupancy, the Applicant shall pay all necessary impact and mitigation fees required. These fees include, but are not limited to, fees associated with the Transportation Uniform Mitigation Fee (TUMF), Quimby (parkland in-lieu) Fee, and Development Impact Fees.

94. The off-site rights-of-way required for said improvement road shall be accepted to vest title in the name of the public if not already accepted for Corydon Street, Melinda Lane and Bryant Street as conditioned and to the satisfaction of the City Engineer.

95. The applicant shall prepare and submit to the Fire Department for approval, a site plan designating required fire lanes with appropriate lane painting and/or signs.

96. Install a complete fire sprinkler system per NFPA 13 2002 edition (13D and 13R system are not allowed) in all buildings requiring a fire flow of 1500 GPM or greater sprinkler system (s) with pipe size in excess of 4" inch diameter will require the project structural engineer to certify (wet signature) the stability of the building system for seismic and gravity loads to support the sprinkler system. All fire sprinkler risers shall be protected from any physical damage. The post indicator valve and fire department connection shall be located to the front, within 50 feet of a hydrant, and the minimum of 25 feet from the building (s).
97. Applicant or developer shall be responsible to install a U.L. Central Station Monitored Fire Alarm System. Monitoring System shall monitor the fire Sprinkler system(s) water flow, P.I.V.'s and all control valves. Plans must be submitted to the Fire Department for approval prior to installation. Contact Fire Department for guideline handout (current monitoring plan check deposit base fee is $192.00).

98. Applicant or developer shall be responsible to install a manual and automatic Fire Alarm System. Plans must be submitted to the Fire Department for approval prior to installation. (Current plan check deposit base fee $627.00).

99. Install portable fire extinguishers with a minimum rating of 2A-10BC and signage. Fire Extinguishers located in public areas shall be in recessed cabinets mounted 48" (Inches) to enter above the floor level with Maximum 4" projection from the wall. Contact Fire Department for proper placement of equipment prior to installation.

100. Electrical power, telephone, communication, street lighting, and cable television lines shall be designed and placed underground in accordance with ordinance 460 and 461, or as otherwise approved by the City Engineer. The applicant is responsible for coordinating the work with the serving utility company. This also applies to existing overhead lines which are 33.6 kilovolts or less along the project frontage and between the nearest poles offsite in each direction of the project site. A disposition note describing the above shall be reflected on design improvement plans whenever those plans are required. A written proof for initiating the design and/or application of the relocation issued by the utility company shall be submitted to the City Engineer for verification purposes.

101. Prior to final inspection, install streetlights along the streets associated with development in accordance with the approved street lighting plan and Ordinance 460 and 461.

102. Prior to the final inspection, all outdoor lighting shall be inspected by the Building and Safety Department to insure compliance with the approved lighting plan and the provisions of Chapter 8.08 of the Wildomar Municipal Code.

103. Each parking space reserved for the handicapped shall be identified by a permanently affixed reflectorized sign constructed of porcelain on steel, beaded text or equal, displaying the International Symbol of Accessibility. The sign shall not be smaller than 70 square inches in area and shall be centered at the interior end of the parking space at a minimum height of 80 inches from the bottom of the sign to the parking space finished grade, or centered at a minimum height of 36 inches from the parking space finished grade, ground, or sidewalk. A sign shall also be posted in a conspicuous place, at each entrance to the off-street parking facility, not less than 17 inches by 22 inches, clearly and conspicuously stating the following:

"Unauthorized vehicles parked in designated accessible spaces not displaying distinguishing placards or license plates issued for persons with disabilities may be towed away at owner's expense. Towed vehicles may be reclaimed by telephoning (951) 245-3300"
In addition to the above requirements, the surface of each parking place shall have a surface identification sign duplicating the Symbol of Accessibility in blue paint of at least three square feet in size.

104. The flood control facilities shall be constructed with this project in accordance with applicable standards. The City Engineer shall determine if the facility will be maintained by Flood Control District or the City of Wildomar. The Applicant shall execute a maintenance agreement with the appropriate agency and the City Engineer shall determine if an easement or a parcel is taken in fee title. The plans cannot be signed prior to execution of the agreement.

I. INTRODUCTION

A. PURPOSE

This document is an Initial Study for evaluation of environmental impacts resulting from the implementation of a proposed RV and boat storage facility on a 3.61-acre site located southerly of Corydon Road, westerly of Melinda Lane, and easterly of Bryant Street in the City of Wildomar, County of Riverside, California. For purposes of this document, the applications being evaluated through the environmental process will be called the “proposed project.” A more detailed description of the project is found in Section II.

B. TECHNICAL STUDIES

The following technical studies referenced in this Initial Study are listed below. The technical studies are available on the City of Wildomar website (www.cityofwildomar.org) and at City Hall located at 23873 Clinton Keith Road, Suite 201, Wildomar, CA 92595.

- “Phase I Cultural Resources Assessment,” prepared by Jean A. Keller, Ph.D., Cultural Resources Consultant, July 2006.
II. PROJECT DESCRIPTION

A. PROJECT LOCATION AND SETTING

The Eagle Eye RV and Boat Storage Project (No. 09-0280) is bounded on the northeast by Melinda Lane; on the northwest by Corydon Road; on the southwest by Bryant Street; and on the southeast by residential properties. The location of the project is shown on the Regional Vicinity Map contained in Figure 1 and the Project Location Map contained in Figure 2. The Assessor’s Parcel Number for the project site is 370-340-001.

The proposed project site is located in the western portion of the City, roughly 1.2 miles west of Interstate 15. The project site is currently vacant and dominated by common and non-native annual grass and weed species. It also appears to have been partially graded in the past. The site is relatively flat with an approximate elevation difference of 11 feet across the site. Elevations range from 1280 feet above mean sea level at the southwestern corner of the project site to 1269 feet above mean sea level at the northeastern corner of the project site. The latitude and longitude location for the site is Latitude 033°37’29” and Longitude 117°17’51”. Surrounding land uses include vacant and agricultural land to the northeast; single-family homes to the southeast and southwest; and industrial and single-family homes to the northwest. Currently, Bryant Street and Melinda Lane are undedicated and unimproved dirt roads.

Upon Incorporation on July 1, 2008, the City adopted the County of Riverside’s General Plan and Zoning Ordinances. The City of Wildomar General Plan Land Use Designation for the project site is Light Industrial (LI). While the General Plan Land Use Designation for the property immediately adjacent to the project site on the northeast is Light Industrial, the properties to the southeast and southwest are designated Medium Density Residential (MDR). The properties northwest of the project site, across Corydon Street, are located in the City of Lake Elsinore and designated General Commercial in the East Lake Specific Plan. The project site is currently zoned General Commercial (C-1/C-P). The zoning for the adjacent properties is Rural Residential (R-R). The proposed project, a RV and boat storage facility, is consistent with both the zoning and General Plan land use designations.

Water, sewer, electric, gas, cable and telecommunication services for the proposed project would be extended onto the site from existing main lines. Water and sewer services would be provided by Elsinore Valley Municipal Water District. Gas would be provided by the Southern California Gas Company; electricity would be provided by Southern California Edison; cable and telecommunication services would be provided by Time Warner Cable or Verizon. The site is located within the boundaries of the Lake Elsinore Unified School District. Fire and police services are provided by the City of Wildomar through contracts with the Riverside County Fire Department and the Riverside County Sheriff’s Department.
FIGURE 1 – REGIONAL VICINITY MAP
B. PROJECT DESCRIPTION

The applicant is applying for a parcel map, and a plot plan to allow for construction and operation of an RV and boat storage facility. The site plan described in this Initial Study is conceptual and may vary slightly when the design of the site plan is finalized. Any variations between the conceptual design and the final design will be evaluated by the Lead Agency to determine if the project is consistent with the conceptual project or if additional environmental review is required. The project components are described below.

Tentative Parcel Map 35963

The proposed project would include a schedule E subdivision of a 3.61-gross-acre parcel into five (5) commercial parcels (see Figure 3).

Plot Plan 09-0280 (PP22811)

The proposed project consists of the construction of four buildings which would provide 70,183 square feet of storage for recreational vehicles, boats, or other personal items on a 3.61-acre site (see Figure 4). Building A would be 27,550 square feet. Building B would consist of two sections, the first B(a), would be 8,727 square feet, and the other B(b) would be 8,706 square feet. Building C would be 25,200 square feet. Each building would be approximately 19 feet in height, with electric rollup doors. The buildings would be constructed of steel and the exterior would contain stucco walls painted in warm earth tone colors. A total of 99 condo units would be available for rental. The proposed project also includes a 1,920-square foot, two-story office and caretaker’s residence (25 feet in height), an RV wash and sewage dump area, and three (3) parking stalls.

As seen from Corydon Street, the project would have stucco walls with various heights created by evenly spaced parapets. Additional finishes to the façade include foam/stucco trim details and wrought iron trellises with climbing vines of Ivy. The project also includes landscaped areas which slope away from the building wall towards the edge of the sidewalk along Corydon Street. Along Melinda Lane the project would include a 6 foot high split face CMU wall, landscaping and a metal sliding gate for secondary emergency access. The project would “front” Bryant Street with primary access gained from Bryant Street near the southwestern corner of the site. A trash enclosure, loading area, and RV sewage dump site would all be concealed from Bryant Street by a 6 foot high split face CMU wall and landscaped areas behind the sidewalk. Along the southern side of the project, similar to Corydon Street, the project would have stucco walls with various heights created by parapets with finishes to the façade include foam/stucco trim details and wrought iron trellises and climbing vines of Ivy. The project buildings would also be setback 15 feet from the southern property line creating a planting area where vegetation would screen and create a buffer between the project and the adjacent single family homes.

The project site will be primarily accessed from Bryant Street, with secondary access provided via Melinda Lane. Corydon Street would be improved with 30 feet of additional paving and curb gutter and sidewalk improvements. Additionally, the project would pay an in-lieu fee for a future median to be installed on Corydon Street. A 30 foot dedication and full street improvements from midline of the street, plus 12 feet of paving (west of midline) would be provided to Bryant Street. Similarly, a 30 foot dedication and full street improvements from midline of the street, plus 10 feet of paving
(east of midline) would be provided to Melinda Lane.

Initial estimates for the proposed project indicate that grading activities would result in 4,569 cubic yards of cut volume and 8,403 cubic yards for fill. Approximately, 3,834 cubic yards of fill would be imported to the site during the future grading activities. The origin of the fill material is not known at the current time.

Construction is anticipated to begin in the spring of 2010 and last 8 months.

GENERAL NOTES

1. LEGAL DESCRIPTION
Parcels 1 & 2 of Parcel Map No. 578 as recorded in Book 40, Page 12, Recorder of Riverside County, California.

