I.0 EXECUTIVE SUMMARY

On behalf of MARI MINA, LLC (client), represented by Mr. Emad Bolous, Soils Southwest have been engaged to conduct a Phase 1 Environmental Site Assessment (ESA) for the two vacant parcels addressed 35775 Idoine Spring Road Wildomar, Riverside County, California. subsequently referred in this report as “the subject property”. This assessment was prepared in general conformance to the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process (ASTM Designation: E1527-13) and ASTM Standard Practice for Limited Environmental Due Diligence; Transaction Screen Process Designation E1528-06.

The purpose of the Phase 1 Environmental Site Assessment (ESA) is to identify, to the extent feasible, “**recognized environmental conditions with respect to the presence or likely presence of any hazardous substances or petroleum products in, on, or at**, in connection with the subject pads. This assessment primarily includes (i) *Record Review from Standard Sources reasonably available through outside environmental agencies (EDR), local governing agencies*, (ii) *Site Reconnaissance*, (iii) *Interviews*, and (iv) *Report Preparation*.

Site Location : 35775 Idoine Spring Road
City: Wildomar
County/State: County of Riverside / State of California.
Coordinates : Latitude 33.6005000N, and Longitude 117.2402000W.

The undeveloped vacant parcels under study are relatively level with an elevation of 1368 ft. above mean sea level. Presence of no other significant features pertinent to this Site Assessment is noted.

The current zoning is Mixed Use Policy Area (MUPA)

Findings and Opinions: Following completion of necessary site reconnaissance, reviewing past-used data, observing surrounding property use, searching available State and Federal EPA property profile and data gathering from the City and County records and interviews, it is our professional knowledge and belief that the results of this assessment have revealed no “de minimis” condition associated with the subject parcel. No further action is warranted.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase 1 Environmental Site Assessment (ESA) is to identify, “to the extent feasible”, *recognized environmental concerns* in connection with the Subject Property. Among others, this assessment included a site reconnaissance as well as research and interviews with representatives of the public agencies, the client and regulatory agencies.

2.2 Scope of Services

The scope of work for this assessment is in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process (ASTM Designation: E1527-13). These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. The scope of work does not include any sampling or testing for asbestos, lead paint, arsenic, and any substances that would require soil sampling and testing.

In general, for the Subject Property, our Scope of Work included the following:

- Site Visit
- Immediate adjacent property visual inspection
- Record search for presences of any past building permits
- Record Search of available Historical Aerial Photographs
- Record Search of City and County Fire Departments
- Interviews with individuals knowledgeable about past usage of the Subject Property
- Record search of the State and Federal Regulatory Agency database for Posted Properties within or near designated radii of the subject property, and the
- Preparation of this report.

2.3 Significant Assumptions

Since this report provides an overview of potential environmental concerns, both past and present, and since this environmental assessment is limited by the availability of information at the time of our research, it is possible that undocumented and/or unreported disposal of waste or other illegal activities impairing the environmental status of the property may have occurred, which could not be identified, evaluated or assessed at this time..

For the parcels under study, the conclusions and recommendations regarding environmental conditions presented are based on a scope of work authorized by the Client. *However, it should be noted that this ESA is not a guarantee that there is no surface or subsurface contamination and no scope of work, no matter how exhaustive, can fully identify presence or suspected presence of detrimental contaminants or conditions existing on and below ground.*

2.4 Terms and Limitations

This ESA is based on information as available from various agencies and sources and generally based on thorough visual inspections of the Subject Property. This report is prepared in accordance with the generally accepted environmental methodologies as identified in the ASTM Designation 1527-13, and contains the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report.

The conclusions of this report are based in part, on the information provided by the client and by others. However, possibility remains that unexpected environmental conditions may be encountered at locations not specifically investigated. Should such an event occur, Soils Southwest must be notified in order that we may determine if modifications to our conclusions are necessary.

The services performed and outlined in this report were based, in part, upon visual observations of the site. Our opinion cannot be extended to areas that did not present any obvious signs of contaminations in form of unusual stain or surface discoloration.

The objective of this report was to assess environmental conditions within the context of our contract and existing environmental regulations and within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial and federal government laws and regulations is not included in our contract for services.

Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

Limitation of Liability: The total liability of Soils Southwest arising out of or related to the Phase 1 ESA, whether based in contract or tort, shall be limited to the compensation actually paid to Soils Southwest for the specific services rendered.