2. TOTAL ACREAGE: 4.87 acres

3. NUMBER OF PARKING SPACES: 0

4. NUMBER OF LOTS: 10

5. EXISTING ZONING: C-1

6. PROPOSED ZONING: RESIDENTIAL

7. EXISTING Land USE: CIVIL ENGINEERING:

8. PROPOSED LAND USE: RESIDENTIAL

9. METHOD OF STORM DISPOSAL
NE TO EXISTING DRAIN

10. WETLANDS:
No wetlands were found.

11. SCHOOL DISTRICT:
Lake Elsinore Unified School District

12. ASSESSORS PARCEL NO:
370-240-00

13. EASEMENT NOTES:
This property is not subject to any easement or access agreements.

14. SITE PLAN PREPARED:
February 4, 2010

15. UNIFORM BUILDING CODE:
City of Lake Elsinore Code

16. NOTE:
1. All proposed drainage facilities shall be designed to accommodate 100 year storm flows.
2. All "+" are approximate.
3. The property lies within flood zone "A" as determined by Flood Zone 2010.
4. The property is not within a specific flood zone.
5. This property is not within a special stresses zone.
6. The location of all known existing wells, septic tanks, or underground structures on or adjacent to property are shown.

17. THIS SITE IS NOT SUBJECT TO EQUATION OR OTHER GEOLOGICAL HAZARD.

EASEMENT NOTES:
1. Water rights, claim of title to water, whether or not shown by the public records.

2. Easement in favor of developer for utility

3. Easement in favor of developer for telephone company.

4. Easement in favor of developer for electric company.

5. Easement in favor of developer for gas company.

7. Easement in favor of developer for irrigation district.

8. Easement in favor of developer for sewer district.

9. Easement in favor of developer for water district.

10. Easement in favor of developer for sanitary district.

11. Easement in favor of developer for electric light and power company.

12. Easement in favor of developer for gas company.

13. Easement in favor of developer for water company.

14. Easement in favor of developer for sewer district.

15. Easement in favor of developer for sanitary district.

17. Easement in favor of developer for telegraph company.

18. Easement in favor of developer for telephone company.

19. Easement in favor of developer for electric company.

20. Easement in favor of developer for gas company.

21. Easement in favor of developer for water company.

22. Easement in favor of developer for sewer district.

23. Easement in favor of developer for sanitary district.

24. Easement in favor of developer for irrigation district.
III. ENVIRONMENTAL CHECKLIST

A. BACKGROUND

1. Project Title:
   Eagle Eye RV and Boat Storage (09-0280)

2. Lead Agency Name and Address:
   City of Wildomar; 23873 Clinton Keith Road, Suite 201, Wildomar, CA 92595

3. Contact Person and Phone Number:
   Sean del Solar; (951) 677-7751

4. Project Location:
   A 3.61-acre site located southerly of Corydon Street, westerly of Melinda Lane, and easterly of Bryant Street in the City of Wildomar; Assessors Parcel Number is 370-340-001

5. Project Sponsor’s Name and Address:
   Markham Development Management Group, Inc., 41635 Enterprise Circle North, Suite B, Temecula, CA 92590

6. General Plan Designation:
   Light Industrial (LI)

7. Zoning:
   General Commercial (C-1/C-P)

8. Description of Project:
   The proposed project consists of the construction of four buildings which would provide 70,183 square feet of enclosed storage for recreational vehicles, boats, or other personal items on a 3.61-acre site. The proposed project also includes a 1,920-square foot, two-story office and caretaker building, a RV wash and dump area, three (3) parking stalls, stucco/concrete walls, and roadway improvements.

9. Surrounding Land Uses and Setting:
   East – Zoning: Rural Residential; Land Use: Agricultural
   South - Zoning: Rural Residential; Land Use: Residential
West – Zoning: Rural Residential; Land Use: Residential

North - Zoning: Specific Plan (Lake Elsinore); Land Use: Residential

10. Other Public Agencies Whose Approval is Required:

None.

B. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project involving at least one impact that is a “Potentially Significant Impact,” as indicated by the checklist on the following pages. Potentially significant impacts that are mitigated to “Less Than Significant” impact are not shown here.

C. DETERMINATION

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because of the incorporated mitigation measures and revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a “potentially significant impact” or “potentially significant unless mitigated” impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

</tbody>
</table>

DISCUSSION

a) Have a substantial adverse effect on a scenic vista?

Less Than Significant Impact

The proposed project is located in the western portion of the city in a relatively flat area not easily visible or distinguishable from other areas of the city. The project would mostly be visible from the immediate surrounding area and from Corydon Street, Bryant Street and Melinda Lane. The storage buildings would be 19 feet in height and with stucco exterior walls painted in warm earth tone colors with landscape providing additional screening. The office and caretaker residence would be 25 feet in height and the tallest feature of the project. Any project-level visual impacts will be addressed through the City’s plot plan application process which will ensure compliance with City zoning and design standards regulating building design, mass, bulk, height, colors, etc. As a result, any scenic impacts are considered less than significant and no additional mitigation measures are required.

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State Scenic Highway?

No Impact

Corydon Street, Bryant Street, and Melinda Lane have not been designated as scenic roadways.
Interstate 15 is considered an eligible state scenic highway. However, the proposed project site is located roughly 1.2 miles west of Interstate 15 and would not affect any scenic resources. The project site does not contain nor would it substantially damage scenic resources, including, but not limited to: trees, rock outcroppings, or historic buildings. Because the proposed project would not substantially damage any scenic resources, no significant impacts are anticipated and no mitigation measures are required.

c) **Substantially degrade the existing visual character or quality of the site and its surroundings?**

*Less Than Significant Impact*

The proposed project consists of four buildings which would provide 70,183 square feet of enclosed storage; a 1,920-square foot, two-story office and caretaker residence; an RV wash and sewage dump area; three (3) parking stalls; a stucco wall; and a concrete block wall. The existing visual character of the area is a combination of single-family homes; vacant land; agricultural uses; industrial uses; and Skylark Field Airport. The project site is currently vacant and has been partially graded in the past. Non-native grassland is scattered throughout the site. The grassland is dominated by common and non-native annual grass and weed species. While the development of the proposed project would alter the visual appearance of the area, the review of the plot plan application will ensure that the development will be compatible with the existing land uses of the surrounding area. With implementation of the City’s development review standards, the project is not expected to degrade the existing visual character of the area. Additionally, the use of ornamental landscaping will enhance the project site and create a visually pleasing streetscape. As a result, no significant impacts are anticipated and no additional mitigation measures are required.

d) **Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?**

*Less Than Significant Impact*

Light and glare from new street lights, vehicles, and the future land uses would be generated and would contribute an additional increment of light and glare experienced in the project vicinity. The site is located within an urbanizing area of the city which already experiences some levels of light and/or glare from the existing development. The development of the project site will require the approval of a plot plan by the City of Wildomar. The City’s plot plan application process is intended to ensure that future development will be designed to ensure design compatibility and to alleviate light and/or glare disturbances outside of the project boundary. As a result, no impacts are anticipated and no additional mitigation is required.

e) **Interfere with the night time use of the Mt. Palomar Observatory, as protected through Chapter 8.80 of the Wildomar Municipal Code?**

*Less Than Significant Impact*

According to the General Plan, the project site is located 30 miles from the Mt. Palomar Observatory and falls within the Mt. Palomar Observatory special lighting district (Zone B). The project has the potential to result in additional impacts to the continued operation of the Mt. Palomar Observatory. Chapter 8.80 of the Wildomar Municipal Code restricts the use of certain light fixtures to limit light pollution from projects around the Mount Palomar Observatory. With the implementation of the
standard requirements contained in Chapter 8.80 of the Wildomar Municipal Code, the project impacts to Mt. Palomar would be reduced to a level of less than significant.

STANDARD CONDITIONS & REQUIREMENTS

1. The project shall comply with the standard requirements of Chapter 8.80 of the Wildomar Municipal Code regarding light pollution.

MITIGATION MEASURES

None.
## 2. AGRICULTURE RESOURCES. Would the project:

<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant with the Incorporated Mitigation</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?</td>

</tr>
</tbody>
</table>

*In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland.*

### DISCUSSION

a) **Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?**

**Less Than Significant Impact**

The project site is classified as Farmland of Local Importance by the Farmland Mapping and Monitoring Program of the California Resources Agency, however there are no farming activities taking place at the subject site. With the exception of a local dairy adjacent to the project site, there are no agricultural activities occurring in the general vicinity of the project. The City of Wildomar General Plan Land Use Designation for the project site is Light Industrial. Therefore, the proposed project is consistent with the general plan. Although the project would result in the loss of Farmland of Local Importance, the loss is considered less than significant because the proposed project is consistent with the General Plan Land Use Designation.

b) **Conflict with existing zoning for agricultural use, or a Williamson Act contract?**

**No Impact**

The project site is currently zoned General Commercial (C-1/C-P) on the City of Wildomar Zoning Map and is not under a Williamson Act contract. Therefore, no impacts are anticipated and no mitigation measures are required.

c) **Involve other changes in the existing environment which, due to their location or nature, could**
result in conversion of Farmland, to non-agricultural use?

Less Than Significant Impact

The project site is located on a vacant unfarmed parcel that is generally surrounded by developed and urban land uses. While the project would not directly cause environmental conditions which would result in the further conversion of farmland, the project would provide personal storage amenities, which could benefit urban residential land uses. The benefits would be marginal and would have a less than significant impact on the conversion of area farmland.

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

None.
3. AIR QUALITY. Would the project:

</tbody>
</table>

**DISCUSSION**

a) **Conflict with or obstruct implementation of the applicable air quality plan?**

**Less Than Significant Impact**

The proposed project is located within the City of Wildomar and within the South Coast Air Basin (SoCAB), which is under the jurisdiction of the South Coast Air Quality Management District (AQMD). The SCAQMD has adopted the 2007 Air Quality Management Plan (AQMP). The 2007 AQMP is based on socioeconomic forecasts (including population estimates) provided by the Southern California Association of Governments (SCAG). The City of Wildomar General Plan is consistent with SCAG’s Regional Growth Management Plan and SCAQMD’s Air Quality Management Plan. This project is consistent with the General Plan Land Use Designations that were used in the development of the AQMP. As a result, the proposed project is consistent with the AQMP and is not expected to obstruct the implementation of the 2007 AQMP.

The project is limited to the following facilities on a 3.61-acre lot: four buildings which would provide 70,183 square feet of storage; a 1,920-square foot, two-story office and caretaker building; a RV wash and dump area; three (3) parking stalls; a stucco wall; and a concrete block wall. The proposed project would result in additional vehicle trips on the citywide road network. The project proposes to have enclosed storage for Boats and RVs, which would closely resemble the utility of traditional mini-storage facilities. The proposed project is expected to generate approximately 180 daily trips, with a peak of 11 AM and 19 PM daily vehicle trips. It is not anticipated that the average daily trips would be considered significant and have permanent air quality impacts. Consequently, the proposed project would not conflict with or obstruct the implementation of the applicable...
regional air quality plan. As a result, no significant impacts are anticipated and no additional mitigation measures are required.

b) **Violate any air quality standard or contribute substantially to an existing or projected air quality violation?**

**Less Than Significant Impact**

The project is limited to the following facilities on a 3.61-acre lot: four buildings which would provide 70,183 square feet of storage; a 1,920-square foot, two-story office and caretaker building; a RV wash and dump area; three (3) parking stalls; a stucco wall; and a concrete block wall. While the proposed project would result in additional vehicle trips on the citywide road network, it is not anticipated that the average daily trips would be considered significant or have permanent air quality impacts.

The proposed project would generate temporary construction related air quality impacts. These impacts are temporary in nature and are directly related to grading and construction activities of the site development. The air quality analysis contained in this Section includes project grading, infrastructure construction, building construction, paving, and landscape installation. The mitigated construction air quality emissions are summarized in Table 2. Construction related mitigation measures (AQ-1 through AQ-5) would be implemented reduce the temporary air quality impacts due to grading and construction activities. Construction of the proposed project is not expected to exceed the thresholds for air quality emissions from an individual project have been established by the SCAQMD for the Southern California Air Basin (SoCAB).

Area wide and Operational emissions from project-related traffic were calculated using the URBEMIS air quality model. The model was used to calculate the area and source emissions and the resulting operational emissions for an assumed project build-out in the Year 2010. The results are shown in the Table 3 for both the summer and winter conditions. As indicated below, there are no operational air quality impacts associated with implementation of the proposed project.
Recent changes to State Law, the Global Warming Solutions Act of 2006, have established requirements to begin to deal with greenhouse gas emissions in California. One of the requirements in the law is for environmental documents to identify carbon dioxide emissions that are expected to occur as a result of the construction and operation of projects within the State. The anticipated carbon dioxide emissions during project construction and operation for both summer and winter periods are contained in Table 4 below.

</tbody>
</table>

Global climate change has become a major concern in recent years. While the exact effects of global climate change are not known, the best scientific opinions believe that over the next century the average temperature on the planet will increase between 2 and 5 degrees Celsius (3½ to 9 degrees Fahrenheit). The long-term consequences of this increase in temperature include a variety of events that could potentially be destructive to human civilizations. Some of the potential changes that could result from planetary climate change include substantial increases in sea level, increased drought and desertification, reductions in global agriculture and food supplies, impacts to existing ecosystems, and a possible re-initiation of an ice age if oceanic circulation in the North Atlantic Ocean is effected. In the future, California will probably be most affected by increasing sea levels, extended drought conditions, increased flooding, and more severe wildfires.

Given the planet-wide causes of global climate change, it is unlikely that any substantial reduction in the rate or magnitude of climate change is possible at the local level. Long-term solutions to global climate change will probably require extensive reductions in the use of fossil fuels and the increases in the use of alternate energy sources. On the level of a small scale development project, there are a number of items that could help minimize the severity of the adverse effects of global climate change. These items include increased energy efficiency (including the use of light colored/highly reflective roof materials), enhanced land use connectivity (between work, services, school and recreation), reductions in vehicle miles driven, increases in mass transit use, and increased open space conservation.

As discussed in this Section, the construction and operation of the proposed project would not violate air quality standards, exceed AQMD significance thresholds, and by inference, significantly impact air quality. Even though no significant air quality impacts are anticipated, essential air quality mitigation measures addressing particulate matter and volatile organic gases are being
incorporated into this project to ensure construction compatibility with the surrounding area. As a result, the air quality impacts are expected to be less than significant.

c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?

Less Than Significant Impact

The proposed project has the potential to contribute toward a cumulative net increase of any criteria pollutant for which the South Coast Air Basin is a non-attainment area under an applicable air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors). However, all of southern California is within a non-attainment region for these criteria pollutants (ozone and particulate matter). Consequently, the project would probably result in an insignificant incremental increase that is not expected to significantly contribute to the non-attainment status of the region. As a result, and pursuant to CEQA Guidelines Section 15064(h), these impacts are considered less than significant and no additional mitigation measures beyond those listed below are required.

d) Expose sensitive receptors to substantial pollutant concentrations?

Less Than Significant Impact

Sensitive receptors to substantial pollutant concentrations include population groups which are more susceptible to air pollution (i.e., sensitive receptors), and include young children, the elderly, and the acutely and chronically ill (especially those with cardio-respiratory disease). The surrounding area contains vacant land to the northeast; single-family homes to the southeast and southwest; and industrial and single-family homes to the northwest. The nearest sensitive receptors are the single-family homes located 30 feet southeast, 80 feet southwest, and 110 feet northwest of the project site. One elementary school is located approximately 0.75 mile southwest of the project site and another elementary school is located 1.0 mile to the northeast. A high school is located approximately 1.0 mile to the east. Construction mitigation measures (AQ-1 through AQ-4) and standard conditions and requirements would be implemented reduce the impacts to sensitive receptors to less than significant. Once built the use and operation of the mini-storage project would not expel pollutants in any concentration to affect any nearby sensitive receptors. Furthermore, a condition of approval would be added to prohibit the storage of hazardous materials in individual storage units.

e) Create objectionable odors affecting a substantial number of people?

Less Than Significant Impact

Many agricultural and industrial businesses can create objectionable odors. Examples include dairies, composting operations, refineries, chemical plants, fiberglass molding, wastewater treatment plants, and landfills. The project does not contain any of these operations and most business operations would be confined within the buildings. The water from the RV wash would flow into the stormwater retention system after passing through a bio filter. The trash enclosure would be covered to prevent rain water standing in the trash enclosure area. The RV septic dump would be developed in conformance with the Building Code and EVMWD standards. Therefore, the
The proposed project is not expected to create objectionable odors with the potential to affect a substantial number of people during operation. There is the possibility that potentially objectionable odors may result from project construction. Any impacts which may occur during project construction would be of short duration and are not expected to affect nearby residents. As a result, no significant impacts are anticipated and no additional mitigation measures are required.

**STANDARD CONDITIONS & REQUIREMENTS**

1. The project will comply with regional rules such as SCAQMD Rules 402, 403 and 404, which would assist in reducing short-term air pollutant emissions. These dust suppression techniques are summarized below.

   a. Portions of the construction site to remain inactive longer than a period of three months will be seeded and watered until grass cover is grown or otherwise stabilized in a manner acceptable to the City.

   b. All on-site roads will be paved as soon as feasible or watered periodically or chemically stabilized.

   c. All material transported off-site will be either sufficiently watered or securely covered to prevent excessive amounts of dust.

   d. The area disturbed by clearing, grading, earth moving, or excavation operations will be minimized at all times.

   e. Where vehicles leave the construction site and enter adjacent public streets, the streets will be swept daily or washed down at the end of the work day to remove soil tracked onto the paved surface.

**MITIGATION MEASURES**

AQ-1 The City of Wildomar will require construction contractors to apply water to the disturbed portions of the project site at least three times per day. On days where wind speeds are sufficient to transport fugitive dust beyond the working area boundary, the City of Wildomar will require contractors to increase watering to the point that fugitive dust no longer leaves the property (typically a moisture content of 12%), and/or the contractor will terminate grading and loading operations.

AQ-2 All material stockpiles subject to wind erosion during construction activities, which will not be utilized within three days, will be covered with plastic, an alternative cover deemed equivalent to plastic, or sprayed with a nontoxic chemical stabilizer.

AQ-3 All vehicles on the construction site will travel at speeds less than 15 miles per hour. This will be enforced by including this requirement in the construction contract between the City and the contracted construction company with penalty clauses for violation of this speed limit.

AQ-4 All engines will be properly operated and maintained. Proper tune for all diesel-powered
vehicles and equipment in the South Coast Air Basin requires that fuel injection timing be retarded 2 degrees from the manufacturer’s recommendation and use high pressure injectors.
### 4. BIOLOGICAL RESOURCES. Would the project:

| Issues |

### DISCUSSION

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Less Than Significant Impact

The project site is currently vacant and has been partially graded in the past. Non-native grassland is scattered throughout the site. The grassland is dominated by common and non-native annual grass and weed species which include: shortpod mustard (*Brassica geniculata*), brome grasses (*Bromus diandrus* and *B. madritensis*), lambs’ quarters (*Chenopodium album*), tocalote (*Centaurea"
melitensis), common horseweed (Conyza canadensis), doveweed (Croton setiger), jimsonweed (Datura wrightii), prickly lettuce (Lactuca serriola), curly dock (Rumex crispus), and Russian thistle (Salsola tragus). According to the MSHCP Compliance Report and Narrow Endemic Plant Species and Burrowing Owl Habitat Assessments Study, no significant wildlife habitats or species were identified on the site. The project site is not located in a Western Riverside County Multiple MSHCP Criteria Cell and therefore does not conflict with the MSHCP land acquisition goals.

The MSHCP did identify that the project site was potentially a habitat for the Burrowing Owl. As required by the MSHCP, a burrowing owl survey was prepared by Principe and Associates on June 1, 2007. The survey indicated that no burrowing owl species or habitat was found on the proposed project site. The project will be conditioned to require a burrowing owl survey prior to grading if grading is to occur during the breeding/nesting season (March 1st- August 15th).

Based on Figure 6-1 of the MSHCP, the project site is located within the Narrow Endemic Plant Species Survey Area 2. The plant species within this survey area include Munz’s onion (Allium munzii), San Diego ambrosia (Ambrosia pumila), many-stemmed dudleya (Dudleya multicaulis), spreading navarretia (Navarretia fossalis), California Orcutt grass (Orcuttia californica), Hammitt’s clay-cress (Sibarposis hammettii), and Wright’s trichocoronis (Trichocoronis wrightii var. wrightii). However, the required vernal pool habitats for these Narrow Endemic Plant Species are not present on the site.

The project site is located in close proximity to the MSHCP Conservation Areas. The closest MSHCP Conservation Area is the Proposed Extension of Existing Core 3, located approximately 530 feet northwest of the project site. The Proposed Extension of Existing Core 3 consists of two blocks of land extending from the southern border of Existing Core E. The management of edge conditions in the areas located on the northwest side of Corydon Street will be necessary to maintain high quality habitat in this area. Future development of the project site would not result in edge effects that would adversely affect biological resources within the MSHCP Conservation Area.