Being beyond scope of work and being beyond the designated boundaries of the Phase I ESA as described in the current ASTM Standard 1527, this ESA excludes any and all professional opinion and/or comment pertaining to the following.

- Lead based paint,
- Lead based drinking water,
- Presence or absence of Radon gas, and
- Presence of asbestos in any form or shape.

2.5 Special Terms and Limiting Conditions

There are no limiting conditions with regard to the ability of Soils Southwest to conduct property inspection/site reconnaissance of the subject property.

2.6 User Reliance

This report may be distributed and relied upon by MARI MINA, LLC, and by Mr. Emad Bolous, its successors and assigns, any rating agencies or bond investors as applicable. Accordingly, the report may also be released to third parties for their review, comment and or for their use.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

Currently vacant and unimproved, The subject property is located at 35775 Iodine Spring Road, Wildomar, Riverside County, California and consists of two parcels of land. The current zoning is Residential. The land is approximately 11 acres in size. **APN: 362-250-001: APN: 362-250-026:** The site elevation is 1368 ft. above sea level. No other significant features pertinent to this Site Assessment are noted.

3.2 Site and Vicinity General Characteristics

Based on the information supplied by the City of Wildomar, the area is a zoned Mixed Use Policy Area (MUPA). The general area around the property is a mixture of Medium Density Residential (MDR) and Mixed Use Policy Area (MUPA)

3.3 Current Use(s) of the Property

Currently vacant and undeveloped, with an exception for the Mobile Home located on the North East side of parcel 02 (26)

3.4 Structures, Roads, Other Improvements on the Site

There is no building or structure existing on the property, with an exception for the Mobile Home located on the North East side of parcel 02 (26) .

There are no public roads on the property.

Water purveyor is the City of Wildomar Agency
Water improvements are located on the adjacent paved streets.

Sewer purveyor is the City of Wildomar
Sewer manholes are located on the adjacent streets on the east, west and on the south.

Electrical Services is provided by Southern California Edison.
Electrical Service to the lots are buried and underground.

3.5 Current Uses of Nearby Properties

Observations regarding properties located on the south, west, north and east sides of the Site are as follows:

Direction	Description
North	Tract Homes
South	Vacant Lot.
East	Single Family Dwellings
West	Tract Homes

3.6 Indications of PCBs

There is no indication that polychlorinated biphenyls (PCBs) were used or stored within the subject parcels. Presence of no overhead transformers was noted.

3.7 Solid Waste Disposals

No solid wastes are currently been generated within the subject property.

3.8 Asbestos Contaminant

3.8 Asbestos Contaminant

In absence of any significant development or abandoned structure presence of asbestos contamination is considered remote.

3.9 State of California Department of Toxic Substance Control (DTSC)

The State of California Department of Toxic Substance Control (DTSC) is the agency that tracks sites on which there have been placed deed restrictions and land use restriction. Based on the DTSC website research by Environmental Data Resources Inc., it is understood that the subject property is not included in the list of deed, or land-use restrictions and none such is reported by the client or by his lead manager/representative.

4.0 User Provided Information

4.1 Title Records

No title company or professional was engaged by the client or by his manager/representative to review land title record.

4.2 Environmental Liens or Activity and Use Limitations

Based on the information supplied by the client, it is understood that there are no known Environmental Lien on the subject property.

4.3 Special Knowledge

The owner/client or the manager/representative have no awareness of specialized knowledge or experience related to the property or its nearby adjacent.

4.4 Commonly Known or Reasonably Ascertainable Information

- The land is approximately 11 acres in size, and currently undeveloped.
- Based on verbal representation of the client it is understood that the client is unaware of any specific chemicals that are present or once were present at the subject parcels.
- The client or his representatives are unaware of any reported spills or other chemical releases on subject parcels
- The client or his representatives are unaware of any environmental cleanups that have taken place at the subject parcels

4.5 Valuation Reduction for Environmental Issues

There was no conformation to any reduction in the valuation of this property pertaining to the purchase price being paid for this property reasonably reflects the fair market value of the property.

The owner of the subject property is MARI MINA, LLC (client) of Newport Beach, California, and is represented by Mr. Emad Bolous.

4.7 Reason for Performing Phase 1 ESA

The Phase 1 ESA is prepared at the request of the client to assist in their determination of whether any immediate remediation or correction is needed to comply with the current *environmental laws* and regulations.