The MSHCP contains requirements to address anticipated urban/wildland interface issues associated with the conservation areas. Section 6.1.4 of the MSHCP sets forth guidelines to address indirect edge effects associated with locating development adjacent to MSHCP Conservation Areas. These edge effects can adversely affect the biological resources within an identified Conservation Area. The Guidelines provide direction on drainage, the application of toxic chemicals, lighting, noise, invasive plant species, barriers to animal movement, and grading issues. However, the project is mostly surrounded by urban development and is not adjacent to any wildland areas. Additionally, the closest MSHCP Conservation Area is the Proposed Extension of Existing Core 3, located approximately 530 feet northwest of the project site. Consequently, the proposed project is consistent with the provisions of the MSHCP.

As a result, the project would have a less than significant impact on habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service.

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?
Less than Significant Impact

The project site does not contain any riparian habitats or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service. As a result, no wetland impacts are anticipated and no mitigation measures are required.

c) **Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?**

Less Than Significant Impact

The proposed project does not contain and would not have an adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means. As a result, no wetland impacts are anticipated and no mitigation measures are required.

d) **Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?**

Less Than Significant Impact

The project site is surrounded by several single-family homes and adjacent to Corydon Street, which creates a variety of existing obstacles to the movement of wildlife. The additional development associated with the project is not expected to interfere with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites. In addition, the proposed project site is located outside of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP) Criteria Cell (corridor) Areas and therefore the project does not conflict with the MSHCP planning goals. Consequently, the impacts are anticipated to be less than significant and no mitigation measures are required.

e) **Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?**

Less Than Significant Impact

The City of Wildomar does not have local policies or ordinances protecting biological resources. However, the City is subject to compliance with the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP). The proposed project is located outside the MSHCP Criteria Cell Areas and therefore the project does not conflict with the MSHCP planning goals. It is anticipated that implementation of the project would have a less than significant impact on significant biological resource impacts.

f) **Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?**
Less Than Significant Impact

As previously discussed the proposed project is within the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP). The MSHCP is a comprehensive, multi-jurisdictional Habitat Conservation Plan focusing on conservation of species and associated habitats in Western Riverside County. The MSHCP will serve as a HCP pursuant to Section 10(a)(1)(B) of the federal Endangered Species Act of 1973, as amended, as well as a Natural Communities Conservation Plan (NCCP) under the NCCP Act of 2001. The overall goal of the MSHCP is the conservation of 500,000 acres and focuses on the conservation of 146 plant and animal species. The proposed project is located within the MSHCP however it is located outside the MSHCP Criteria Cell Areas and therefore the project does not conflict with the MSHCP planning goals.

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

1. The Western Riverside County Multiple Species Habitat Conservation Plan requires a burrowing owl survey prior to grading if grading is to occur during the breeding/nesting season (March 1st- August 15th).
5. CULTURAL RESOURCES.  Would the project:

DISCUSSION

a) **Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?**

*Less Than Significant Impact*

The project would not cause a substantial adverse change in the significance of a historical resource as defined in §15064.5 of the California Environmental Quality Act. According to the Phase I Cultural Resources Assessment, there are no historic structures located on the site. Currently, the project site is vacant. In addition, the Wildomar General Plan does not identify historical resources on the project site. Since no historic structures are currently located on the site or adjacent to the site, no significant impacts to historic resources are anticipated and no mitigation measures are required.

b) **Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?**

*Less Than Significant Impact with Mitigation Incorporated*

The project would not cause a substantial adverse change in the significance of an archaeological resource. Based on the Phase I Cultural Resources Assessment and General Plan maps, no substantial adverse change in the significance of any archaeological resource would result from project implementation. However, because archaeological resource sites have been identified within the City of Wildomar, there is the potential for the unanticipated discovery of these resources. Seven cultural resources studies have been conducted within a one-half mile radius of the project site. During the course of these studies, two archaeological sites (CA-RIV-3988 and 4646) were recorded. Reported cultural resources included two bedrock slicks and a historical trash dump (CA-RIV-3988) and three bedrock mortars (CA-RIV-4646). Since these resources are known to exist in the general area, the mitigation measures listed in this Section (CUL-1 through
CUL 6) will ensure that any unanticipated discovery will not have a significant impact on archeological resources.

According to the Riverside County GIS, the project site is not located within Native American Tribal Lands. However, historically there have been tribal activities in and around the Wildomar area. Thus, there is a potential for the inadvertent discovery of previously unknown resources. As a result, with the implementation of the mitigation measures (CUL-1 through CUL-6) identified in this Section, any impacts are expected to be at a less than significant level.

c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less Than Significant Impact with Mitigation Incorporated

The site has been identified as having a low potential for paleontological resources according to the Wildomar General Plan Paleontological Sensitivity Resources Map. The General Plan identifies the surficial materials in this area as Holocene-age, fine-grained unconsolidated sediments, including stream-, gravity-, lake-, and wind-deposited sediments. Deposits in this category include stream channel, alluvial fan, flood plain, colluvial, dune, and lacustrine sediments. According to the geotechnical investigation prepared for the site, surface and subsurface soils are undocumented fill and alluvium. The undocumented fill consists of loose to dense silty, fine to medium sand. The alluvium consists primarily of medium dense to dense silty sands. Because of the low potential for the discovery of paleontological resources, no significant impacts are anticipated however mitigation measures have been added (CUL-7) to protect paleontological resources in the event any are discovered during project grading and/or construction.

d) Disturb any human remains, including those interred outside of formal cemeteries?

Less Than Significant Impact with Mitigation Incorporated

The project site boundaries are not within any previously identified cemetery. No on-site burials are known to have occurred at the project site. Although there are no known archaeological resources on the project site, in the event human remains are encountered during ground disturbing activities the mitigation measures (CUL-1 through CUL-6) identified below would reduce any impacts to a level of less than significant

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

CUL-1 An archaeological monitor shall be present during all earthmoving to ensure protection of any accidentally discovered potentially significant resources. All cultural resources unearthed by project construction activities shall be evaluated by a qualified archaeologist. Any unanticipated cultural resources that are discovered shall be evaluated and a final report prepared. The report shall include a list of the resources recovered, documentation of each site/locality, and interpretation of resources recovered. The City of Wildomar shall designate repositories in the event the significant resources are recovered.
CUL-2 At least 30 days prior to seeking a grading permit, the project applicant shall contact the appropriate Tribe\(^1\) to notify the Tribe of grading, excavation and the monitoring program, and to coordinate with the City of Wildomar and the Tribe to develop a Cultural Resources Treatment and Monitoring Agreement. The Agreement shall address the treatment of known cultural resources, the designation, responsibilities, and participation of Native American Tribal monitors during grading, excavation and ground disturbing activities; project grading and development scheduling; terms of compensation; and treatment and final disposition of any cultural resources, sacred sites, and human remains discovered on the site.

CUL-3 If human remains are encountered, California Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the Riverside County Coroner has made the necessary findings as to origin. Further, pursuant to California Public Resources Code Section 5097.98(b) remains shall be left in place and free from disturbance until a final decision as to the treatment and disposition has been made. If the Riverside County Coroner determines the remains to be Native American, the Native American Heritage Commission shall be contacted within a reasonable timeframe. Subsequently, the Native American Heritage Commission shall identify the “most likely descendant.” The most likely descendant shall then make recommendations, and engage in consultations concerning the treatment of the remains as provided in Public Resources Code 5097.98.

CUL-4 The landowner shall relinquish ownership of all cultural resources, including sacred items, burial goods and all archaeological artifacts that are found on the project area to the appropriate Tribe for proper treatment and disposition.

CUL-5 All sacred sites, should they be encountered within the project area, shall be avoided and preserved as the preferred mitigation, if feasible.

CUL-6 If inadvertent discoveries of subsurface archaeological resources are discovered during grading, the Developer, the project archaeologist, and the appropriate Tribe shall assess the significance of such resources and shall meet and confer regarding the mitigation for such resources. If the Developer and the Tribe cannot agree on the significance or the mitigation for such resources, these issues will be presented to the Planning Director for decision. The Planning Director shall make the determination based on the provisions of the CEQA with respect to archaeological resources and shall take into account the religious beliefs, customs, and practices of the appropriate Tribe. Notwithstanding any other rights available under the law, the decision of the Planning Director shall be appealable to the City of Wildomar.

CUL-7 If paleontological resources are encountered during grading or project construction, all work in the area of the find shall cease. The project proponent shall notify the City of Wildomar and retain a qualified paleontologist to investigate the find. The qualified paleontologist shall make recommendations as to the paleontological resource’s

---

\(^1\) It is anticipated that the Pechanga Band of Luiseño Indians will be the “appropriate” Tribe due to their prior and extensive coordination with the surrounding cities in determining potentially significant impacts and appropriate mitigation measures.
disposition to the Planning Director. The developer shall pay for all required treatment and storage of the discovered resources.
### DISCUSSION

**a)** Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:

i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning map, issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)

Less Than Significant Impact with Mitigation Incorporated
The project is located within seismically active southern California and is expected to experience moderate to severe ground motions from earthquakes caused by both local and regional faults. The nearest active fault to the project site is the Elsinore-Temecula fault, located less than 1 mile from the project site. The Elsinore-Glen Ivy fault is located approximately 3 miles from the project site. The project site does not lie within a State of California Earthquake Fault Hazard Zone (formerly called an Alquist-Priolo Special Studies Zone) or the Riverside County Fault Zone. However, the project site is located approximately 380 feet from the Riverside County Fault Zone and approximately 765 feet from the Elsinore Fault Zone. The potential impacts related to the Elsinore Fault Zone (as well as other regional faults) are addressed through compliance with standard measures contained in the California Building Code and City of Wildomar Municipal Code and those recommended mitigation contained in Mitigation Measure GEO-1. With the implementation of the standard code provisions and Mitigation Measure GEO-1, the anticipated impacts from regional ground shaking are expected to be reduced to a less than significant level.

ii) **Strong seismic ground shaking?**

*Less Than Significant Impact with Mitigation Incorporated*

The proposed project could expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving strong seismic ground shaking. The project site is located in an area of high regional seismicity and may experience horizontal ground acceleration during an earthquake along the Elsinore-Temecula fault, located less than 1 mile from the project site, along the Elsinore-Glen Ivy fault, located approximately 3 miles from the project site, or along other fault zones throughout the region. The project site does not lie within a State of California Earthquake Fault Hazard Zone (formerly called an Alquist-Priolo Special Studies Zone) or the Riverside County Fault Zone. However, the project site is located approximately 380 feet from the Riverside County Fault Zone and approximately 765 feet from the Elsinore Fault Zone. The project site has been and will continue to be directly affected by seismic activity to some degree. Compliance with recommendations identified in the preliminary geotechnical investigation (and referenced in Mitigation Measure GEO-1) and the requirements contained in the California Building Code and City of Wildomar Municipal Code regarding structures and construction and those recommended mitigation measures contained in this document ensures that any impacts will be less than significant.

iii) **Seismic-related ground failure, including liquefaction?**

*Less Than Significant Impact with Mitigation Incorporated*

According to the Riverside County GIS and City of Wildomar General Plan the project site is located in an area that is designated as having a moderate potential for liquefaction. To address any potential impacts from other seismic-related ground failure compliance with the specific recommendations identified in Mitigation Measure GEO-1 and the standard requirements contained in the California Building Code and City of Wildomar Municipal Code are expected to reduce the impacts associated with ground failure hazards to a less than significant level.

iv) **Landslides?**
No Impact

The proposed project is not expected expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death from landslides. Due to the relatively level terrain for the proposed project area, this site is not subject to landslide, collapse, or rock fall hazards. The project site is located within an area of general seismic activity, but does not contain areas subject of unstable geologic units or soil. According to the Riverside County GIS and City of Wildomar General Plan the project site has no potential for landslides. Additionally, due to the proposed project site’s distance from boulders or other rock formations there is no potential for mudslide or rock fall hazards. As a result, no impacts are anticipated; therefore, no additional mitigation measures are required.

b) Result in substantial soil erosion or the loss of topsoil?

Less Than Significant Impact

As with any development, soil erosion can result during construction, as grading and construction can loosen surface soils and make soils susceptible to effects of wind and water movement across the surface. The City routinely requires the submittal of detailed Erosion Control Plans with any grading plans. The implementation of this standard requirement is expected to address any erosional issues associated with the grading of the site. As a result, these impacts are not considered to be significant if the implementation of the necessary erosion and runoff control measures required as part of the approval of a grading plan. No additional mitigation measures are required.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Less Than Significant Impact

Riverside County GIS and City of Wildomar General Plan the project site is located in an area that is designated as having a moderate potential for liquefaction. To address any potential impacts related to ground failure compliance with the specific recommendations identified in Mitigation Measure GEO-1 and the standard requirements contained in the California Building Code and City of Wildomar Municipal Code are expected to reduce the impacts associated with ground failure hazards to a less than significant level.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

Less Than Significant Impact

According to the geotechnical investigation, the native soils beneath the site have a very low to low Expansion Index as defined in the California Building Code. As a result, no significant impacts are anticipated and no specific mitigation is required.

e) Have soils capable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?
**No Impact**

Sewer treatment services for the proposed project would be extended onto the site from existing main lines and would be handled by Elsinore Valley Municipal Water District. Therefore, the project does not propose the use of septic tanks or an alternative wastewater disposal system. Therefore, no impact related to septic service or other alternative wastewater services would occur and no mitigation measures are required.

**STANDARD CONDITIONS & REQUIREMENTS**

1. The project shall comply with the California Building Code and City of Wildomar Municipal Code.

2. Prior to issue of a grading permit, the applicant shall provide an updated soils report to the City of Wildomar Building Department to address expansive soils.

**MITIGATION MEASURES**

GEO-1 Comply with the seismic and site stability recommendations contained in the “Geotechnical Investigation,” prepared by Geocon Inland Empire, Inc. (as amended or updated).
7. HAZARDS AND HAZARDOUS MATERIALS. 

Would the project:

DISCUSSION

a) Create a significant hazard to the public or the environment through the routine transport, use or disposal of hazardous materials?

Less Than Significant Impact

The project proposes a commercial storage facility and ornamental landscaping which would
involve the use of small amounts of hazardous materials, primarily household cleaners, fertilizers, pesticides, herbicides, and batteries. The project may create an additional increment of hazard to the public or the environment through the routine transport, use or disposal of hazardous materials due to the operation of the proposed project. However, due to the quantity and nature of these materials, these impacts are expected to be less than significant.

During construction there is a potential for the accidental release of petroleum products in sufficient quantity to pose a hazard to people and the environment. Prior to initiating construction, a Stormwater Pollution Prevention Plan will be approved by the City of Wildomar to address any construction-related spills or accidents. This requirement is included in Mitigation Measure HAZ-1. With implementation of Mitigation Measure HAZ-1, the project is not expected to result in a significant impact on the environment.

b) **Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment?**

*Less Than Significant Impact*

The project may create a hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment associated with the operation of the proposed project. However, due to the small quantity and limited nature of these materials, these impacts would be considered less than significant. No significant impacts are anticipated and no additional mitigation measures are required.

c) **Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?**

*No Impact*

The project site is not located within one-quarter mile of an existing or proposed school. As a result, no impacts are anticipated and no mitigation measures are required.

d) **Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?**

*No Impact*

The proposed project is not located on any hazardous materials site as designated by Government Code Section 65962.5. The technical studies provided did not identify any on-site hazardous material issues. A review of the information on the Department of Toxic Substances Control website (www.envirostor.dtsc.ca.gov) did not identify any other sites on the project site, but identified two Leaking Underground Fuel Tank cleanup sites approximately 3,500 feet from the project site, one located northeast of the project site and the other located southeast of the project site. The Leaking Underground Fuel Tank cleanup sites are undergoing cleanup due to an unauthorized release from an underground storage tank system. Consequently, no impacts are anticipated and no mitigation measures are required.
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles or a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

No Impact

The project site is not located within any airport land use plan. The closest public airport is French Valley Airport which is located about 10 miles southeast of the project site. Given the distance and that the project site is not in the airport land use plan for the French Valley Airport, no significant impacts to the project are anticipated and no mitigation measures are required.

f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

Less Than Significant Impact

The closest private airstrip in the vicinity of the proposed project is Skylark Field, which is a private airport and not a public use facility. The Skylark Field Airport is located at the south end of Lake Elsinore; the boundary line for the airport is located approximately 500 feet northeast of the project site. The project site does not align with the approach or take off patterns of the existing runway, and the proposed project site is located approximately 1,000 feet southwest from the runway, perpendicular to the flight path. The airport is used primarily for skydiving aircraft which commonly drop parachutists into the nearby Lake Elsinore floodplain area south of the lake. The airport is also used for gliding and other recreational uses. Skylark Field has not adopted an airport land use compatibility plan. Because of the airport’s limited use as well as the project’s location in relation to the runways, no significant impacts to the project are anticipated and no mitigation measures are required. Therefore, the proposed project would not result in a safety hazard for people residing or working in the project area.

g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

No Impact

The proposed project would not conflict with any emergency response or evacuation plans. The project site would be primarily accessed via Bryant Street, with secondary access provided off of Melinda Lane. The project is not expected to interfere with an adopted emergency response plan or emergency evacuation plan. As a result, no significant impacts are anticipated and no mitigation measures are required.

h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Less Than Significant Impact

The project site is not located within a Wildfire Zone area per the City of Wildomar General Plan and Riverside GIS Maps. Therefore, the proposed project does not have the potential to be at a higher risk from wildland fires. Nonetheless, the project will be conditioned to require the
clearance from the Riverside County Fire Department prior to issuance of grading and building permits. Since clearance from the Riverside County Fire Department will be required prior to issuance of grading and building permits, the impact is considered less than significant and no specific mitigation is required.

STANDARD CONDITIONS & REQUIREMENTS

1. Prior to the issuance of grading and building permits, grading and building plans shall be approved by the Riverside County Fire Department.

MITIGATION MEASURES

HAZ-1 All spills or leakage of petroleum products during construction and operational activities shall be remediated in compliance with applicable state and local regulations regarding cleanup and disposal of the contaminant released. The contaminated waste will be collected and disposed of at an appropriately licensed disposal or treatment facility. This measure shall be incorporated into the Stormwater Pollution Prevention Plan prepared for the project development.

DISCUSSION

a) Violate any water quality standards or waste discharge requirements?

_Less Than Significant Impact with Mitigation Incorporated_

The project falls under the jurisdiction of the Santa Ana Regional Water Quality Control Board (RWQCB) and is located in the Santa Ana Watershed. A draft Water Quality Management Plan (WQMP) was prepared for the project. The draft WQMP identified best management practices (BMP’s) and other measures necessary to protect water quality. The BMP’s identified in the Preliminary WQMP include design components such as incorporating landscaped buffer areas between sidewalks and streets, channeling site runoff into landscape areas, and constructing streets and sidewalks with minimum widths. Prior to the issuance of a grading permit, the applicant will be required to submit, and obtain City approval of, a Final Water Quality Management Plan based upon the project approved by the City. This requirement is incorporated into Mitigation Measure HYD-1. As a result of the best management practices and other measures contained in the Preliminary WQMP, the project is not expected to violate any water quality standards, waste discharge requirements, or have a significant impact on the environment.

b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge, such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?

_Less Than Significant Impact_

According to the Geotechnical Investigation, no groundwater was encountered within the borings excavated to a maximum depth of approximately 50 feet. Three wells were identified as being located within 1 mile of the site. Groundwater depths at the wells varied from 58 to 140 feet. The proposed project would use water provided by Elsinore Valley Municipal Water District and would include landscaped areas, subterranean pipes, gutters, a bio-swale, and catch basins to allow the runoff to recharge the groundwater aquifer. Therefore, the project would not deplete groundwater supplies or interfere substantially with groundwater recharge, such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted). Any impacts are considered less than significant and no mitigation measures are required.

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in flooding on- or off-site?

_Less Than Significant Impact_

The project as proposed would not alter the course of any river or stream and would not alter the current drainage pattern in such a way as to cause flooding. The current drainage pattern on the site primarily runs in a northern direction across the site to Corydon Street and is conveyed by an earthen ditch to an existing 24-inch corrugated steel pipe culvert. This culvert outlets into an existing ditch on private property (De Jong Dairy), then to two 18-inch corrugated steel pipe
culverts which carry the flows across Corydon Street. To handle the increased runoff, a subterranean high-density polyethylene pipe basin is proposed to provide detention for the 10-year-and-lesser design storms. Surface flows would be conveyed via ribbon gutters to a 110-foot-long bio-swale for cleansing, collected in a drop inlet, and put into the underground basin which would be provided with a restricted outlet. Two catch basins would be constructed to capture street flows and convey them to the existing dairy ditch. As a result, the drainage pattern is expected to remain the same after the project is constructed. Consequently, impacts are anticipated to be less than significant and no mitigation measures are required.

d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner, which would result in flooding on- or off-site?

Less Than Significant Impact

The proposed project site would change from vacant, undeveloped land to approximately 90 percent impervious. The current drainage pattern on the site primarily runs in a northern direction across the site to Corydon Street and this is expected to remain the same after the project is constructed from the installation of a subterranean pipe basin, gutters, a bio-swale, and catch basins. Other post-construction BMPs will be incorporated into the project design to retain the existing drainage patterns of the site. The project, as proposed would not substantially alter the existing drainage pattern of the site or area or substantially increase the rate or amount of surface runoff in a manner, which would result in flooding on- or off-site. As a result, no significant impacts are anticipated and no mitigation measures are required.

e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

Less Than Significant Impact

The requirements of the urban runoff program for the Santa Ana River Watershed require that post-development flows do not exceed the pre-development flows for 2-year, 24 hour-and 10-year, 24-hour rainfall events. A Preliminary Water Quality Management Plan (WQMP) was submitted for review of drainage patterns and BMP’s with the application for the tentative parcel map, and plot plan. The project proposes the construction of a bio swale and an underground detention basin on the north east corner of the site. Approximately 11,800 cubic feet of water will be retained on site in the proposed detention system. The Final WQMP for the proposed project will be required to ensure that post-development flows do not exceed the pre-development flows for 2-year, and 10-year 24 hour events. This requirement is contained in Mitigation Measure HYD-1. With the implementation of Mitigation Measure HYD-1, any impacts are considered less than significant and no additional mitigation measures are required.

f) Otherwise substantially degrade water quality?