4.8 Previous Environmental Site Assessment/Investigation

Based on available information provided by the City of Wildomar website no Previous Environmental Investigation has been conducted.

5.0 Records Review

The purpose of the record-view was to obtain and review records that will help identify recognized environmental concerns in connection with the two property. Some records reviewed pertain not only to the property, but also to properties within an additional approximate minimum search distance in order to help assess the likelihood of problems from migrating hazardous substances or petroleum products. Unless stated otherwise the approximate search distances used were as specified in the ASTM Standard 1527-13.

5.1 Standard Environmental Records

A search of available federal and state environmental records was obtained from the following:

- Environmental Data Resource (EDR) of Milford, Connecticut.
- CalTRIP- California Toxic Release Inventory Program
- U.S EPA- United State Environmental Protection Agency's
- TRI- Toxic Release Inventory
- NEIEN-National Environmental Information Exchange Network
- CDX- Central Data Exchange
- EnviroStor
- HWTS-Hazardous Waste Tracking System
- The Right-to-Know Network

The requested environmental records received are within the last 90 days from EDR, dated January 13, 2016. A copy of this search is provided in the Appendix B.

Due to discrepancies in the location of some facilities in the database arising from incorrect or incomplete address some facilities may be listed as orphan summary. No orphan facilities were observed to be within the ASTM minimum search distance of the subject property. A review of the regulatory information from database within ASTM minimum search distance for possible recognized environmental conditions (REC's) is provided in the Federal and State sections as below.

5.1.1 Federal Environmental Records (Ref: EDR Summary Radius Map Report dated January 13, 2016)

Record Source	Within Property	Adjoining Properties
National Priorities List (NPL) site	None	None
De-listed NPL Facilities	None	None
CERCLIS Facilities	None	None
CERCLIS NFRAP Facilities	None	None
RCRA CORRACTS TSD Facilities	None	None
RCRA Non-CORRACTS TSD Facilities	None	None
Federal RCRA Generators	None	None
Federal ERNS Sites	None	None
State & Tribal Equivalent NPL Facilities	None	None
State & Tribal Equivalent CERCLIS Facilities	None	None
Leaking Underground Storage Tanks (LUST)	None	None
Record Source	Within Property	Adjoining Properties
Registered Storage Tank	None	None
Federal Institutional/Engineering Control	None	None
Voluntary Cleanup/Response Sites	None	None
Brownfield Sites	None	None

Details of State & Tribal Equivalent CERCLIS Facilities Status:

Facility	Location	Status
N/A	N/A	N/A

5.1.2 Federal EPA Radon for Riverside County (12-sites tested)

Area	Average Activity	%<4pCi/L	%<4-20 pCi/L	%>20 pCi/L
Living Area – 1 st Floor	0.117 pCi/L	100%	0%	0%
Living Area – 2 nd Floor	0.117 pCi/L	100%	0%	0%

For Zone 2, Zip code 92595, indoor average level: ≥ 2 pCi/L and ≤ 4 pCi/L.

5.2 Additional Environmental Record Sources (Sanborn Fire Insurance Map)

Based on EDR supplied information, no Sanborn fire insurance map is recorded covering the subject property.

5.3 Physical Setting Source(s)

A current USGS 7.5' Digital Elevation Model supplied by EDR was reviewed to determine the physical setting of the property. Property is approximately 655 feet above sea level.

The Soil Composition Name of Target Property: MONSERATE
 Soils Surface Texture: Silt Loam
 Hydrologic Group: Class D – Very slow infiltration. Soils are Clayey, have high water table, or are shallow to an impervious layer.
 Drainage Class: Well drained

5.4 Historical Use Information on the Subject Site & Their adjacent

The purpose of screening of available historical aerial photographs is to evaluate potential liability that may have caused resulting from past usage and activities of the subject property. Review of the historical use is summarized as follows:

Period/Date	Land Use	Source(s) of Information
1985	Vacant	EDR Aerial Photos
1989	Primarily Vacant with SFR to the North and East	EDR Aerial Photos
1994	Primarily Vacant with SFR to the North and East	EDR Aerial Photos
2002	Primarily Vacant with SFR to the North and East	EDR Aerial Photos
2005	Church on Parcel 02; SFR to the East	EDR Aerial Photos
2006	Church on Parcel 02; SFR to the East	EDR Aerial Photos
2009	Security Mobile Home on Parcel 02. SFR to the East	EDR Aerial Photos
2010	Security Mobile Home on Parcel 02. SFR to the East; Medium Density Residential to the West	EDR Aerial Photos
2012	Security Mobile Home on Parcel 02. SFR to the East; Medium Density Residential to the West	EDR Aerial Photos

5.5 Historical Use Information on Adjoining Properties of the overall site using Aerial Photographs

The objective of consulting historical sources is to develop a history of the previous uses of the surrounding properties in order to identify past uses with recognized environmental conditions with respect to the subject property. The historical uses of adjoining properties are described below. These uses were determined using the standard historical sources as described above.

Historical Land Use @ the North

Period/Date	Land Use	Source(s) of Information
1978	Vacant	EDR Aerial Photos
1985	Single Family Resident	EDR Aerial Photos
1989	Single Family Resident	EDR Aerial Photos
1994	Single Family Resident	EDR Aerial Photos
2002	Single Family Resident	EDR Aerial Photos
2005	Vacant	EDR Aerial Photos

6.0 Site Reconnaissance

The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property.

6.1 Methodology and Limiting Conditions

The subject property was inspected by Moloy Gupta, P.E. of Soils Southwest on January 14, 2016. The weather during the inspection was sunny.

All areas of the subject property were accessible at the time of the inspection. There were no visual or physical obstructions of the subject property. There were no structure or buildings on the site other than the Mobile Home mention as described earlier.

There was no visible evidence of asbestos. Soil sampling was not a part of the scope of work.

6.2 General Site Setting

6.2.1 Current Use(s) of the Property

The current property's use is undeveloped land.

There were no Recognized Environmental Concerns (REC's) associated with the current property use.

6.2.2 Past Use(s) of the Property

There were no REC's associated with the past property use.

6.2.3 Current Use(s) of Adjoining Properties

The current uses of the adjoining properties are:

North:	Medium Density Residential
South:	Vacant Lots
East:	Single Family Dwellings
West:	Medium Density Residential

The following recognized environmental concerns (REC's) were identified on the following properties.

North:	None
South:	None
East:	None
West:	None

6.2.4 Current or Past Uses in the Surrounding Area

The area is zoned Residential. The general area of the property will be Residential designation. The Surrounding Area is listed below.

Facility	Location	Status
Replanet LLC	23893 Clinton Keith Road	Active
Prompt Cleaners	23905 Clinton Keith Road	Active

6.2.5 Geologic, Hydrogeologic, Hydrologic, Topographic Conditions and Wetlands

The topography of the property is near level with sheet-flow from incidental rainfall appears to flow towards the east. The topography of the surrounding area is a sloping to the east.

There are no current or potential wetland issues at the site.

6.2.6 General Description of Structures

There are no buildings or structures located on the subject property.

6.2.7 Roads

There are no roads on the subject property under study.

6.2.8 Potable Water Supply

Potable water riser is located on the northeast of parcel 01. Potable water is supplied by the local water agency.

6.2.9 Sewage Disposal System

The municipal sewage disposal system is provided by City of Wildomar

6.3 Interior and Exterior Observations

6.3.1 Current Use(s) of the Property

The Current use of the subject property is undeveloped land. Presence of no other debris was observed.

6.3.2 Hazardous Substances and Petroleum Products in Connection with Identified Uses

Based on public records available, there was no evidence of Recognized Environmental Concerns on the property,

6.3.3 Storage Tanks

Determining the presence of Aboveground Storage Tanks (AST's) and Underground Storage Tanks (UST's) is considered essential in assessing potential contamination Sources. Visual inspection and the review of tank registration records are used to determine the possible existence of past and present storage tanks in the area of the subject property. It must be noted however, that the absence of certain site conditions or lack of records may restrict or prevent the determination of the number and contents of storage tanks on the subject property.

No aboveground (AST) or underground storage tanks (UST) were observed on the subject property.

6.3.4 Odors

No strong, pungent or noxious odors were observed.

6.3.5 Pools of Liquid

No standing surface water was observed on the property.

6.3.6 Drums

There were no large 55-gallon drums or containers on the property.

6.3.7 Hazardous Substances and Petroleum Products Containers

Other than those as described above, no containers with hazardous materials were observed on the property.