Less Than Significant Impact with Mitigation Incorporated

The project as proposed would not otherwise substantially degrade water quality. Compliance with the requirements of the Stormwater Pollution Prevention Program (Mitigation Measures HAZ-1), WQMP (Mitigation Measure HYD-1), and the City of Wildomar’s erosion control
requirements will ensure that significant water quality impacts and violations of standards and requirements do not occur. The project proposed both RV sewage dump facilities and an area reserved to wash RVs or Boats. The sewage dump site will be constructed to the Building and Plumbing Code Standards and will be connected to the sanitary sewer system. The RV and Boat wash facility is located in the southeast corner of the project site. Water originating from this area will be collected and pass through a biofilter before discharging into the onsite underground detention basin. With these mitigation measures and standard requirements, any water quality impacts are expected to be less than significant and no additional mitigation measures are required.

g) **Place housing within a 100-year flood hazard area as mapped on a federal Flood hazard Boundary of Flood Insurance Rate Map or other flood hazard delineation map?**

**Less Than Significant Impact**

The project is proposing to construct a two-story office and caretaker building, which would be used as a residence. The project site is located adjacent to a 100-year flood zone under the City of Wildomar General Plan. However, the proposed project site is not located within a 100-year flood hazard area as mapped on a federal Flood hazard Boundary of Flood Insurance Rate Map or other flood hazard delineation map. The project site is located within Zone "X" according to Panels 2043 and 2681 of Map Number 06065C2043G. A small portion of the northeast corner of the project site is in the 0.2% to 1% annual chance of flooding Zone X, as determined by the Federal Emergency Management Agency (FEMA). The remainder of the project site is located in the less than 0.2% annual chance of flooding Zone X. Consequently, the proposed project would not place housing within a flood hazard area. As a result, impacts are anticipated to be less than significant and no mitigation is required.

h) **Place within a 100-year flood hazard area structures, which would impede or redirect flood flows?**

**Less Than Significant Impact**

The project does not propose to impede or redirect any of the existing drainage flows. The project site is located outside of the 100-year flood hazard area. The project site is located within Zone "X" according to Panels 2043 and 2681 of Map Number 06065C2043G. A small portion of the northeast corner of the project site is located in the 0.2% to 1% annual chance of flooding Zone X, as determined by the Federal Emergency Management Agency (FEMA). The remainder of the project site is located in the less than 0.2% annual chance of flooding Zone X. As a result, no impacts are anticipated and no mitigation measures are required.

i) **Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?**

**Less Than Significant Impact**

The proposed project is not located within a dam inundation area or an area that is expected to experience severe flooding as the proposed project is located outside of the 100-year flood hazard area. However, the project site is located approximately 1.5 miles southeast of Lake Elsinore and adjacent to a High Dam Hazard Zone. The proposed project is also located adjacent to a 100-year
flood zone. Nonetheless, the project is not expected to expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam. Impacts are anticipated to be less than significant and no mitigation required.

j) Inundation by seiche, tsunami, or mudflow?

No Impact

The project site is not located in an area that is subject to seiches, mudflows, or tsunamis. As a result, no impacts are anticipated and no mitigation measures are required.

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

HYD-1 Prior to the approval of the grading permit, the City shall review and approve the Final Water Quality Management Plan as required by the program requirements in effect at that time.

HYD-2 The WQMP Best Management Practices contained in the Final WQMP shall be incorporated in the project construction plans.
9. LAND USE AND PLANNING. Would the project:

<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant with the Incorporated Mitigation</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Physically divide an established community?</td>
<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
<tr>
<td>b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?</td>
<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
<tr>
<td>c) Conflict with any applicable habitat conservation plan or natural community conservation plan?</td>
<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
</tbody>
</table>

DISCUSSION

a) Physically divide an established community?

Less Than Significant Impact

The project site is located on a vacant parcel in the northwest area of the City. The project is consistent with the General Plan Land Use and Circulation elements. The project also proposes street improvements to Bryant Street, Corydon Street and Melinda Lane. These improvements will include the dedication of right of way, paving and the addition of sidewalks to enhance circulation and mobility in the Community. The project does not propose the elimination of any streets or connections to the community.

Additionally, the project is consistent with the zoning and General Plan land use designation of the parcel and area. The characteristics of the Corydon Street community reflect a mix of commercial and industrial uses bordered by large rural residential properties. The proposed project would be compatible with the existing and future land uses of the community and as a result, no significant impacts are anticipated and no mitigation measures are required.

b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?

Less Than Significant Impact

The City of Wildomar General Plan land use designation for the project site is Light Industrial (LI). The General Plan land use designation for the property immediately adjacent to the project site on the northeast is also Light Industrial. The properties to the southeast and southwest are designated Medium Density Residential (MDR). The property northwest of the project site is located in the City of Lake Elsinore and is designated as General Commercial in the East Lake Specific Plan. The
project site is currently zoned General Commercial (C-1/C-P). The zoning for the adjacent properties is Rural Residential (R-R) with the exception of the properties to the northwest which is located in the City of Lake Elsinore. The proposed project is consistent with the C-1/C-P Zoning and LI General Plan Land Use designations. Consequently, the proposed project would not conflict with any applicable land use plan, policy, or regulation. As a result, no impacts are anticipated and no mitigation measures are required.

c) **Conflict with any applicable habitat conservation plan or natural community conservation plan?**

**Less Than Significant Impact**

As previously discussed, the project site is located with the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP), but not located within the MSHCP Criteria Cell Areas and therefore the proposed project would not conflict with a habitat conservation plan. A burrowing owl survey was requested since the site was identified by the County of Riverside for potential burrowing owl habitat. A report prepared by Principe and Associates indentified that no burrowing owl species or habitat was found on the project site. A more detailed discussion of the Burrowing Owl can be found in the Biological Resources section. Additionally, the project site is located within the Narrow Endemic Plant Species Survey Area 2. However, the required growing habitats for these Narrow Endemic Plant Species are not present on the site. As a result of the MSHCP designation and survey results, no significant impacts are anticipated and no additional mitigation measures are required.

**STANDARD CONDITIONS & REQUIREMENTS**

None.

**MITIGATION MEASURES**

None.
10. MINERAL RESOURCES. Would the project:

<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant with the Incorporated Mitigation</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?</td>
<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
</tbody>
</table>

DISCUSSION

a) Result in the loss of availability of a known mineral resource that would be a value to the region and the residents of the state?

No Impact

The project site is located within Mineral Zone MRZ-3 according to the City of Wildomar General Plan. However, no mineral resources have been identified on the project site and there is no historical use of the site or surrounding area for mineral extraction purposes. In addition, the soils information contained in several of the technical studies, including the Geotechnical Investigation, did not identify any significant mineral resources. There are no known mineral resources on the proposed project site that would be of value to the region or the residents of the State. As a result, no impacts are anticipated and no mitigation measures are required.

b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

No Impact

According to the City of Wildomar General Plan, there are no known mineral resources on the proposed project site that would result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan be of value to the region or the residents of the State. As a result, no impacts are anticipated and no mitigation measures are required.

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

<td></td>
<td></td>
<td>✓</td>
</tr>
</tbody>
</table>

## DISCUSSION

### a) Exposure of persons to, or the generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

**Less Than Significant Impact**

The site is currently vacant and has a minimal contribution to local noise levels. The surrounding properties to the northwest, southeast and southwest contain single-family homes. Once constructed, the proposed project would result in a minor incremental increase in noise levels mostly due to vehicular traffic to and from the storage facility. There are residentially zoned properties on the southeast, southwest, and northwest of the proposed project. The nearest single-family homes are located 30 feet southeast and 80 feet southwest of the project site. The proposed storage facility would be setback 15 feet from the southeast property line, and utilize a landscaped buffer to reduce the potential noise impacts to the adjacent residential properties southeast of the project site. The storage facility has also been designed to have doors facing away from the residences south of the project site to minimize noises created by the opening and closing of unit doors during business hours.
During project construction, there would be a short term increase in noise levels. Most of this construction noise is expected to result from site grading and the building construction. To ensure compliance with community standards, the project will be conditioned to comply with the provisions of Chapter 9.52 of the Wildomar Municipal Code, as summarized in Mitigation Measure NOI-1, to minimize any adverse effects.

Permanent and temporary construction noise levels are not expected to exceed the established noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. With the implementation of standard conditions/requirements and Mitigation Measure NOI-1, no significant noise impacts are expected to occur.

b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact

Groundborne vibrations and noise can result from both the construction and grading of the site. According to the geotechnical study, there are no soil conditions on the site that require the use of unusual grading equipment or blasting which would result in the creation of excessive groundborne vibrations. While some localized vibrations may occur during the grading and soil hauling activities, any impacts are expected to non-significant and limited to the project site. The proposed project is limited to a storage facility, office, and caretaker building. Once the project is completed no excessive ground vibrations or noises are expected to occur. Based upon these anticipated impacts and site development requirements, no significant impacts are anticipated.

c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?

Less Than Significant Impact

The proposed project would result in increases in ambient noise levels above existing levels without the project. The site is currently vacant and has a minimal contribution to local ambient noise levels. Existing ambient noise is generated from Corydon Street which is adjacent to the project site. The surrounding properties include vacant land to the northeast; single-family homes to the southeast and southwest; and industrial and single-family homes to the northwest. Once constructed, the proposed project would result in a minor incremental increase in ambient noise levels mostly due to vehicular traffic to and from the storage facility.

The most noticeable source of non-automotive noise from commercial development may originate from roof-mounted equipment (such as exhaust fans and air conditioners). There are residentially zoned properties southeast, southwest, and northwest of the proposed project. The nearest single-family homes are located 30 feet southeast and 80 feet southwest of the project site. The proposed storage facility would be setback 15 feet from the southeast property line, and would utilize landscaping to reduce the potential noise impacts to the adjacent residential properties southeast of the project site to less than significant.

d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?
Less Than Significant Impact with the Incorporated Mitigation

The proposed project would result in temporary increase in ambient noise levels above existing levels without the project during project construction. This is expected to occur as the site is graded and the buildings and other site improvements are constructed. These noise impacts have the potential to be significant considering the distance to adjacent residents and the amount of soil export required to construct the project.

Chapter 9.52 of the Wildomar Municipal Code requires that all construction activities (except in emergencies) shall be limited to the hours of 6:00 a.m. to 6:00 p.m. (June through September) and 7:00 a.m. to 6:00 p.m. (October through May). All construction activities shall comply with the noise ordinance performance standards where technically and economically feasible, and all construction equipment shall use properly operating mufflers. In addition, people working near the heavy equipment would be exposed to high noise levels for short periods of time. This level, however, is below the Occupational Safety and Health Administration (OSHA) noise exposure limit of 90 dBA for 8 hours per day. The City and private contractors are required to comply with OSHA requirements for employee protection during construction. With the implementation of standard conditions/requirements and mitigation measures (Standard conditions and requirements 1), no significant noise impacts are expected to occur.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact

The project site is not located within the influence area for any public use airport. The closest public airport is French Valley Airport, approximately 10 miles southeast of the project site. The project site is outside of the airport’s noise and safety influence or flight surface control areas. As a result, no impacts are anticipated and no mitigation measures are required.

f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

No Impact

The Skylark Field Airport is located at the south end of Lake Elsinore; the boundary line for the airport is located approximately 500 feet northeast of the project site. The project site does not align with the approach or take off patterns of the existing runway, and the proposed project site is located approximately 1,000 feet southwest from the runway, perpendicular to the flight path. Skylark Field is used primarily by skydiving aircraft. Given the type of aircraft that routinely use the airfield, the airport’s limited use, as well as the project’s location in relation to the runways, no impacts are anticipated and no mitigation measures are required.

STANDARD CONDITIONS & REQUIREMENTS

1. Compliance with Chapter 9.52 of the Wildomar Municipal Code will reduce potential noise impacts to a less than significant level:
• All construction and general maintenance activities (except in an emergency) shall be limited to the hours of 6:00 a.m. to 6:00 p.m. (June through September) and 7:00 a.m. to 6:00 p.m. (October through May).

• All construction activities shall comply with the noise ordinance performance standards where technically and economically feasible.

• Where practicable, during the construction phase of the proposed project, the construction contractor shall utilize construction methods or equipment that will provide the lowest level of noise impact, i.e., use newer equipment that will generate lower noise levels.

• During all project site excavation and grading activities, the construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturers’ standards. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the project site.

• The construction contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and noise sensitive receptors nearest the project site during all project construction.

**MITIGATION MEASURES**

None.
12. POPULATION AND HOUSING. Would the project:

<table>

<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
<tr>
<td>of replacement housing elsewhere?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

DISCUSSION

a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less Than Significant Impact

The proposed project would provide a community-serving storage facility for recreational vehicles, boats, or other personal items, for existing and future residents in the surrounding area. The proposed project would result in the addition of one residence, the caretaker building and provide street improvements to Corydon Street, Bryant Street and Melinda Lane. These infrastructural improvements are minor (partial paving of existing dirt roads) and would improve the already existing link to the surrounding residential areas. The creation of a single residential unit and the infrastructural improvements proposed by the project would not induce substantial population growth in the area and thus would have a less than significant impact. As a result, no additional mitigation measures are required.

b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

No Impact

Currently, the project site is vacant and does not contain any structures; therefore the project will not have an effect on existing housing units and replacement housing would not be required. In addition, the proposed project would be consistent with the Wildomar General Plan Land Use Designation (Light Industrial). There are many housing units available within the community and surrounding area. Consequently, the project would not displace a significant existing housing and impact the housing demand of the City of Wildomar. As a result, no significant impacts are anticipated and no mitigation measure is required.
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

No Impact

Currently, the project site is vacant and does not contain any structures. Since the project site is vacant, the impact is not expected to be significant to a substantial number of people, as there are no occupants of the site, and the construction of replacement housing is not required. Consequently, the project would not displace a significant number of existing residents. As a result, no impacts are anticipated; and no mitigation measures are required.

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

None.
13. PUBLIC SERVICES. Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant with the Incorporated Mitigation</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Fire protection?</td>

<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
<tr>
<td>e) Other public facilities?</td>
<td></td>
<td></td>
<td></td>
<td>✓</td>
</tr>
</tbody>
</table>

DISCUSSION

a) Fire protection?

Less Than Significant Impact

The Riverside County Fire Department provides fire protection and safety services to the City of Wildomar. The nearest fire station is Wildomar Fire Station #61, located at 32637 Gruwell Street, approximately 1.75 miles from the project site. In addition to Station #61, there are several other Riverside County fire stations in the surrounding area that would be able to provide fire protection safety services to the project site if needed. The project has been conditioned to comply with the requirements of the Riverside Fire Protection Department and for the payment of standard development impact fees pursuant to Chapter 4.60 of the Wildomar Municipal Code. The proposed project is not expected to result in activities that create unusual fire protection needs or significant impacts. Any impacts would be considered incremental and can be offset through the payment of the appropriate Development Impact Fee.

b) Police protection?

Less Than Significant Impact

Police protection services are provided the Riverside County Sheriff's Department. The nearest sheriff's station is located at 333 Limited Street in Lake Elsinore, approximately 3.5 miles from the project site. Traffic enforcement is provided for Riverside County in this area by the California Highway Patrol with additional support from the local County Sheriff's Department. The project has been conditioned for the payment of the standard development impact fees pursuant to Chapter 4.60 of the Wildomar Municipal Code. As a result, the project is not expected to result in activities that create unusual police protection needs or significant impacts. Any impacts would be considered incremental and can be offset through the payment of the appropriate Development Impact Fee.
c) Schools?

Less Than Significant Impact

The proposed project is located within the Lake Elsinore Unified School District (LEUSD). LEUSD has established school impact mitigation fees to address the facility impacts created by residential, commercial, and industrial development. Due to the commercial use of the proposed project, a storage facility, office, and caretaker building, the project would not generate many additional students into the district and would not significantly impact the local school system because a small population would be generated on the project site. The project would be conditioned to comply with School Mitigation Impact Fees established by the Elsinore Unified School District to mitigate the potential effects to school services. As a result, less than significant impacts are anticipated.

d) Parks?

Less Than Significant Impact

The proposed project is commercial in nature and is not expected to directly affect community recreational facilities. In addition, the additional residents from the caretaker building would not adversely affect any existing parks, recreation sites or programs. As a result, impacts are anticipated to be less than significant.

e) Other public facilities?

Less Than Significant Impact

The proposed project may result in a slight increase in the demand for other governmental services such as the economic development and the other community support services commonly provided by the City of Wildomar. The demand for these additional public service impacts would be incremental and minor because of the small size of the project and proposed use. This increment of impact will be mitigated through the payment of the appropriate development impact fees and through the City budget for non-impact fee programs and expenses. The City budget is based upon a combination of property tax, sales tax, user fees, and state and federal government pass-through funding. Most of these revenue sources are from commercial sales, population, or development related, which means the more residents or business activity within the City, the greater the amount of funding that could be available. As a result, the project would not result in any significant impacts to these services, and no additional mitigation measures, beyond the standard requirements, are required.

STANDARD CONDITIONS & REQUIREMENTS

1. Prior to issuance of any building permit, the developer shall pay the required Development Impact Fees for police and fire services pursuant to Chapter 4.60 of the Wildomar Municipal Code and in effect at the time of building permit issuance.

2. Prior to issuance of any building permit, the developer shall pay the required school impact mitigation fees established by the Lake Elsinore Unified School District and in effect at the time of building permit issuance.
MITIGATION MEASURES

None.

</tbody>
</table>

DISCUSSION

a) Increase the use of existing neighborhood and regional parks or other recreational facilities, such that substantial physical deterioration of the facility would occur or be accelerated?

Less Than Significant Impact

The proposed project is primarily a commercial use, a storage facility, and would include an office and caretaker building. The new residents of the caretaker building are not expected to significantly increase the impact on existing neighborhood and regional parks or other recreational facilities. As a result, impacts are anticipated to be less than significant.

b) Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?

Less Than Significant Impact

The proposed project is primarily a commercial use and would include only a single residence: the caretaker building. The project site would include 26,500 square feet of landscaping; however it would not develop active recreational facilities onsite. Additionally, the project would not be required to construct or expand recreational facilities in the Community. The project would however be required to pay Development Impact Fees which would provide funding for Regional Parks and Trails (DIF) as well as open space (MSHCP). As a result, less than significant impacts are anticipated.

**DISCUSSION**

**a)** Cause an increase in traffic, which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?

*Less Than Significant Impact*

The project is located at the intersection of Corydon Street, Bryant Street and Melinda Lane. Corydon Street and Mission Trail, the nearest major intersection, is approximately 0.5 mile northeast of the project site. Another major intersection, at Palomar Street and Mission Trail, is approximately 0.75 mile southeast of the project site. The project site may also be accessed via Bundy Canyon Road. The project site is 1.2 miles west of Interstate 15. According to the Wildomar General Plan, Corydon Street is categorized as an Arterial Highway with 128 feet of right-of-way and 4 lanes (two lanes of traffic in each direction). Mission Trail, and Bundy Canyon Road are categorized as Urban Arterial Highways with 152 feet of right-of-way and 4 lanes (two lanes in each direction). Palomar Street, northwest of Mission Trail, is categorized as a Collector Street with 74...
feet of right-of-way and 2 lanes (one lane in each direction). Bryant Street and Melinda Lane are categorized as Local Streets with 60 feet of right-of-way.

Intersection and roadway functioning is often described by its Level of Service (LOS). LOS “A” constitutes light traffic conditions with no interruptions in service or delays at intersections. While LOS “F” represents congested and unstable conditions with slow moving traffic accompanied with significant delays at many intersections. The City General Plan establishes a citywide goal for intersection performance during peak traffic periods at Level of Service “D” or better.

During construction, the proposed project would affect traffic on regional and local roadways due to construction worker vehicle trips and truck trips for material hauling. Initial estimates for the proposed project indicate that grading activities would result in 4,569 cubic yards of cut volume and 8,403 cubic yards for fill. Approximately, 3,834 cubic yards of fill would be imported to the site during the future grading activities. Assuming that the trucks would carry 10 cubic yards in one trailer, approximately 383 round trips (766 one-way trips) would be required to handle the importation of fill. Grading activities would likely occur over a 2-month period, for 5 days per week. Therefore, approximately 10 round trips (20 one-way trips) would occur per day to import fill during grading. Nonetheless, construction-related traffic would be short-term in nature and would not result in any permanent degradation in operation conditions or LOS on any roadways.