6.3.8 Unidentified Substance Containers

No open or damaged containers containing identified substances suspected of being hazardous substances or petroleum products were observed on the property.

6.3.9 PCBs

The past use of PCBs in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors was not detected. PCBs in electric equipment are controlled by United States EPA regulation 40 CFR, Part 761. According to this regulation there are three categories for classifying electrical equipment; less than 50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated", and greater than 500 ppm is considered "PCB"

No transformer is located on the subject property or to its adjacent.

6.4 Interior Observations

6.4.1 Heating/Cooling

No structures on the subject property.

6.4.2 Stains or Corrosion

No stains or corrosion were noted on the subject property.

6.4.3 Drains and Sumps

No structures on the subject property.

6.5 Exterior Observations

6.5.1 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed on the property.
No pits, ponds, or lagoons were observed on adjoining properties.

6.5.2 Stained Soils or Pavement

There was no stained soils or pavement found on the property.

6.5.3 Stressed Vegetation

There was no stressed vegetation observed.

6.5.4 Solid Waste

There was no solid waste found on the property.

6.5.5 Waste Water

No wastewater or other liquids being discharged into a drain, ditch, underground injection system, or stream on property, adjacent to the property.

6.5.6 Water Wells

No water well was observed on the property. The nearest well to the site as listed as follows:

GROUNDWATER TABLE

Reporting Agency	USGS-CA
Well Number	Usgs-333554117142501
Well Monitoring Agency	USGS-CA
Well Location: Township/Range/Section	-117.2411469 33.5983573
Current Depth to Water (Measured in feet)	132- unreliable
Current Date Water was Measured	N/A - Agricultural/Irrigation Well
Depth to Water (Measured in feet) (Shallowest)	N/A - Agricultural/Irrigation Well
Date Water was Measured (Shallowest)	N/A - Agricultural/Irrigation Well

6.5.7 Septic System

No septic systems or cesspools were observed on the property. No building records showing any construction or removal of septic systems

7.0 INTERVIEWS

The purpose of interview is to obtain information indicating recognized environmental conditions in connection with the property.

7.1 Interviews with Past and Present Owners and Occupants

We were unable to contact the owner regarding any knowledge of any hazardous material on site.

7.2 Interviews with State and/or Local Governmental Officials

The City of Widomar Environmental Department, and The City of Riverside.

- CalTRIP- California Toxic Release Inventory Program
- U.S EPA- United State Environmental Protection Agency's
- TRI- Toxic Release Inventory
- NEIEN-National Environmental Information Exchange Network
- CDX- Central Data Exchange
- EnviroStor
- HWTS-Hazardous Waste Tracking System

8.0 FINDINGS

The results of this assessment have revealed no recognized environmental conditions associated with the property.

9.0 Opinion

It is our professional opinion that the impact on the property of the current recognized environmental conditions identified in the Findings section of this report are:

“No additional investigation is required”

There were no data gaps that significantly affected our ability to identify recognized environmental conditions associated with the property.

10.0 CONCLUSIONS

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527. Any exceptions to, or deletions from, this practice are described in Section 11 of this report.

This assessment has revealed no evidence of *recognized* environmental conditions in connection with the property.

11.0 DEVIATIONS

It is our belief that except of the limitations and exceptions as discussed earlier in Section 2.4, this Phase 1 ESA complies with the ASTM Standard 1527-13.

12.0 ADDITIONAL SERVICES

No additional services beyond the scope of the ASTM Standard 1527-13 were conducted as part of this assessment.

13.0 REFERENCES

The following documents, maps or other publications may have been used in the preparation of this report.

- American Society for Testing and Materials Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process (ASTM E1527-13).
- American Society for Testing and Materials Guide for Environmental Site Assessments: Transaction Screen Process (ASTM E1528).