During operation, the proposed project would result in additional vehicle trips on the citywide road network. The project proposes to have enclosed storage for Boats and RVs, which would closely resemble the utility of traditional mini-storage facilities. The proposed project is expected to generate approximately 180 daily trips, with a peak of 11 AM and 19 PM daily vehicle trips. Most of these vehicle trips would access the citywide road network via Bundy Canyon Road, Mission Trail, Palomar Street, Bryant Street, Corydon Street. It is not anticipated that the additional trips would significantly decrease the current LOS rating for these roadways. The calculation of the estimated vehicle trips is contained in Table 5.

**TABLE 4 – ESTIMATED TRIP GENERATION FOR THE PROPOSED PROJECT**

The proposed project would be consistent with the circulation system requirements of the General Plan. As a result, no significant impacts are anticipated. In addition to the physical roadway improvements along Corydon Street, Bryant Street, and Melinda Lane, the developer will be required to mitigate any project impacts by paying its fair share toward the City of Wildomar’s Development Impact Fee program and the regional Transportation Uniform Mitigation Fee (TUMF) program. These standard requirements are expected to ensure that community and areawide project impacts remain at a less than significant level.

b) Exceed, either individually or cumulatively, a level of service standard established by the county
congestion management agency for designated roads or highways?

**Less Than Significant Impact**

Mission Trail, Palomar Street, Bryant Street, Corydon Street, and Melinda Lane are not designated as part of the Congestion Management Program (CMP) roadway. However, it is possible that some of the vehicle trips leaving the project site via Bundy Canyon Road may connect to the CMP network at Interstate 15. The proposed project could add an additional increment of traffic to the designated CMP network. The increment of potential impact associated with this project will be mitigated by the existing road network fees contained in the standard requirements. Consequently, the project would not significantly affect the designated CMP road network. As a result, no significant impacts are anticipated.

c) **Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?**

**No Impact**

The proposed project would not result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks. The maximum height of the project at 25 feet is significantly less than the height of the terrain in the vicinity of the project. Since the location and height of the project would not affect air traffic patterns or aircraft operations from any private or public airport, no impacts are foreseen; therefore, no mitigation measures are required.

d) **Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?**

**Less Than Significant Impact**

The project would not substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment). Access and roadway improvements to Corydon Street, Bryant Street, and Melinda Lane would be designed to comply with design criteria contained in Ordinance 461 of the City of Wildomar and the Wildomar General Plan. Sight distance, signing and pavement striping to and at the project driveways will be reviewed at the time of final grading, landscape and street improvement plans. No significant impacts are anticipated and no additional mitigation measures are required.

e) **Result in inadequate emergency access?**

**Less Than Significant Impact**

The project has no potential to result in inadequate emergency access. Access to and from the project would be primarily provided from Bryant Street, with secondary access from Melina Lane. The project would construct additional improvements to Corydon Street consistent with Ordinance 461 of the City of Wildomar and the Wildomar General Plan. The location and design of the project would not interfere with area wide emergency access or the implementation of local emergency response plans. As a result, no significant impacts are anticipated and no mitigation is required.
f) **Result in inadequate parking capacity?**

**Less Than Significant Impact**

The project proposes to construct 3 parking spaces adjacent to the office/caretaker building near the entrance to the facility. These parking spaces would include 1 handicapped and 2 regular spaces for use by the general public. Within the facility, extra wide drive isles at 35 feet would allow vehicles to park and load/unload materials from storage units while not obstructing the vehicular circulation in the facility. The caretaker’s residence requires the development of two covered parking spaces (400 square feet) and would be provided by the first storage unit located adjacent to the office/caretaker’s building. As a result, the project proposes adequate parking and no significant impacts are anticipated and no mitigation is required.

g) **Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?**

**Less Than Significant Impact**

The street improvements proposed by the project are consistent with the Wildomar General Plan and Ordinance 461. Roadway improvements to Corydon Street will be designed to comply with the design criteria contained in Ordinance 461 of the City of Wildomar and the Wildomar General Plan Circulation Element which designates Corydon Street as an Arterial Highway. Along Corydon Street, the project will provide 30 additional feet of paving width, a meandering sidewalk, a landscaped parkway, curbs and gutters. The Riverside Transit Authority (RTA) does not currently operate transit routes on Corydon Street, nor have they requested the inclusion of bus turnouts or other infrastructure at the site. Since no Regional, Community or Historic Trails traverse the project site, none will be developed in association with the project. Lastly, because the project would be the first to develop on the south side of Corydon Street, no striped bicycle lanes would be included due to the lack of a connection to a larger bicycle lane network. The project’s implementation would not conflict with adopted policies supporting alternative transportation, nor would it prevent future implementation alternative transportation policies, plans, or programs. As a result, no significant impacts are expected and no mitigation is required.

**STANDARD CONDITIONS & REQUIREMENTS**

1. Prior to the issuance of any building permit, the developer shall pay the appropriate locally designated Development Impact Fees.

2. Prior to issuance of any building permit, the developer shall pay the appropriate Transportation Uniform Mitigation Fee

**MITIGATION MEASURES**

None.

DISCUSSION

a) **Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?**

**Less Than Significant Impact**

The Santa Ana Regional Water Quality Control Board regulates wastewater discharges within the northern portion of the City of Wildomar. The proposed project would connect to the wastewater treatment system operated by the Elsinore Valley Municipal Water District (EVMWD). The Elsinore Valley Municipal Water District has adequate capacity to serve the project’s projected wastewater discharges in addition to the provider’s existing commitments. As a result, no significant impacts are anticipated and no additional mitigation measures are required. Urban runoff-related water quality impacts associated with project construction and operation are discussed in the Hydrology and Water Quality Section of this Initial Study.
b) **Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?**

**Less Than Significant Impact**

The project is within the service boundary for the Elsinore Valley Municipal Water District (EVMWD). The proposed project would connect to water and sewer service EVMWD infrastructure. Consequently the project would not require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities; the construction of which could cause significant environmental effects. As a result, any potential impacts are considered incremental and less than significant.

c) **Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?**

**Less Than Significant Impact**

The project would connect to the existing storm drainage facilities. The current drainage is conveyed by an earthen ditch to an existing 24-inch corrugated steel pipe culvert. This culvert outlets into an existing ditch on private property (De Jong Dairy), then to two 18-inch corrugated steel pipe culverts which carry the flows across Corydon Road. The proposed project would install a subterranean high-density polyethylene pipe basin to provide detention for the 10-year-and-lesser design storms. Surface flows would be conveyed via ribbon gutters to a 110-foot-long bioswale for cleansing, collected in a drop inlet, and put into the underground basin which would be provided with a restricted outlet. Two catch basins would be constructed to capture street flows and convey them to the existing dairy ditch. As described, on-site runoff will be incorporated into the existing drainage system after treatment by the best management practices identified in the Preliminary Water Quality Management Plan (and discussed in the Hydrology and Water Quality Section of this Initial Study). Since no new or expanded storm drain facilities are proposed, no significant impacts are anticipated.

d) **Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?**

**Less Than Significant Impact**

The project is within the service boundary for the Elsinore Valley Municipal Water District (EVMWD) and the proposed project would be connecting to water service EVMWD infrastructure. The Elsinore Valley Municipal Water District has adequate capacity to serve the project’s projected water demand in addition to the provider’s existing commitments. Therefore, impacts are considered less than significant.

e) **Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project’s projected demand in addition to the provider’s existing commitments?**

**Less Than Significant Impact**
As described above, the project would be connecting to sewer service Elsinore Valley Municipal Water District infrastructure. The Elsinore Valley Municipal Water District has adequate capacity to serve the project’s projected wastewater discharges in addition to the provider’s existing commitments. Therefore, impacts are considered less than significant.

f) Be served by a landfill with sufficient permitted capacity to accommodate the project’s solid waste disposal needs?

Less Than Significant Impact

The main disposal sites for the proposed project area are the El Sobrante Landfill in Corona and the Lamb Canyon Sanitary Landfill in Riverside. The El Sobrante Landfill has a capacity of 10,000 tons of solid waste per day and, as of December 2004, had 172,531,000 tons of capacity available. The facility is projected to reach capacity in 2030. The Lamb Canyon Landfill has a capacity of 3,000 tons of solid waste per day and, as of August 2005, had 20,908,171 tons of capacity available. The facility is projected to reach capacity in 2023. The project would be served by a landfill with sufficient permitted capacity to accommodate the project’s solid waste disposal needs. As a result, no significant impacts are anticipated.

The project would not substantially alter existing or future solid waste generation patterns and disposal services. The project would be consistent with the County Integrated Waste Management Plan. The project would be required to comply with the recommendations of the Riverside County Waste Management Department. These requirements are standard to all commercial projects and therefore are not considered mitigation pursuant to CEQA. Therefore, any impacts would be less than significant.

g) Comply with federal, state, and local statutes and regulations related to solid waste?

Less Than Significant Impact

The proposed project is subject to the Solid Waste Reuse and Recycling Access Act of 1991. The Act requires that adequate areas be provided for collecting and loading recyclable materials such as paper products, glass and other recyclables. Mitigation measures are proposed by the Riverside County Waste Management Division to ensure compliance with the Act. Through the implementation of the mitigation measure (UTL-1), solid waste impacts resulting from the proposed project would result in a less than significant impact.

STANDARD CONDITIONS & REQUIREMENTS

None.

MITIGATION MEASURES

UTL-1 Prior to the issuance of a building permit, the project applicant shall submit a recycling collection and loading area plan to the Riverside County Waste Management Division.
V. MANDATORY FINDINGS OF SIGNIFICANCE

<td></td>
</tr>
<tr>
<td>c) Have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?</td>
<td></td>
</tr>
</tbody>
</table>

DISCUSSION

The following are Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Less Than Significant Impact with Mitigation Incorporated

Based on evaluations and discussions contained in this Initial Study, the proposed project has a very limited potential to incrementally degrade the quality of the environment because the site was previously used for agriculture, is not in an environmentally sensitive location, and is consistent with the City of Wildomar General Plan. As a result, the proposed project would not significantly affect the environment with mitigation measures contained in this IS/MND.
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)

Less Than Significant Impact with Mitigation Incorporated

The proposed project would have impacts that are individually limited but are not cumulatively considerable with mitigation measures. No cumulative environmental impacts have been identified in association with the proposed project that cannot be mitigated to a less than significant impact level or that were not identified through the City of Wildomar’s General Plan program. Given that the project’s impacts are less than significant, cumulative impacts are also not foreseen to be significant.

c) Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?

Less Than Significant Impact with Mitigation Incorporated

The proposed project does not have the potential to significantly adversely affect humans, either directly or indirectly with mitigation measures. While a number of the project impacts were identified as having a potential to significantly impact humans, with the identified mitigation measures and standard requirements, these impacts are expected to be less than significant. With implementation of the identified measures, the proposed project is not expected to cause significant adverse impacts to humans. All significant impacts are avoidable and the City of Wildomar will ensure that measures imposed to protect human beings are implemented.