14.0 Signatures of Environmental Professionals

We declare that, to the best of our professional knowledge and behalf, we meet the definitions of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property on the nature, history, and setting on the subject property. We have developed and preformed the all appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Soils Southwest, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Contact: STEVEN LOGAN

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Soils Southwest, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

DETAIL MAP - 4512564.2S

Target Property		Areas of Concern
Sites at elevations higher than or equal to the target property	Indian Reservations BIA	100-year flood zone
Sites at elevations lower than the target property	500-year flood zone	
Manufactured Gas Plants		
Sensitive Receptors

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MONSERATE

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
2	9 inches	18 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
3	18 inches	44 inches	indurated	Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:
4	44 inches	57 inches	cemented	Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:
5	57 inches	70 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/30/2015	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/12/2015	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 09/04/2015	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2013	Source: EPA
Date Data Arrived at EDR: 02/12/2015	Telephone: 202-566-0250
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 11/24/2015
Number of Days to Update: 110	Next Scheduled EDR Contact: 03/07/2016
	Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 10/26/2015
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/08/2016
	Data Release Frequency: Annually

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/25/2013	Source: EPA
Date Data Arrived at EDR: 12/12/2013	Telephone: 703-416-0223

Number of Days to Update: 74	Next Scheduled EDR Contact: 03/21/2016
	Data Release Frequency: Annually

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/26/2015	Telephone: 202-564-8600
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 10/26/2015
Number of Days to Update: 69	Next Scheduled EDR Contact: 02/08/2016
	Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007 Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007 Last EDR Contact: 12/17/2007

	Data Release Frequency: Semi-Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

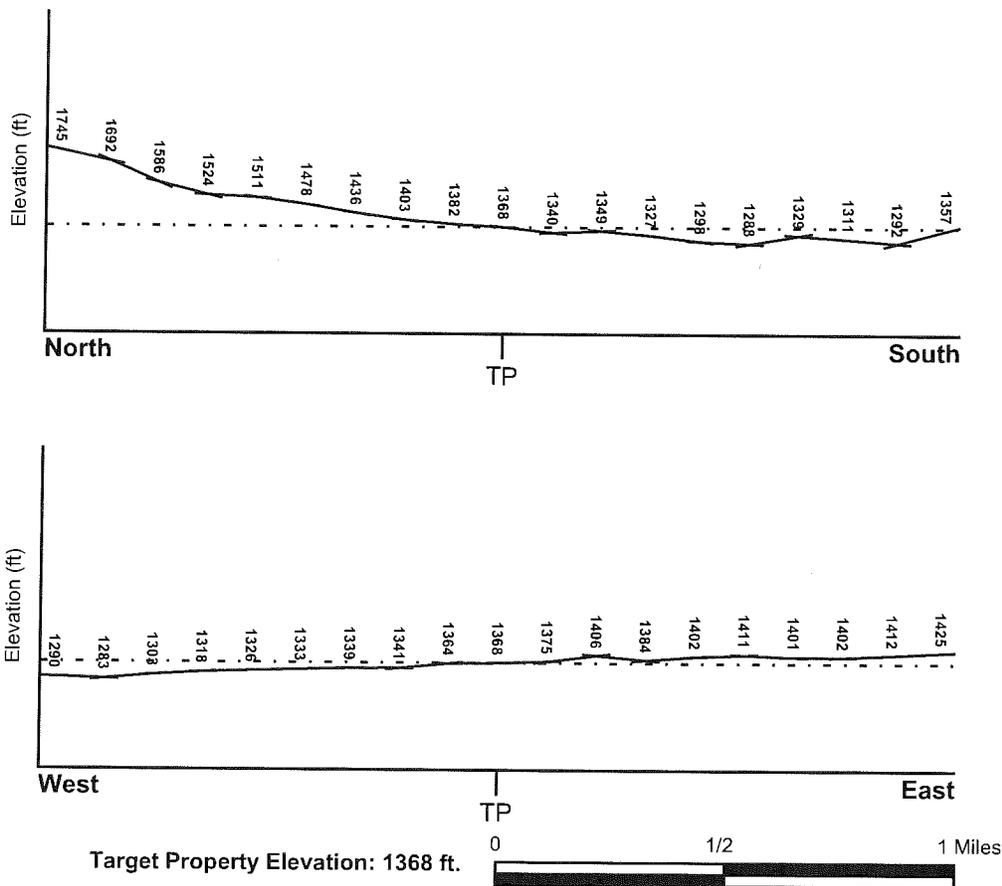

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
RIVERSIDE, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

MURRIETA

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: HANFORD

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
2	7 inches	40 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
3	40 inches	59 inches	stratified loamy sand to coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6

Soil Map ID: 3

Soil Component Name: PLACENTIA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.8 Min: 5.6
2	18 inches	38 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
3	38 inches	57 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.4
4	57 inches	59 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: Terrace escarpments

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
